This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

TWENTY-FOURTH REPORT

OF THE

SCIENCE AND ART DEPARTMENT

OF THE

COMMITTEE OF COUNCIL ON EDUCATION,

WITH APPENDICES.

Presented to both Houses of Parliament by Command of Her Majesty.

LONDON:
PRINTED BY GEORGE E. EYRE AND WILLIAM SPOTTISWOODE,
PRINTERS TO THE QUEEN'S MOST EXCELLENT MAJESTY.
FOR HER MAJESTY'S STATIONERY OFFICE.

1877.

[C.—1789.] *Price* 3*s*. 6*d*.

CONTENTS.

	Page
REPORT - - - - - - - - -	vi

APPENDIX A.—MINUTES AND CORRESPONDENCE.

(1.) *Science.*

Discontinuance of Award of Queen's Medals for success in Science Examinations - - - - - - - -	1
Revised Regulations for conducting Science and Art Examinations	1
Discontinuance of Aid on Instruction in Physical Geography -	2
Memorial praying for establishment of a Museum to contain Scientific Apparatus - - - - - -	3
Correspondence with the Royal Society relating to additional State Aid for Scientific Research - - - -	7

(2.) *Museum.*

Memorandum on the Loan Collection of Scientific Apparatus -	10
Foreign Correspondence relating to same - - - -	23
Memorial praying for provision of a room in which objects could be suitably displayed and studied - - - -	33

APPENDIX B.—SCIENCE INSTRUCTION.

1. Report by Major Donnelly, R.E., on Science Schools and Classes -	37
2. Results of Science School Examinations in May 1875 and May 1876	37
3. Table showing the details of Successes and Failures in each Stage of each Subject - - - - - - - -	40
4. Table showing the Per-centages of Successes and Failures in each Stage of each Subject - - - - - - -	42
Lectures to Science Teachers in connexion with the Loan Collection of Scientific Apparatus - - - - -	43
List (*a.*) of Officers of Royal Engineers who have been employed during 1876 in Preliminary Inspections of Science and Art Classes - - - - - - - -	46
List (*b.*) of Officers of Royal Engineers employed in Inspecting Examinations in Science and Art during 1876 - -	48
5. Royal Exhibitions and Names of Exhibitioners - - -	50
6. Whitworth Scholarships—List of Successful Candidates, (*a*) in the Competition; (*b*) in the Examination for Prizes - -	50
7. List of Local Scholarships and Exhibitions granted for the year 1875–76 - - - - - - - - -	51
8. List of Queen's Medallists - - - - - - -	54

Page

9. List of Schools applying for the Special Grant in aid of Laboratory Expenses - - - - - - - - - 56
10. List of Science Schools, giving the Number of Students returned as under Instruction in May 1875 and May 1876, and the Number of Prizes and Medals awarded - - - - - - 59
11. Table showing the Classes in each Science School, the Subjects taught, and the Number of Students in each Subject - - 92
12. Aid granted towards the Cost of purchasing Apparatus and Examples for Science Schools, 1876 - - - - - - 154
13. List of Schools in which Payments have been earned on the Results of the Examinations in May 1876 - - - - - 159
14. List of Science Teachers to whom Payments have been made during 1876 - - - - - - - - - - 203
15. List of Science Schools closed from May 1875 to May 1876 - 215
16. List of places to which Loan Collections of Scientific Apparatus have been sent during 1876 - - - - - - 222

Grants in aid of erection of Buildings. Report by Major Festing - 223

APPENDIX C.—ART INSTRUCTION.

1. Report of the Assistant Director for Art on Schools of Art and Art Examinations - - - - - - - - 224
2. Instruction in Drawing in Elementary Day Schools during the year 1875–6 - - - - - - - - 228
3. Table of Results of Examinations in Diocesan and other Training Colleges - - - - - - - - - 340
4. List of Art Classes aided by the Department - - - 342
5. Awards to Teachers of Art Classes - - - - - 372
6. List of Science Classes receiving Grants and Payments for Drawings of Buildings and Machines - - - - - - 374
7. Examinations in Drawing in Schools not entitled to receive Payments 377
8. Abstracts of Returns from Schools of Art - - - - 379
9. Results of Examination of Schools of Art - - - - 446
10. Table showing the Total Income of Schools of Art and Amount of Fees paid in 1876 - - - - - - - - 450
11. Table showing Number of Persons taught Drawing in 1876 by Certificated Art Teachers, compared with Numbers in previous years 455
12. Table showing the total amount of Aid granted to Schools and Classes - - - - - - - - - 456
    Summary showing the increase in the number of Schools and Classes in the five years, 1872 to 1876 - - - 457
13. Table showing Building Grants to Schools of Art - - - 458
14. Table showing Details of Prizes issued to Art Schools and Classes - 458
15. Report of the Examiners on the National Competition at South Kensington, June 1876 - - - - - - - 461
16. List of Students rewarded at the National Competition, 1876 - 463
17. List of Students in Training and National Scholars to whom Honorary Medals, &c. have been awarded - - - - - 468
18. Prizes awarded to Masters of Schools of Art in 1876 - - 469

Page

19. Annual Prizes to Masters of Schools of Art awarded in the years 1868–76 - - - - - - - - - 471
20. List of Persons who obtained Art Certificates of the 3rd grade - 473
21. Prizes of the Plasterers' Company - - - - - 474
22. Report of the Registrar of the National Art Training Schools - 475
23. Report of the Head Master of the National Art Training Schools on his visit to the Art Schools of Belgium and Düsseldorf - 476

APPENDIX D.—SOUTH KENSINGTON MUSEUM.

1. Report of the Acting Director of the South Kensington Museum - 489

Returns—(*a.*) Art Museum:

(1.) List of Contributors and Loans to Art Museum, 1876 508
(2.) List of Contributors who withdrew their Loans during the year 1876 - - - - 509
(3.) Donations and Bequests to the Art Museum during the year 1876 - - - - - 509
(4.) Abstract of Objects acquired by purchase or gift - 510
(5.) Summary of Classes of Objects received - - 515
(6.) Geographical Summary - - - - 516
(7.) Abstract of Cost of Objects acquired - 517
(8.) Return of Objects, Visitors, Receipts, &c. at various Exhibitions to which contributions were sent from the Art Museum - - - - - 518
(9.) Return of Objects, &c. lent for Annual Meetings Conversazione, &c. - - - - 518
(10.) Return of Circulation of Paintings and Drawings to Schools of Art for purpose of Study - - 519
(11.) Return of Objects lent on Deposit Loan to Schools of Art - - - - - - 520

(*b.*) National Art Library:

(1.) Return of Number of Readers, Books acquired, &c. from 1872 to 1876 - - - - 520
(2.) Return of Readers monthly in 1875 and 1876 - 522
(3.) Volumes, Diagrams, &c. borrowed by Schools of Art in 1876 - - - - - - 522
(4.) List of Donations to Art Library in 1876 - - 523
(5.) Publications received in Exchange, 1876 - - 529
(6.) Art Books and Pamphlets published in 1876 - 529

(*c.*) Miscellaneous Returns:

(1.) Return of monthly attendance of Visitors at the South Kensington Museum - - - 530
(2.) Comparative statement of yearly attendance of Visitors from 1857–76 - - - - 530
(3.) Attendance of the Public during Holidays - - 531
(4.) Monthly attendance at Bethnal Green Museum - 531
(5.) Receipts at Bethnal Green Museum - - 532
(6.) Comparative statement of Receipts at South Kensington Museum - - - - - 533

2. Report of the Director for Art as to his charge of the British and Foreign Pictures and Drawings in the Fine Art Collections at South Kensington - - - - - - 534

APPENDIX E.

Report of the Royal Hibernian Academy of Arts - - - 577

APPENDIX M.

Statement of the Expenditure of the several Divisions of the Science and Art Department for the period from 1st April 1876 to 31st March 1877 - - - - - - - 579

I.—SCIENCE DIVISION.

Aid given towards the Promotion of Instruction in Science.

(*a.*) *Elementary Scientific Instruction.*

Elementary Scientific Instruction.

1. A substantial increase has to be reported in the number of schools examined in 1876 over the number examined in 1875, as will be seen from the following table, which gives the statistics from 1866 to the present time. A corresponding increase has also taken place in the number of separate classes in these schools, in the number of students under instruction, in the number of students examined, and in the number of worked papers sent in. This increase is the more noteworthy, inasmuch as the restriction referred to in our last report, which prevented children in Public Elementary Schools who had not passed Standard V. of the English and Scotch Codes or the 5th Class in Irish National Schools from being presented for examination, has in 1876 been extended to children who had not passed Standard VI. or the 1st stage of the 6th Class respectively.

	No. of Schools.	No. under Instruction.
1866	153	6,835
1867	212	10,230
1868	300	15,010
1869	523	24,865
1870	799	34,283
1871	908	38,015
1872	948	36,783
1873	1,182	48,546
1874	1,336	53,050
1875	1,299	52,669
1876	1,426	57,988

Number of Schools, &c.

The number of schools as given in this table includes every institution in which scientific instruction is given, whether such instruction is given to a class in one subject only or to classes in several. The above-mentioned 1,426 schools comprised 4,931 different classes, from which 30,108 students came up for examination in May, in addition to 3,181 self-taught students and pupils in classes not taught by certificated teachers. From the results of the examination as given in the following table it will be seen that the number of papers passed compares favourably with the statistics of previous years, although the number of 1st classes obtained shows some diminution. The number of

candidates who came up in honours was 1,080, of whom 65 passed in the 1st class and 184 in the 2nd class.

—	No. examined.	No. of Papers worked.	No. of Papers passed.	No. of First Classes in Elementary and Advanced Stages.
1871	18,750	38,098	22,105	3,431
1872	19,568	39,383	27,806	7,375
1873	24,674	56,577	35,100	8,782
1874	27,513	61,796	38;198	10,896
1875	30,685	62,308	43,192	13,565
1876	33,189	69,162	46,332	12,453

2. From the reports on the general character of the examinations which have been received from the examiners, it appears that the results of the examinations are generally of an encouraging nature. Some of these reports contain very valuable suggestions as to methods of teaching, &c., and they have been printed and circulated among the schools. Examinations.

3. The number of centres at which examinations were held was in the provinces 923, and in the metropolis 128. The total amount paid to teachers on results was for the year 1876 42,591*l.* 5*s.* 8*d.*, being at the rate of 14*s.* 8*d.* for each person under instruction. In the previous year the rate was 16*s.* 1*d.* The payments to each teacher averaged about 26*l.* 10*s.*, and the number of teachers paid was 1,601. The grants made towards the purchase of apparatus, diagrams, and examples amounted during the year to 842*l.* 15*s.* 9*d.*, being a decrease on the year 1875, when they amounted to 1,043*l.*

4. The distribution of schools was as follows:—1,149 in England and Wales, 112 in Scotland, and 165 in Ireland.

5. Applications for grants in aid of the erection or adaptation of buildings for the purpose of Science Schools have been received during the year from Bath and Bewdley. At Kilmarnock also it is proposed to erect a building for Science and Art Classes. Details concerning these applications are given in the report of Major Festing, R.E., at page 223 of the Appendix. Building grants.

6. The number of competitors for Whitworth Scholarships in 1876 was 51. Of these 19 of the most successful in the theoretical subjects of competition were admitted to go forward to the examination in practical workmanship, which was, as in previous years, held at the workshops of Sir J. Whitworth and Co. in Manchester. Whitworth Scholarships.

Exhibitions and Scholarships.

7. The number of local exhibitions for the year 1876 was nine, of which six were renewals of previously established exhibitions and three were new ones. The number of Science and Art Scholarships was 54, and of Elementary School Scholarships 57.

Courses for Teachers.

8. Special grants in aid of travelling expenses were made during the summer to 330 teachers to enable them to visit the Loan Collection of Scientific Apparatus, and to attend special short courses of lectures by eminent scientific men on the apparatus in the collection. A course of instruction in botany lasting eight weeks was also given by Mr. Dyer, and one of the ordinary summer three weeks, courses was given by Prof. Guthrie. Each of these courses was attended by 30 teachers. The classes of teachers in training attending the lectures and laboratories of some of the Professors of the Royal School of Mines have been continued, the numbers being for the session 1876–77 as follows:—Chemistry 16; Biology 9; Physics 12; Mechanics 12.

9. Further details with regard to these courses and to the instruction in Science in general will be found in Major Donnelly's report, Appendix B.

(*b.*) *Advanced Scientific Instruction.*

Royal School of Mines.

10. *Royal School of Mines.*—The registrar of the school reports that the number of exhibitioners, and students who entered the school with the view to become associates, was 31 during the sessions 1875–6. The number in the previous year was 40. There were also 164 entries for the separate courses of instruction, which have been carried on as usual, partly at the Museum in Jermyn Street, and partly at South Kensington.

Royal College of Chemistry.

11. Professor Frankland in his report on the Chemical Schools at South Kensington states that the progress of the students has been satisfactory. In the research laboratories many interesting investigations have been carried on, which are fully described in Dr. Frankland's report at page 551 of the Appendix. The usual courses of lectures have been given.

Metallurgical Laboratory.

12. In the Metallurgical Laboratory the attendance of students has again been as large as the accommodation will allow.

Royal College of Science, Dublin.

13. *Royal College of Science, Dublin.*—The usual courses of lectures were delivered during the year, and were attended by 58 persons, of whom 22 were associate students prose-

cuting the full three years' course, with a view of obtaining the diploma of Associate. In the recently established physical laboratory the class attendances and educational results have been satisfactory. The chemical laboratory continues to maintain its efficiency.

II.—ART DIVISION.

Aid given towards the Promotion of Instruction in Elementary Drawing as a Part of National Education, and in Fine Art as applied to Industry.

14. *The National Art Training School.*—During the year 1875–76, 36 students in training to become Art Teachers and 16 national scholars in training to become designers or Art-workmen, received allowances to enable them to study in the School and Museums; 20 students were admitted on payment of half fees; and 100 others, including the students in training, the National Scholars, and 21 men of the corps of Royal Engineers received gratuitous instruction. National Art Training School.

Three students in training were appointed to masterships in Schools of Art.

At the annual examinations for advanced or third grade Art certificates, held in February 1876, 28 students of the Training School obtained certificates qualifying the holders of them to earn payments from the Department as Teachers in Schools of Art.

Two gold, 6 silver, 15 bronze medals, and 11 Queen's prizes in the National Competition were awarded to students of the Training School, besides 123 prizes of books, &c. for works sent in for examination. The number of students was 843; and the fees received amounted to 3,500*l.*, of which sum 276*l.* 16*s.* was paid by evening students, and 3,223*l.* 4*s.* by day students.

15. *The Etching Class.*—This class has been conducted during the past session by Mr. A. Legros, Slade Professor of Fine Art in University College, and has been attended by an average of 5 students of the Training School. Etching Class.

16. *Schools of Art.*—New schools have been established during the year 1876 at Bolton, Elgin, and Plymouth. The total number of Schools of Art in operation throughout the kingdom was 141. The total number of students in these schools was 27,973. Schools of Art.

The annual increase reported in previous years in the

work done in the schools continues to be steadily maintained. At the annual examination in April 1876, 17,069 students submitted 122,553 drawings or models; the corresponding numbers in 1875 having been 14,894 students, and 101,366 works. In this competition 13,789 students, on account of whose instruction payments were made to the committees of the Schools, were of the industrial classes. In the examinations in drawing of the 2nd grade 4,789 students were successful, and 1,137 obtained prizes.

Increase of fees paid by students.

The amount of fees paid by students in Schools of Art in the last three years shows a considerable increase each year, as follows:—

1874.	1875.	1876.
27,213*l.*	30,338*l.*	32,933*l.*

National Competition.

17. *National Competition.* — The number of works selected for the National Competition was 1,230, composed of drawings from the antique, designs, and studies in light and shade or colour. The number in 1875 was 1,700.

The Report of the Examiners will be found in App. C., page 461.

Art Night Classes.

18. *Art Night Classes.*—The number of students was 31,158 in 883 classes, the corresponding numbers in 1875 having been 25,359 in 779 classes. 3,797 students in these classes passed the examination of the 2nd grade, 663 obtained 2nd grade prizes, and 465 obtained prizes for works sent up for inspection. For the current session of 1876-77 the limitation of aid to "Night Classes," *i.e.*, to classes held after 6 p.m., has been removed, and aid is now given to Art Classes held in any school or other educational institution, irrespective of the time of meeting.

Elementary Schools.

19. *Elementary Day Schools.* — In 3,335 elementary schools 460,961 children were taught drawing, and 331,348 were examined at the annual examination in March 1876. These numbers, compared with those of 1875, present an increase of 391 schools, 73,321 children taught, and 56,498 examined; the corresponding totals in 1875 having been 2,944, 387,640, and 274,850. The total amount of the grants in aid of instruction in drawing in Elementary Schools in 1876 was 24,895*l.* 13*s.* 5*d.*, showing an increase of 4,992*l.* 8*s.* 4*d.* on the amount granted in 1875, namely, 19,903*l.* 5*s.* 1*d.*

Training Colleges.

20. *Training Colleges for Elementary School Teachers.* —At the examination of these colleges, in November, 609

teachers obtained certificates for drawing. The total amount granted to the Training Colleges increased from 428*l.* in 1875 to 1,285*l.* in 1876. This increase of 827*l.* is due to an alteration which we considered to be desirable in the conditions of the payments on results, and which is fully explained at p. 225 of the Appendix.

21. *Grants in aid of the Purchase of Examples, Apparatus, and Fittings.* — In 1874, the sum granted was 1,855*l.* 15*s.* 8*d.* on 516 requisitions; in 1875, 2,314*l.* 2*s.* 10*d.* on 617 requisitions, and in 1876, 2,243*l.* 9*s.* 1*d.* on 580 requisitions. These grants are supplemented by payments from Local Committees, who defray part of the cost of Examples in all the schools. Grants towards cost of examples

22. The grand totals of persons taught drawing, painting, or modelling through the agency of the Department, have been as follows during the last three years:— Total number of persons instructed.

1874.	1875.	1876.
345,382	449,689	530,412

23. *Payments on Results.*—The following table shows the number of separate payments made on the results of examination:— Payments on Results of Examinations.

Nature of Payments.	1874.	1875.	1876.
1st Grade.—1*s.*, 2*s.*, 3*s.* or 5*s.* on account of children taught in Elementary Day Schools.	166,593	202,704	264,294
2nd Grade.—10*s.* on account of students in Schools of Art, Art Classes, Elementary Day Schools, and resident students in Training Colleges.	11,876	12,788	14,587
2nd Grade.—2*l.* (maximum) on account of resident students in Training Schools who complete their certificates of the 2nd Grade.	337	328	(see par. above.)
3rd Grade.—15*s.* on account of elementary works executed in Schools of Art, Night Classes, and Science Classes.	1,954	2,478	2,829
3rd Grade.—30*s.* on account of advanced works executed in Schools of Art.	766	835	948
3rd Grade.—3*l.* on account of free studentships in Schools of Art.	205	181	137
3rd Grade Certificate.—Payment of 10*l.* on each student obtaining an Art-Teacher's Certificate.	24	26	25
3rd Grade payment of 5*l.* on a student prepared for a National Scholarship.	4	6	4
Total - -	191,759	219,346	282,874

Prizes.

24. *Prizes.*—The number of prizes awarded has been as follows :—

Nature of Prize.	1874.	1875.	1876.
1st Grade Prizes - -	12,193	13,232	16,012
2nd Grade Prizes - -	4,675	3,839	3,756
3rd Grade Prizes - -	1,614	1,920	1,905

25. It will be seen from the summary (at p. 457 of the Appendix) of returns for the five years 1872–76 that during that period the number of institutions in which instruction is given in drawing or in higher Art, with the aid of the Department, and subject to its inspection, has nearly doubled. There has been a corresponding growth in the numbers of the persons taught, and of the exercises and Art works examined, while the total amount of the aid given by the Department in the form of payments on the results of this instruction, as tested by examinations, has risen from 26,142*l.* in 1872 to 47,755*l.* in 1876, or 82 per cent. of increase, an amount which compares favourably with the increase of the means of instruction, and the number of persons taught. The details relating to instruction in Art will be found in the Report of Mr. H. A. Bowler, at page 224, and its Appendices.

III.—SOUTH KENSINGTON MUSEUM.

rt Museum. urchases.

26. *Art Museum.—Purchases.*—In the absence of Mr. P. Cunliffe Owen, C.B., who has been appointed Secretary to the Royal Commission for the Paris Exhibition of 1878, Mr. Thompson, the Acting Director of the Museum, reports that the acquisitions during the past year have been more numerous than usual, and in many instances of more than ordinary importance. An interesting collection of Japanese pottery, formed by the Japanese Government for the Museum, and first exhibited at the Philadelphia Exhibition, has been received.

ifts and oans.

27. *Gifts and Loans.*—Two very important collections which have been bequeathed to the Museum have been arranged for public inspection. The one of books, manuscripts, and pictures, belonging to the late Mr. Forster (which by the liberality of Mrs. Forster has come at once into the possession of the Nation), and the other a collec-

tion of water-colour drawings of the late Mr. William Smith. A collection of fans has also been presented to the Museum by Sir M. Digby and Lady Wyatt. Of loans the most important have been a fine collection of paintings from Althorp, the property of the Right Hon. Earl Spencer, K.G., and a selection of works from the collection of Mr. W. Fuller Maitland.

28. *Reproductions.*—Some articles of gold and silver plate belonging to the Barbers' Surgeons' Company, and a reproduction in plaster of the Tabernacle in the Church of St. Léau, near Brussels, are the most noteworthy additions to these collections. Reproductions.

29. *The Special Loan Collection of Scientific Apparatus* alluded to in our last Report requires more than a passing notice. The great interest that was taken in the formation of this unique collection, both at home and abroad, is explained in a memorandum which was printed in the Handbook to the collection, and which is given at page 10 of the Appendix. To His Imperial Highness the Crown Prince of Prussia and Her Royal and Imperial Highness the Princess, and to the Governments and Institutions of foreign countries,—among which may be mentioned the Conservatoire des Arts et Metiers of France, the Institute Superiori of Florence, the Gewerbe Akademie of Berlin, the University of Leyden, the Imperial Academy of Sciences, St. Petersburg, and the Academy of Sciences, Madrid,—our thanks are due for the support they have given in the promotion of this interesting collection, which was opened by your Majesty on the 13th May, and closed on the 31st December. It was visited by 275,813 persons. Conferences were arranged in connexion with this exhibition for the discussion of scientific questions and recent discoveries, &c., and lectures were delivered by many distinguished men of science on the various apparatus exhibited. We are indebted to the Commissioners for the Exhibition of 1851 for the loan of the Western Galleries overlooking the Horticultural Gardens, in which the greater part of the collection was admirably accommodated. Details of the arrangements in connexion with this loan collection, as well as correspondence with foreign Governments on the subject, will be found at pages 10–32 of the Appendix. Loan Collection of Scientific Apparatus.

30. *Oil and Water-colour Paintings.*—Mr. Poynter, R.A., the Director for Art, reports that the purchase of paintings last year was confined principally to works required as examples for study. Some valuable drawings have been bequeathed to the Museum by the late Mr. William Smith,

and a fresco painting was presented by Mr. J. F. Austen, and some oil paintings by Baron de Ferrières and the late Mr. S. Redgrave.

Circulation.

31. *Circulation of Art Objects.*—The demands from provincial Schools of Art for objects, paintings, drawings, &c. for the purposes of study has so considerably increased that it is frequently found impossible from the present collections devoted to circulation to meet the wishes of the different localities. Exhibitions of Art and Industry to which loans were made from the Museum, were held at Belfast, Wrexham, Middlesborough, Leicester, and Greenock. The results of these exhibitions as regards attendance and receipts, are given in detail at page 518 of the Appendix.

Deposit Loans.

32. *Provincial Museums and Deposit Loans.* — The Museums at Nottingham, the Wedgwood Institute, Burslem, the Corporation Art Galleries, Birmingham, the Smith Institute, Stirling, and the Mechanics Institute Museum at Hanley, have received the usual *deposit* loans for periods varying from one to twelve months.

National Art Library.

33. *The National Art Library.*—The want of funds has prevented the acquisition by purchase of many works during the year. The collection has, however, been enriched by several gifts of importance, among which may be mentioned the valuable library of Art Books bequeathed by the late Mr. William Smith. Drawings, prints, photographs, &c. have also been added to the respective classes. Full details of the various acquisitions will be found in the report of Mr. Soden Smith, the keeper of the library, at page 495 of the Appendix. The number of readers for the year was 24,033 against 21,922 for 1875.

Educational Library.

34. *Educational Library.*—This library has been increased by 1,356 books by donation and loan, and also by the transfer of nearly 2,000 volumes from the library of the Education Office in Downing Street. The number of readers during the year was 20,986, or an average of 67 per day, showing an increase of 1,044 on the return for 1875.

Educational Collections.

35. *Educational Collections.* — These collections have been temporarily removed to the Exhibition of 1862 Galleries, where they are shown to greater advantage. Numerous gifts, purchases, and loans have been received from the Collection of Scientific Apparatus, but as these additions were not made till after the close of that exhibition, a detailed description of them will appear in our next report.

Collections of Building Materials

36. *The Collections of Building Materials and Models of Construction, of Marine Models, of Models of Machinery,*

and Munitions of War, were somewhat disarranged in order to make room for the proper display of the Scientific Exhibition, which received some valuable contributions from those permanent collections. Details of the various acquisitions made to this branch of the Museum will be found at page 504 of the Appendix. and Models of Construction, Marine Models, Models of Machinery, and Munitions of War.

37. *The Museum of Economic Fish Culture* belonging to Mr. Frank Buckland continues to be very popular; the various processes of artificial breeding of fish being shown in operation. Fish Museum.

38. *Publications.*—The following are the principal publications relating to the Museum which have been issued under our authority during the year:—Descriptive Catalogues of the Bronzes of European Origin (by Mr. Drury Fortnum) and of the Water-Colour Drawings (by the late Mr. Samuel Redgrave); Catalogue and Handbook of the Loan Collection of Scientific Apparatus; two more parts of the Universal Art Inventory; catalogues of several minor collections both at South Kensington and Bethnal Green; and several handbooks on different branches of art belonging to the series mentioned in our last report. Publications.

39. *Public Lectures.*—Lectures were delivered during the year by Mr. Ernst Pauer on the pianoforte, and the usual courses on the Human Form and Ornamental Art by Mr. Bellamy and Dr. Zerffi. Lectures.

The attendance was as follows:—

Lectures by Mr. Pauer - - -	1,447
Mr. Bellamy - - - -	1,436
Dr. Zerffi - - - -	2,856
	5,739

40. *Visitors.*—The number of visitors to the Museum in 1876 was 1,173,351, or 343,139 in excess of the previous year. This large increase is partly attributable to the interest taken by the public in the Loan Collection of Scientific Apparatus. Returns of the attendance with comparative tables are given at page 530 of the Appendix. Visitors.

IV.—Bethnal Green Branch Museum.

41. His Royal Highness the Prince of Wales graciously allowed his collection of Indian presents to be transferred to Bethnal Green after its exhibition in the India Museum Loans.

at South Kensington, and it has attracted many thousand visitors. The directors of Dulwich College lent for a short period their interesting collection of paintings to this Museum. Among the other important loans may be mentioned the collection of British Lepidoptera, made by the late Mr. Henry Doubleday, a collection of oriental porcelain lent by Mr. Franks, and a collection of Japanese Art objects by Mr. Alt.

Food Collection.

42. *The Food Collection.*—The re-arrangement of this collection is progressing under the superintendence of Professor Church; the portion relating to the adulteration of food has been re-modelled by Mr. James Bell. A new handbook to the collection has been published.

Animal Products Collection.

43. *Animal Products Collection.*—This collection has received many valuable additions during the year, and a handbook has been prepared by Mr. P. L. Simmonds.

Collection of Economic Entomology.

44. *The Collection of Economic Entomology* is assuming increased importance, and under the superintendence of Mr. Andrew Murray, who has prepared a handbook to the collection, has been completely re-arranged. The Doubleday collection of Lepidoptera, above referred to, is shown in this section, and has proved very attractive.

Visitors.

45. The numbers of visitors to the Museum during the past year was 938,794, an increase of 416,696 on 1875. The amount received from fees and other miscellaneous sources was 624*l.* 4*s.* 1*d.*

V.—Museums in connexion with the Science and Art Department, supported by the State.

Museum of Practical Geology.

46. *Museum of Practical Geology.*—The curator of this Museum, reports that the number of visitors during the past year was 39,813, a slight increase on the preceding year. Lists of the donations to the Museum and library are appended to the report.

Palæontological Department. Naturalist's Department.

47. Mr. Etheridge's report on the Palæontological Department will be found at page 540 of the Appendix; also the report of Prof. Huxley on the Naturalist's Department, to which some important additions have been made.

Edinburgh Museum.

48. *Edinburgh Museum of Science and Art.*—In the absence for part of the year of the Director, who was appointed one of the Executive Commissioners of the British Section of the Philadelphia Centennial Exhibition, Professor Archer's duties were carried on by Mr. Galletly.

The attendance at the Museum amounting to 350,656, has not been so great during the year, which is partly accounted for by the great depression in trade. Some changes have taken place in the staff of the Museum which is now below its normal strength. Many interesting additions have been made to the Museum by purchase and donations, several of the latter emanating from America.

49. Details of the Natural History Collections, which are undergoing complete re-arrangement, will be found in Dr. Traquair's report at page 559 of the Appendix. Some important additions have been made, among which may be mentioned the collection of birds belonging to the late Sir W. Jardine, and a set of the specimens of Natural History brought to this country by the officers of the Transit of Venus Expedition. Natural History Collections

50. *Natural History Museum of the Royal Dublin Society.*—There has been a large increase in the attendance of visitors at this Museum during the past year, the numbers being 96,727 in 1876, and 66,055 in 1875. Numerous additions have been made to the collections, of which full details, under the various classes, are given at page 568 of the Appendix. Natural History Museum of Royal Dublin Society.

51. *The Library of the Royal Dublin Society.*—The number of readers during the year was 22,299, with an average of 53 in the daytime, and 41 of an evening, showing an increase of nearly 4,000 on the preceding year. Library of Royal Dublin Society.

52. *Glasnevin Botanic Gardens.*—Some improvements and repairs have been effected by the Board of Works on several of the buildings in these gardens. The system of exchanging plants and seeds with other establishments continues to be of much use. Of plants 528 species were received during the year, and of seeds 1,128 packages. The Royal College of Science and the Queen's College, Galway, were supplied as usual with plants and specimens for the illustration of lectures, &c. The number of visitors during the year was 186,381, showing a slight increase on the preceding year. Glasnevin Gardens.

VI.—Geological Survey of the United Kingdom.

53. *Extent of Area surveyed.*—Professor Ramsay, the Director-General of the Geological Survey, states that in England and Wales the area surveyed during the past year amounts to 1,827 square miles, in Scotland 500 square Area surveyed.

miles, and in Ireland 746 square miles, showing a total area for the United Kingdom of 3,073 square miles. This is an increase of 433 square miles on the area surveyed in 1875.

Maps.

54. The preparation and publication of maps and memoirs has been continued, and details of the progress of the work are given in the Reports of the Directors at pages 536–9 of the Appendix. The index maps at page 542 also show the present state of the survey throughout the Kingdom.

Mining Record Office.

55. *Mining Record Office.*—The report of Mr. Robert Hunt, the Keeper of Mining Records, on his labours in the coal and iron districts, will be found at page 541. The returns for the "Mineral Statistics," of 1875 and 1876, compiled by Mr. Hunt, have been completed and published.

VII.—Institutions and Societies which receive Aid from the State, subject to the Superintendence of the Science and Art Department.

Royal Dublin Society.

56. *Royal Dublin Society.*—During the year 1876, 52 members joined the Society, which now consists of 1,228 members, 785 life and 443 annual members; a total somewhat less than in 1875. The annual examination for certificates was held on the 5th June; and several meetings for the discussion of papers on subjects connected with Science and Art were held during the year and were well attended.

Agricultural Department.

57. *Agricultural Department.*—Details of the annual exhibitions of cattle, poultry, farm and dairy produce, held by this branch of the Society, which is dependent on its private resources, will be found at page 571.

School of Art.

58. *School of Art.*—An abstract of the returns connected with the School of Art is appended to the report of the Assistant Director for Art at page 397 of the Appendix.

Attendance.

The total number of persons who attended the various departments of the Society during the year was 361,002, showing an increase of 49,902 on the attendance in 1875.

Royal Zoological Society of Ireland.

59. *Royal Zoological Society of Ireland.*—The report of the Council of this society, will be found at page 574. The number of visitors to the gardens during the past year was 98,491, and the receipts from admissions was 1,353*l.* 8*s.* 7*d.* The corresponding numbers in 1875 were 104,945 visitors, and 1,500*l.* 4*s.* 8*d.*, receipts. Some interesting additions have been made to the collection of

animals, and several improvements to the houses and paddocks in the gardens.

60. *Royal Hibernian Academy of Arts.*—The annual exhibition of works was held from February to May, and was attended by a large number of visitors, though somewhat less than the previous year. There was a corresponding decrease in the receipts. The schools were open for the usual winter, spring, and summer sessions, and prizes were awarded to the students at the annual visit of the inspector. The Council reports a satisfactory state of the financial position of the Academy, details of which are given at page 577 of the Appendix. Royal Hibernian Academy.

VIII.—Summary.

61. The numbers of persons who have during the year 1876 attended the Schools and Classes of Science and Art in connexion with the Department, are as follows, viz.:—57,988 attending Science Schools and Classes in 1876, as against 52,669 in 1875 (*see* §§ 1–4 above), and 530,412 receiving instruction in Art, showing an increase upon the previous year of 80,723, or more than 17 per cent. Attendance at Schools and Classes of Science and Art.

62. At the Royal School of Mines there were 31 regular, and 164 occasional, students; at the Royal College of Chemistry, 294 students; at the Metallurgical Laboratory, 75. At the Royal College of Science for Ireland, there were 22 associate or regular students, and 36 occasional students.

63. The lectures delivered in the Lecture Theatre of the South Kensington Museum were attended by 5,739 persons. The evening lectures to working men at the Royal School of Mines were attended by 1,766 persons; and 60 Science teachers attended the special courses of lectures provided for their instruction in the new Science Schools at South Kensington. The lectures in connexion with the Loan Exhibition of Scientific Apparatus were attended by 330 teachers. Lectures.

64. The various courses of lectures delivered in connexion with the Department in Dublin were attended by about 3,251 persons.

65. The total number of persons, therefore, who received direct instruction as students, or by means of lectures, in connexion with the Science and Art Department in 1876, is 600,168, showing an increase as compared with the number in the previous year of 84,744, or about 16 per cent. Number of persons receiving direct instruction.

Appendix A.

MINUTES AND CORRESPONDENCE.

for each night that an examination is held, and of half a guinea for every seventy-five papers worked at the examinations.

Committees of Schools of Art may, if they desire it, hold their own examinations in Art subjects independent of the Special Local Secretary by giving notice on Form No. 119.

XXX. Assistants will also be appointed to help the Special Local Secretary, so that there may be at least two officers to conduct the examination in each room where it is held. Each of these assistants will receive a fee of half a guinea for each night that he is employed at an examination.

The number of assistants required will depend upon circumstances, and will be fixed by *the Special Local Secretary subject to the approval of* the Department.

XXXI. *When the Department has sanctioned, or directed, the nomination of a Special Local Secretary and Assistants, the nomination will rest with the Local Committees, or failing their coming to an agreement, with the Science and Art Department.*

When Local Committees are asked to nominate a Special Local Secretary, a Special Committee of the several Chairmen, or an equal number of representatives, from each Committee should be formed for the purpose. The nomination or recommendation must be sent within one month of its being called for. The appointment of the Special Local Secretary and Assistants rests with the Science and Art Department, and is for the examinations of that year only.

XXXII. *One moiety of the fund for paying the Special Local Secretary and the Assistants on the scale given in §§ XXIX. and XXX. must be contributed by the Locality. When a certificate has been received from the Special Committee, mentioned in the foregoing paragraph, that the moiety has been lodged with them, the other moiety will be paid to them by the Science and Art Department.*

Aid on Instruction in Physiography.

DISCONTINUANCE OF AID ON INSTRUCTION IN PHYSICAL GEOGRAPHY.

At Whitehall the 15*th day of August* 1876.

By the Right Honourable the Lords of the Committee of Her Majesty's Most Honourable Privy Council on Education.

The Lords of the Committee of Council on Education having considered the Science Directory in relation to the aid now given through the Code in England and Scotland, and by the Commissioners of National Education in Ireland, towards instruction in some branches of Science, and in geography, are of opinion that the subject of Physical Geography, as now defined in the Science Directory, is not one towards instruction in which the special aid of the Science and Art Department should be continued.

At the same time my Lords are desirous of not bearing harshly on those students who have already commenced the study of that subject, nor on their teachers. They therefore propose to allow payments for the next two years for those students who have already been under instruction by any Science teacher in Physical Geography, but not for any others, nor for any examination held after May 1878.

The outlines of the syllabus of a subject which will take the place of Physical Geography, are now under consideration. Due notice will be

given when they have been settled. The subject (physiography) will embrace those external relations and conditions of the earth which form the common basis of the Sciences of Nautical Astronomy, Geology, and Biology, as treated in the Science Directory.

MEMORIAL praying for the establishment of a MUSEUM to contain SCIENTIFIC APPARATUS.

MY LORD DUKE. June, 1876.

WE, the undersigned, beg to submit for your Grace's consideration the importance of establishing a Museum of Pure and Applied Science; that is to say, a Museum to contain Scientific Apparatus, Appliances, and Chemical Products, illustrating both the history and the latest developments of Science, where the methods and results of investigations which have marked important stages in the advancement of science may be studied, and where also the most highly perfected instruments of the day may be found.

Among the various advantages which in our opinion would accrue from the establishment of such an Institution, we would mention the following:—Investigators would be saved much time and labour by being enabled to see how far, and by what processes, others have advanced in the line of research which they may be pursuing; thus leading them to a knowledge of the facts and laws already established. From an educational point of view such a collection would assist teachers by enabling them to select, or by showing them how to construct, the best apparatus for illustrating the subjects of their lessons. Great benefit would also accrue to the constructors of Mechanical and Philosophical Apparatus from being able to refer to the original apparatus which they might be required to reproduce or to improve. To every one connected with Experimental Science it would be of great service to see the actual instruments, many of which could otherwise be only known to them by description, and, under proper supervision and instruction, to learn their actual manipulation and performance. We would also contemplate lending to investigators, under suitable restrictions, such instruments as might be profitably employed in the researches they were pursuing.

In considering this subject our attention has naturally been directed to the existing Museum of Patents. While fully recognizing the value of many of the objects now belonging to that Collection, we are of opinion that, as standing alone and purely as subjects of a patent, their value is far less than if they formed part of a general collection, and were placed in juxtaposition with instruments of a similar nature, some of which, though not patented, are better adapted to their purpose, and of greater instructional value. The object of a Scientific Museum is the promotion of knowledge, and the establishment of the scientific principles which must underlie all invention; and it would not only prove of great advantage to both scientific investigators and the public if the two objects could be combined in one undertaking, but we believe that the objects of a Patent Museum would be better served by a museum of the character here proposed than by a special collection, such as has hitherto subsisted. We are decidedly of opinion that the state of knowledge in reference to any invention would be only very imperfectly represented by the exhibition of patented instruments and products only.

In support of the views which we have ventured to submit, we would draw your Grace's attention to the 4th Report of the Royal Commission

Appendix A. — MINUTES AND CORRESPONDENCE.

on Scientific Instruction, §§ 80-94. In § 93 the Commission state :—
" We accordingly recommend the formation of a Collection of Physical
" and Mechanical Instruments; and we submit for consideration
" whether it may not be expedient that this Collection, the Collection
" of the Patent Museum, and of the Scientific and Educational Depart-
" ment of the South Kensington Museum should be united and placed
" under the authority of a Minister of State."

We understand that the Royal Commission for the Exhibition of 1851 has offered to erect a building for the purpose contemplated in this memorial, and we would desire to point out that the purchase of objects need not entail any large outlay of public money. We contemplate the gradual formation of a collection of such objects as might be voluntarily left at the close of the existing Loan Collection, and others which might be contributed from the existing Patent Museum and other public departments, from the Parliamentary grants administered at the request of Government by the Royal Society, and from such private Societies and individuals as might be disposed to avail themselves of the Museum as a depository of Scientific Apparatus, Appliances, and Chemical Products.

We have the honour to be,
My Lord Duke,
Your Grace's obedient Servants,

(Signed) J. D. Hooker, President of the Royal Society.
John Evans, F.R.S., Chairman of the Conferences in the Geographical Section.
E. Frankland, F.R.S., Chairman of the Conferences in the Chemical Section.

CORRESPONDENCE with the ROYAL SOCIETY relating to additional STATE AID for SCIENTIFIC RESEARCH.

Letter to the President of the Royal Society.

Science and Art Department,
South Kensington, S.W., 29th April 1876.

SIR,

HER Majesty's Government have had under their consideration the question of giving some further aid to scientific research. Scientific Research.

As you are aware a sum of 1,000*l.* is voted annually by Parliament "to enable the Royal Society to defray the expenses of scientific "investigations considered by a committee of the Society to be worthy "of such aid." This committee, called the Government Grant Committee, consists of the President and Council of the Royal Society and 21 other gentlemen of scientific eminence not members of the Council; and the grant is expended in aiding investigators to provide themselves with apparatus and assistants, but never in personal payments to the investigators themselves.

It is proposed that this action of the State should be extended, and that further aid should be given to research by according permission to the Government Grant Committee to recommend in certain cases the payment of personal allowances to gentlemen during the time they are engaged in their investigations; that a sum of 5,000*l.*, including the above-mentioned 1,000*l.*, should be taken annually; that the Royal Society should be invited to aid Her Majesty's Government with their advice and assistance in its appropriation and expenditure, and as to the sums to be granted in each case, reporting annually to the Lords of the

Appendix A. — MINUTES AND CORRESPONDENCE.

Committee of Council on Education on the progress made and the desirability or non-desirability of renewing the grant; and that this experiment should be tried for five years.

The administration and expenditure of the grant and accountability for it should, we consider, be vested in the Science and Art Department of the Committee of the Council on Education by which the vote will be taken; and all instruments purchased for investigations should be left in its charge when no longer required.

It would be advisable that the presidents of the following societies should be ex-officio members of the Government Grant Committee, viz.:—

The Royal Society of Edinburgh,
" Royal Irish Academy,
" Royal Astronomical Society,
" Mathematical Society,
" Chemical Society,
" Linnæan Society,

No definite rule can be laid down as to the amounts to be awarded in individual cases. These must depend upon various circumstances, especially on the amount of time which the investigator devotes to the inquiry.

There would be no objection to the application of some portion of this fund to the payment of such clerical assistance as may be found necessary.

I should feel obliged if you will consult the Council of the Royal Society on this scheme and inform me what is their opinion of it, and also give me the benefit of any suggestions as to modifications that may occur to them or to you.

I have the honour to remain,
Sir,
Your obedient servant,
(Signed) RICHMOND AND GORDON.

Letter to the President of the Royal Society.

Science and Art Department,
South Kensington, S.W., 29th May 1876.

SIR,

IN reference to our conversation on Monday last on the subject of the Duke of Richmond and Gordon's letter of the 29th April, I should feel obliged by your informing the Council of the Royal Society that the Lords of the Committee of Council on Education agree with you in thinking that, under the circumstances, it would perhaps be more advisable to leave the grant of 1,000*l.* exactly as at present. The conditions of the Lord President's letter would then apply only to the vote of 4,000*l.* Should the Council of the Royal Society concur in this view, we will communicate with the Treasury on the subject. The recommendations of the Royal Society with respect to the appropriation of the 4,000*l.* must no doubt be liable to revision by the Minister re-

sponsible to Parliament for its due administration, and of this responsibility he cannot divest himself. But the power is one, we believe, for the exercise of which there is never likely to be occasion. Should it, however, happen that the Committee of Council on Education found it inadvisable to act on all of the recommendations of the Royal Society, the best course would probably be, to give the Council an opportunity of revising them; so that if thought desirable, the items of the grant, to which exception had been taken, might be allocated in some other way. If the Royal Society are still desirous that the grant should be accepted or rejected as a whole, the Lords of the Committee of Council on Education will of course undertake that this shall be done. But they believe on consideration that the Council will agree that such a course would be likely to have a mischievous effect, and entail great hardship on those recipients of grants, who, from the success that had attended their investigations, might naturally have expected the continuance of their grants.

As respects the reports of progress, my Lords believe that the Council of the Royal Society will see that Parliament will naturally desire to have laid before them such a report from those capable of giving an opinion, as will enable them to judge of the nature and amount of work being done, and the desirability, or otherwise, of continuing the grants. It is not asked that the report should be in any great detail; as a rule it would be sufficient if it were of a general character, unless some of the subjects should from their special nature seem to require more precise information. The Lords of the Committee of Council on Education are fully aware of the great difficulties which surround the question of the direct encouragement of research and of the labour and responsibility that must necessarily be entailed on those who undertake to organise the experiment in this country. They therefore are glad to find that they may reckon on the cordial co-operation of the Royal Society, to whom they naturally first appealed to aid them in this matter.

I have the honour to be,
Sir,
Your obedient servant,
(Signed) SANDON.

J. D. Hooker, Esq., C.B., M.D.,
&c., &c., &c.,
President of the Royal Society.

The Royal Society, Burlington House, W.,
2nd June 1876.

MY LORD,

WITH reference to your Lordship's letter to the President of the Royal Society dated 29th May, I am to inform you that the President and Council of the Royal Society concur in the proposal therein contained, namely that, while the grant of 1000*l.* should remain exactly as at present, a vote of 4,000*l.* should be taken on the conditions expressed in the Lord President's letter; and that in case it should happen that there were any of the recommendations of the Royal Society, upon which the Committee of Council on Education should find it inadvisable to act, the Council of the Royal Society should have an opportunity of revising them, so that, if thought desirable, the items of the grant to which exception had been taken, might be allocated in some other way.

I have the honour to be,
My Lord,
Your obedient servant,
(Signed) G. G. STOKES,
Secretary, R.S.

The Lord Sandon,
&c., &c.

Appendix A.

MINUTES AND CORRESPONDENCE.

2. MUSEUM.

LOAN COLLECTION OF SCIENTIFIC APPARATUS.

The following Memorandum on the Loan Collection of Scientific Apparatus was prepared by Order of the Lords of the Committee of Council on Education, and appeared as the Introduction to the Handbook to the Collection.

By Minute, dated 22nd January 1875, the Lords of the Committee of Council on Education approved of a proposal to form a Loan Collection of Scientific Apparatus, which was to include not only apparatus for teaching and for investigation, but also such as possessed historic interest on account of the persons by whom, or the researches in which, it had been employed. Their Lordships then invited some of the leading men of science of the country—the Presidents of the learned Societies and others—to act on a Committee to consider the matter, and aid them with their advice. This Committee to whose exertions the formation of the Collection is so largely due, consisted of—

The Right Hon. the Lord Chancellor.
Professor F. A. Abel, F.R.S., President of the Chemical Society.
The Right Hon. Lord Aberdare, President of the Horticultural Society.
Capt. W. De W. Abney, R.E.
Professor H. W. Acland, M.D., F.R.S., President of the Medical Council of the United Kingdom.
Professor J.C. Adams, M.A., F.R.S.
Professor W. G. Adams, M.A., F.R.S.
Sir G. B. Airy, K.C.B., D.C.L., F.R.S., the Astronomer Royal.
Dr. G. J. Allman, F.R.S., President of the Linnæan Society.
Mr. J. Anderson, LL.D., C.E.
Mr. D. T. Ansted, M.A., F.R.S.
Professor E. Atkinson, Ph. D.
Professor R. Stawell Ball, LL.D., F.R.S.
Professor W. F. Barrett.
Rev. A. Barry, D.D.
Mr. W. B. Baskcomb.
Mr. H. Bauerman.
Mr. G. Bentham, F.R.S.
Mr. Hugh Birley, M.P.
Professor Bloxam.
Major Bolton.
Professor F. A. Bradley.
Mr. F. J. Bramwell, F.R.S.
Mr. T. Brassey, M.P.
Mr. H. W. Bristow, F.R.S.
Mr. C. Brooke, M.A., F.R.S.
Mr. G. Busk, F.R.S.
Major-General Cameron, C.B., F.R.S.
Dr. W. B. Carpenter, C.B., F.R.S.
Mr. C. O. F. Cator.
Mr. W. Chappell.
Mr. H. W. Chisholm, Warden of the Standards.
Lord Alfred Churchill, Chairman of Council of Society of Arts.
Mr. G. T. Clark.
Mr. Latimer Clark.
Professor R. Bellamy Clifton, M.A., F.R.S.
Sir Henry Cole, K.C.B.
Vice-Admiral Sir R. Collinson, K.C.B., Deputy Master of the Trinity House.
Dr. Debus, F.R.S.
Mr. Warren De La Rue, D.C.L., F.R.S.
Mr. G. Dixon, M.P.
Professor P. M. Duncan, M.B., F.R.S., President of the Geological Society.
Professor W. T. Thiselton Dyer, M. A., B. Sc.
Major-General F. Eardley-Wilmot, R.A., F.R.S.
Mr. H. S. Eaton, President of the Meteorological Society.
Sir P. De M. G. Egerton, Bart., M.P., F.R.S.
Mr. R. Etheridge, F.R.S.
Captain Evans, R.N., C.B., F.R.S., Hydrographer of the Navy.
Mr. J. Evans, F.R.S.
Professor W. H. Flower, F.R.S.
Mr. D. Forbes, F.R.S.
Professor G. Carey Foster, B.A., F.R.S., President of the Physical Society.
Professor Michael Foster, M.D., F.R.S.
Colonel Lane Fox, President of the Anthropological Institute.
Professor Frankland, Ph. D., D.C.L., F.R.S.
Mr. A. H. Garrod, M.A.
Dr. Gilbert, F.R.S.
Dr. J. H. Gladstone, F.R.S.

Mr. D. Glasgow.
Professor Goodeve, M.A.
Mr. A. C. L. G. Günther, M.A., M.D., F.R.S.
Professor Guthrie, Ph. D., F.R.S.
Mr. J. Baillie-Hamilton.
The Right Hon. Lord Hampton, G.C.B., F.R.S., President of the Institute of Naval Architects.
Mr. T. E. Harrison, President of the Institution of Civil Engineers.
Sir J. Hawkshaw, F.R.S.
Mr. T. Hawksley, President of the Institute of Mechanical Engineers.
The Hon. Alan Herbert.
Mr. J. Hick, M.P.
Dr. J. D. Hooker, C.B., President of the Royal Society.
Mr. J. Hopkinson, B.A., D. Sc.
Mr. W. Huggins, D.C.L., F.R.S., President of the Royal Astronomical Society.
Professor W. Hughes.
Professor T. H. Huxley, LL.D., Sec. R.S.
Lieut.-General Sir H. James, R.E., F.R.S.
Rev. J. H. Jellett, B.D.
Professor E. Ray Lankester, M.A., F.R.S.
Lord Lindsay, M.P.
Mr. J. Norman Lockyer, F.R.S.
Rev. R. Main, M.A., F.R.S.
Dr. R. J. Mann.
Mr. N. Story-Maskelyne, M.A., F.R.S.
Professor J. Clerk Maxwell, M.A., F.R.S.
Mr. C. W. Merrifield, F.R.S.
Professor Miller, M.A., LL.D., F.R.S.
Professor Morris.
Mr. A. J. Mundella, M.P.
Professor Odling, M.A., F.R.S.
Mr. W. K. Parker, F.R.S.
Dr. Percy, F.R.S.
Mr. J. A. Phillips.
The Right Hon. Lyon Playfair, C.B., M.P., F.R.S.
Dr. Pole, F.R.S.
Professor Prestwich, F.R.S.
Professor A. C. Ramsay, LL.D., F.R.S.
Major-General Sir H. C. Rawlinson, K.C.B., F.R.S., President of the Royal Geographical Society.
The Right Hon. Lord Rayleigh, F.R.S.
Professor A. W. Reinold, M.A.
Professor Roscoe, Ph. D., F.R.S.
The Right Hon. the Earl of Rosse, D.C.L., F.R.S.
Mr. G. W. Royston-Pigott, M.A., M.D., F.R.S.
Mr. J. Scott Russell, F.R.S.
Dr. W. J. Russell, F.R.S.
Professor W. Rutherford, M.D.
Mr. B. Samuelson, M.P.
Professor J. S. Burdon Sanderson MD., F.R.S.
Mr. T. Savage, M.A.
Mr. R. H. Scott, M.A., F.R.S.
Major Seddon, R.E.
Professor Shelley.
Sir J. P. Kay-Shuttleworth, Bart.
Mr. C. W. Siemens, D.C.L., F.R.S.
Professor H. J. S. Smith, M.A., F.R.S.
Mr. W. Warington Smyth, M.A., F.R.S.
Mr. H. C. Sorby, F.R.S., President of the Royal Microscopical Society.
Mr. W. Spottiswoode, M.A., Treasurer Royal Society.
Mr. G. R. Stephenson.
Professor Balfour Stewart, LL.D., F.R.S.
Dr. W. H. Stone.
Major-General Strachey, C.S.I., F.R.S.
Lieut.-Col. Strange, F.R.S.
Professor P. G. Tait, M.A.
Mr. J. Torr, M.P.
Rev. J. F. Twisden, M.A.
Professor Tyndall, LL.D., F.R.S.
Professor W. C. Unwin, B. Sc.
Mr. C. V. Walker, F.R.S., President of Society of Telegraphic Engineers.
Mr. F. H. Wenham.
Sir C. Wheatstone, F.R.S. (since deceased).
Sir J. Whitworth, Bart., F.R.S.
Professor Williamson, Ph. D., F.R.S.
Mr. Bennet Woodcroft, F.R.S.
Dr. J. Woolley.
Colonel H. Stuart Wortley.

The first meeting of this Committee was held on the 13th February 1875; the number of those who were present showing the interest already felt in the subject. The Lord President of the Council, the Duke of Richmond, and the Vice-President, Viscount Sandon, in explaining the objects of the Collection, took occasion to refer to the recommendations of the Royal Commission on Scientific Instruction, with regard to the creation of a Science Museum.

Their Lordships stated their conviction that the development of the Educational, and certain other Departments of the South Kensington

Appendix A.

MINUTES AND CORRESPONDENCE.

Museum, and their enlargement into a Museum somewhat of the nature of the *Conservatoire des Arts et Metiers* in Paris, and other similar institutions on the Continent, would tend to the advancement of science, and be of great service to the industrial progress of this country. While expressing their hope that the Loan Collection might forward this desirable object, their Lordships guarded themselves against committing Her Majesty's Government, which had not yet fully considered the subject, to any definite scheme.

On the motion of the President of the Royal Society, Dr. Hooker, it was unanimously resolved by the meeting that an exhibition such as that proposed would be most instructive and valuable.

The question of the limits of the Collection was discussed, and Sub-committees were appointed to consider the limitations it might be desirable to place on the term "scientific apparatus" in the respective sections, while bearing in mind the space disposable for the exhibition in the Museum. As a provisional arrangement five Sub-committees of sections were appointed, to whom it was left to suggest such modifications in classification as might be found advisable.

The Sections were—

1. Mechanics (including pure and applied mathematics).
2. Physics.
3. Chemistry (including metallurgy).
4. Geology, Mineralogy, and Geography.
5. Biology.

The Committees for the several sections are given at page 21. The question of classification, having been carefully considered at numerous meetings of these Sub-committees, was brought before the General Committee on the 12th May, and the several schemes were referred to a special Sub-committee, formed of three members from each sectional Sub-committee. It was also decided to postpone the Exhibition, which it was originally intended to open in June 1875, to March 1876. The large number of objects sent from abroad, and the late period of their arrival, have necessitated a further postponement of the opening to May 1876.

The Sub-committee appointed to revise and report on the classification of the Collection after three meetings, under the chairmanship of the President of the Royal Society, submitted a scheme of classification to the General Committee on June 22nd. After having been carefully considered, it was, with some slight alterations, approved, and is given at page 17. This programme was immediately issued, and the classification into sections is that adopted for the catalogue and exhibition, though the nature of the galleries has necessitated some alteration in the order of the sections.

It had been the intention from the first to give the Loan Collection an International character, so as to afford men of science and those interested in education an opportunity of seeing what was being done by other countries than their own in the production of apparatus, both for research and for instruction—an opportunity which it was hoped would be of advantage also to the makers of instruments. As soon therefore as the programme had been definitely settled, steps were taken to interest foreign countries in the Exhibition; and it was determined to obtain the co-operation of men of science on the Continent, who, while acting as members of the General Committee, should form special Sub-committees charged with the due representation of the science of their respective countries.

It was necessary to take special precautions to prevent misunderstanding as to the character of the Collection. The mention of internationality at once suggested the idea of an International Exhibition similar in its

character and arrangements to the numerous Industrial Exhibitions which have been held in various countries. A wrong impression of this kind would have entailed serious inconvenience.

In International Exhibitions a certain amount of space is allotted to each country. These spaces are then divided by the Commissioners of each country among its exhibitors, who display their objects—subject to certain general rules of classification—as they consider most advantageous, retaining the custody of their own property. The expenses of transport, arrangement, etc., are borne by the countries who exhibit. And the Exhibitions appeal naturally, more or less exclusively, to the industrial or trade producing interests of those countries.

This was not the idea of the proposed Loan Collection at South Kensington. For that Collection it was desired to obtain not only apparatus and objects from manufacturers, but also objects of historic interest from museums and private cabinets where they are treasured as sacred relics, as well as apparatus in present use in the Laboratories of Professors. The transport of all objects was undertaken by the English Government, and they were to be handed over absolutely to the custody of the Science and Art Department for exhibition; the arrangement being not by countries but strictly according to the general classification.

So soon as the object and scope of the Collection were thoroughly understood, the Committee of Council on Education met with the most gratifying responses to their invitations, which were communicated officially through the Foreign Office. [See page 23.] Her Majesty's Ministers at Paris, Berlin, St. Petersburgh, Vienna, Florence, Brussels, the Hague, Stockholm, Madrid, Berne, and Washington, have personally interested themselves in the matter; and the Foreign Governments have afforded every facility and encouragement in forwarding this strictly international undertaking. The subjoined list of the foreign members of the General Committee speaks for itself, by the eminence and European reputation of its members.

Appendix A.

MINUTES AND CORRESPONDENCE.

AUSTRIA AND HUNGARY.

The Minister of Public Instruction has appointed Sectionschef Fidler to organize the Contributions from these countries.

SPAIN.

No Committee has been formed, but the Government has promised to contribute, and Señor Riano has been specially appointed to make the necessary arrangememts.

UNITED STATES.

The Government has, through Mr. Fish, replied that it is in communication with the various Departments and Scientific Institutions with the object of forwarding the Exhibition.

When men of this position in all branches of Science have given their adhesion to the programme of such an exhibition, its success might well be considered as secured. But these gentlemen did not rest satisfied with merely giving their names in recognition of its value: they have spared no time and labour in making the undertaking a real success. And the Lords of the Committee of Council on Education feel assured that, in offering them their thanks for their invaluable services, they convey not only their own sentiments but the grateful recognition of their labours by the country at large.

It will be readily understood from what has been said of the nature, scope, and method of the exhibition, that a large staff was required, in addition to the permanent staff of the Museum, to organise and arrange the collection in the limited time which could be afforded for that purpose. Special arrangements had, therefore, to be made; and their Lordships have great satisfaction in recording the names of those gentlemen who have rendered very valuable services,—many of them as volunteers—greatly aiding the staff of the Museum in their laborious duties. These were Captain Abney. R.E.; Dr. Atkinson; Mr. Bartlett; Dr. Brunton; Dr. Biedermann; Professor Crum-Brown; Captain Fellowes, R.E.; Professor Carey-Foster; Dr. Michael Foster; Herr Kirchner; Professor Goodeve; Dr. Guthrie; Commander T. A. Hull, R.N.; Mr. Iselin; Mr. Judd; Mr. Norman Lockyer; Dr. R. J. Mann; Mr. Clements Markham; Professor H. Mc Leod; Professor Roscoe; Professor Shelley; Dr. Burdon Sanderson; Dr. Schuster; Dr. Voit; and Mr. R. Wylde.

To those men of Science who, in this matter and in the work of the general Committee and Sub-committees, have given much valuable time, and have afforded them the benefit of their great knowledge and experience, the Lords of the Committee of Council on Education feel their best thanks are due and they trust that the immediate success and future results of the Exhibition, which owes so much to them, will reward them for the labours which they have ungrudgingly devoted to it.

In order to make the Exhibition as useful and interesting as posible, a handbook containing introductory notices to the several sections has been prepared. For writing these notices the Lords of the Committee of Council on Education have been fortunate in securing the services of gentlemen the mention of whose names will be a sufficient indication of the character of the work. These gentlemen are

Captain W. De W. Abney, R.E.
Professor W. Kingdon Clifford, M.A., F.R.S.
Captain J. E. Davis.
Professor G. Carey Foster, B.A., F.R.S.
Professor Geikie, F.R.S.
Professor Goodeve, M.A.
Professor Guthrie, F.R.S.
Professor T. H. Huxley, LL.D., Sec. R.S.
Mr. J. Norman Lockyer, F.R.S.

KINEMATICS, STATICS, AND DYNAMICS.

Elementary Illustrations.—Position and displacement of a point, a rigid body or a material system.—Composition and resolution of displacememts.—Velocity and acceleration, their composition and resolution.—Displacements of a connected system.—Principles of mechanism.—Rolling contact, sliding contact, belting, link connections, shafting, universal joints, &c.—Transmission of work.—Relation between the displacement of two pieces of a machine and the forces which they transmit.—The mechanical powers.—Instruments for illustrating the laws of motion, such as pendulums, gyroscopes, dynamical tops.

Laws of fluid pressure; stability of floating bodies.

Discharge of fluids through orifices, and their motion in channels.

Hydraulic and pneumatic transmission of power.

MOLECULAR PHYSICS.

Instruments and apparatus employed in teaching, and in the investigations and observations connected with:—

Pressure on Matter.—Tension, compression (piezometer), torsion, flexion; relation of volume to pressure; elasticity of liquids and gases.—Hardness (of solids and liquids), toughness, brittleness, malleability, &c.

Communication of pressure through Fluids.—Pressure of air, its consequences and applications.—Barometers, air pumps, siphons, suction-pumps, spirators, &c.; Pressure of water, its consequences and applications.—Levels, side pressure, &c.

Density.—Methods of measuring densities of gases, vapours, liquids, solids.

Adhesion and Cohesion.—Condensation of gases in solids, solution of gases in liquids, mixing of gases with gases (diffusion, transpiration, &c.), absorbtion of liquids by solids (capillarity, &c.), absorption of liquids by gases (evaporation, &c.), mixing of liquids with liquids (osmose, diffusion dialysis). Evaporation of solids, solution of solids, mixture of solids with solids (cementation, &c.).

SOUND.

Instruments and apparatus employed in teaching, and in the investigations and observations connected with:—

Geometrical, Mechanical, and Optical Methods of Illustrating the Laws of Wave-motion.—Progressive waves, composition of vibrations, interference, stationary waves.

Generation of Sound.—Fog-horn, &c.

Conduction of Sound.—Through solids, liquids, and gases, stethoscopes.

Velocity of Sound.

Detection of Sound.—Sensitive flame, &c.

Reflection and Refraction.—Ear trumpets, acoustic lenses, &c.

Dispersion and Absorption.

Musical Sounds.—Pitch, standards of pitch, standard tuning forks, &c.; methods of measuring and comparing rates of vibration; toothed wheels, syrens, &c.; vibration microscopes, &c.; methods of illustrating the nature of musical intervals; manometric flames, mirrored tunings forks, &c.

Musical Quality.—Illustrations of the different quality of the sounds of various instruments, harmonics, and overtones, resultant tones, instruments for studying quality, resonators, phonautographs, &c.

Musical Instruments Illustrating the above.—Methods of exhibiting the mode of vibration of various instruments and the quality of the sounds yielded by them.

LIGHT.

Instruments and apparatus employed in teaching, and in the investigations and observations connected with:—

Production.—Combustion, electric discharge, &c.

Measurement of intensity, velocity.

Action of Matter on Light.—Reflection, refraction, dispersion, achromatism, direct vision prisms, polarization, absorption (colour), fluorescence, &c.

Action of Light on Light.—Interference, diffraction, measurement of wave length (optical banks), &c.

Action of Light on Matter.—Photography, radiometry, phosphorescence, &c.

Technical Applications of Optical Principles.—Lighthouse.—Illumination &c.

HEAT.

Instruments and apparatus employed in teaching, and in the investigations and observations connected with :—

Sources of Heat.—Chemical, electrical, dynamical, solar, calorescence, &c.

Effects of Heat on Matter.—Changes of temperature, expansion and change of elasticity, liquefaction, vaporization, &c.

Measurement of Temperature.—Thermometers, pyrometers, &c.

Propagation of Heat.—Radiant heat,—radiometer, reflection, refraction, radiation, absorption, polarization; conduction,—solids, liquids, gases; convection,—ventilation, &c.

Effect of Change of Molecular State on Temperature.—Freezing mixtures, ice machines, &c.

Effect of Change of Pressure and Volume.

Heat Quantity.—Unit of heat, calorimeters, specific heat, &c.—Methods of determining latent heat.

Mechanical Equivalent of Heat.—Methods of determining.—Illustrations of thermodynamics.

Electrical Equivalent of Heat.—Methods of determining.

Analysis of Solar Radiation.

MAGNETISM.

Instruments and apparatus employed in teaching, and in the investigations and observations connected with :—

Natural Magnets.

Permanent Artificial Magnets.

Electro Magnets.

Methods of Magnetization.—Effects of Magnetization. Conditions affecting intensity of Magnetization :—Temperature (chemical), composition, strains, &c.

Magnetic Induction of all Substances.—Diamagnetism.

Measurement of intensity of magnetization, magnetic moment.

Terrestrial Magnetism.—Instruments for observation and automatic registration of the magnetic elements.

ELECTRICITY.

Instruments and apparatus employed in teaching, and in the investigations and observations connected with :—

Production and Maintenance of Difference of Potential.—Electrical machines acting by friction, induction (doublers, replenishers, &c. Holz's and Toppler's machines, &c.); galvanic batteries; thermo-electric piles; magneto-electric machines—Other sources, such as pyro-electricity, pressure electricity cleavage, capillarity, osmose, &c.

Detection and Measurement of Difference of Potential.—Electroscopes, electrometers, standards of electro-motive force, methods of comparison.

Accumulation of Electricity.—Insulators, condensers, accumulators, effects due to accumulated electricity, distribution on conductors, polarisation of dielectrics, &c.

Measurement and Electric Quantity.—Torsion balances, standard accumulators, methods of comparing electric capacities and dielectric coefficients.

Detection of Measurement of Electric Currents.—Galvanoscopes, galvanometers, voltameters, electro-dynamometers, &c.

Resistance.—Standards of resistance, methods of comparing resistances, methods of establishing absolute standards (British Association unit appar.).

Effects of Electric Currents.—Production of light, heat, electrolysis, electro-diffusion.—Action on magnets, soft iron (electro magnets), action of currents on currents.

Technical Application of Electricity.—Electric telegraph, &c.

ASTRONOMY.

Star maps, catalogues, globes, orreries, &c.
Meridian instruments.
Arrangements for communicating true time.
Altazimuths, zenith-sectors, sextants, &c.
Equatoreal telescopes { reflectors. refractors.
Micrometers.
Driving clocks.
Special arrangements for—
Celestial photography.
Spectroscopic observations.
Thermo-electric observations.
Siderostats.

APPLIED MECHANICS.

As the Exhibition must be regarded as chiefly referring to education, research, and other scientific purposes, it must in this division consist principally of models, diagrams, mechanical drawings, and small machines, illustrative of the principles and progress of mechanical science, and of the application of mechanics to the arts.

Properties of Materials.
Structures at rest and in motion.
Prime movers.
Reservoirs of energy.
Regulators.
The application of the principles of mechanics to machinery as used in the arts.
Shipping, naval architecture, and marine engineering.

CHEMISTRY.

Scientific instruments, apparatus, and materials employed in the investigation and teaching of chemical science, and in the application of its principles to scientific purposes.

Diagrams and models.
Illustrations of analytical results.
Specimens of chemicals,—(*a*) organic, (*b*) mineral.
Apparatus and fittings for laboratory and lectures.
Apparatus for gravimetric and volumetric operations.
Apparatus for distillation and filtration.
Apparatus for operations by the dry or hot method, such as furnace, blowpipe, &c.
Refrigeratory apparatus.
Apparatus for spectrum analysis.

NOTE.—Operations of the following nature may be illustrated, viz. :—

Organic analysis.
Mineral analysis.
Electrolysis.
Water analysis.
Gas analysis.
Spectrum analysis.
Methods of investigation connected with vegitation and respiration.

METEOROLOGY.

Thermometers and barometers, of special construction.
Anemometers, rain gauges, hydrometers, &c.
Self-recording meteorological apparatus.
Illustrations of various systems of storm signals.
Weather maps.
Instruments illustrating the phenomena of atmospheric electricity.
Instrument stands.

GEOGRAPHY.

Instruments used in surveying.

Instruments used in geodesy and hydrography, including hypsometrical instruments, tide gauges, &c.

Projections, maps, charts, models, and globes.
Deep-sea sounding apparatus.—Seismographical instruments.

GEOLOGY AND MINING.

Instruments for field and underground surveying.
Typical collection of rock specimens, including vein stones.
Typical fossils arranged stratigraphically.
Maps in different stages, and finished maps.
Geological models, horizontal and vertical sections.
Diagrams and plates of fossils, and general geological diagrams used in lecture rooms.
Microscopic sections of rocks and minerals, and apparatus for cutting such sections.
Anemometers, water gauges, mining barometers, and thermometers.
Mining plans, sections and models of workings.

MINERALOGY, CRYSTALLOGRAPHY, ETC.

Goniometers.
Apparatus for studying and exhibiting the optical characters of crystals.
Sections for optical examination.
Blowpipe and other portable apparatus for determining minerals.
Collections of crystals, models of crystals, plates of crystals, and apparatus for drawing them.
Educational collections of minerals, &c.
Diagrams and models for lecture rooms.

BIOLOGY.

1. Microscopes with accessory apparatus for biological research, &c.
2. Physiological apparatus for investigating—
   a. The growth and mechanical movements of living organisms and their part.
   b. The chemical phenomena of living organisms.
   c. The electrical phenomena of living organisms.
   d. The functions of the nervous and other systems.
3. Apparatus for anatomical research.
4. Apparatus for collecting and preserving objects of natural history.
5. Appliances for teaching biology.

A limited number of examples illustrating the performances of the apparatus will be admissible.

SUB-COMMITTEES OF SECTIONS.

SECTION I.—MECHANICS, INCLUDING PURE AND APPLIED MATHEMATICS AND MECHANICAL DRAWING.

Professor J. C. Adams, M.A., F.R.S.
Mr. J. Anderson, LL.D., C.E.
Professor R. Stawell Ball, LL.D., F.R.S.
Rev. A. Barry, D.D.
Mr. W. B. Baskcomb.
Mr. Hugh Birley, M.P.
Major Bolton.
Professor F. A. Bradley.
Mr. F. J. Bramwell, F.R.S.
Mr. T. Brassey, M.P.
Mr. H. W. Chisholm, Warden of the Standards.
Mr. G. T. Clark.
Mr. Latimer Clark.
Professor R. B. Clifton, M.A., F.R.S.
Sir Henry Cole, K.C.B.
Mr. G. Dixon, M.P.
Major-General F. Eardley-Wilmot, R.A., F.R.S.
Mr. D. Glasgow.
Professor T. M. Goodeve, M.A.
The Right Hon. Lord Hampton, G.C.B., F.R.S., President of the Institute, of Naval Architects.
Mr. T. E. Harrison, President of the Institute of Civil Engineers.
Sir J. Hawkshaw, F.R.S.
Mr. T. Hawksley, President of the Institute of Mechanical Engineers.

Appendix A. — Minutes and Correspondence.

Mr. J. Hick, M.P.
Professor J. C. Maxwell, M.A., F.R.S.
Mr. C. W. Merrifield, F.R.S.
Mr. A. J. Mundella, M.P.
Dr Pole, F.R.S.
The Right Hon. Lord Rayleigh, F.R.S.
Mr. J. Scott Russell, F.R.S.
Major Seddon, R.E.
Professor Shelley.
Mr. C. W. Siemens, D.C.L., F.R.S.
Professor H. J. S. Smith, M.A., F.R.S.
Mr. G. R, Stephenson.
Professor P. G. Tait, M.A.
Mr. J. Torr, M.P.
Rev. J. F. Twisden, M.A.
Professor W. C. Unwin, B. Sc.
Sir C. Wheatstone, F.R.S. (since deceased).
Sir J. Whitworth, Bart., F.R.S.
Mr. Bennet Woodcroft, F.R.S.
Dr J. Woolley.
Colonel H. Stuart Wortley.

Section II.—Physics.

Capt. W. De W. Abney. R.E.
Professor W. G. Adams, M.A., F.R.S.
Sir. G. B. Airy, K.C.B., D.C.L., F.R.S., Astronomer Royal.
Professor E. Atkinson, Ph. D.
Professor R. Stawell Ball, LL.D., F.R.S.
Professor W. F. Barrett.
Mr. C. O. F. Cator.
Mr. W. Chappell.
Professor R. B. Clifton, M.A., F.R.S.
Vice-Admiral Sir R. Collinson, K.C.B., Deputy Master of the Trinity House.
Dr. Debus, F.R.S.
Mr. Warren De La Rue, D.C.L., F.R.S.
Mr. H. S. Eaton, President of the Meteorological Society.
Professor G. Carey Foster, B.A., F.R.S., President of the Physical Society.
Dr. J. H. Gladstone, F.R.S.
Professor Guthrie, Ph. D., F.R.S.
Mr. J. Baillie-Hamilton.
Mr. J. Hopkinson, B.A., D. Sc.
Mr. W. Huggins, D.C.L., F.R.S., President of the Royal Astronomical Society.
Lord Lindsay, M.P.
Mr. J. Norman Lockyer, F.R.S.
Reverend R. Main, M.A., F.R.S.
Dr. R. J. Mann.
Mr. C. W. Merrifield, F.R.S.
Dr. Pole, F.R.S.
The Right Hon. Lord Rayleigh, F.R.S.
Professor A. W. Reinold, M.A.
Earl of Rosse, D.C.L., F.R.S.
Mr. R. H. Scott, M.A., F.R.S.
Mr. W. Spottiswoode, M.A., F.R.S.
Dr. W. H. Stone.
Lieut-Colonel Strange, F.R.S.
Professor P. G. Tait, M.A.
Professor Tyndall, LL.D., F.R.S.
Mr. C. V. Walker, F.R.S., President of Society of Telegraphic Engineers.
Sir C. Wheatstone, F.R.S. (since deceased).
Dr. Woolley.

Section III.—Chemistry.

Professor F. A. Abel, F.R.S., Chemist to the War Department.
Professor Bloxam.
Sir Henry Cole, K.C.B.
Mr. Warren De la Rue, D.C.L., F.R.S.
Professor Frankland, Ph. D., D.C.L., F.R.S.
Dr. Gilbert, F.R.S.
Dr. J. H. Gladstone, F.R.S.
Professor Odling, M.A. F.R.S., President of the Chemical Society.
Dr. Percy, F.R.S.

The Right Hon. Lyon Playfair, Ph. D., C.B., M.P., F.R.S.
Professor Roscoe, Ph. D., F.R.S.
Dr. W. J. Russell, F.R.S.
Professor Williamson, Ph. D., F.R.S.

Section IV.—Physical Geography, Geology, and Mineralogy.

Mr. D. T. Ansted, M.A., F.R.S.
Mr. H. Bauerman.
Professor F. A. Bradley.
Mr. H. W. Bristow, F.R.S.
Major-General Cameron C.B., F.R.S.
Vice-Admiral Sir R. Collinson, K.C.B., Deputy Master of the Trinity House.
Professor P. M. Duncan, M.B., F.R.S., President of the Geological Society.
Sir P. De M. G. Egerton, Bart., M.P., F.R.S.
Mr. R. Etheridge, F.R.S.
Captain Evans, R.N., C.B., F.R.S., Hydrographer of the Navy.

Mr. J. Evans, F.R.S.
Mr. D. Forbes, F.R.S.
Professor Hughes.
Lieut-General Sir H. James, R.E., F.R.S.
Mr. N. Story-Maskelyne, M.A., F.R.S.
Mr. C. W. Merrifield, F.R.S.
Professor Miller, M.A., LL.D., F.R.S.
Professor Morris.
Professor Prestwich, F.R.S.
Professor A. C. Ramsay, LL.D., F.R.S.
Major-General Sir H. C. Rawlinson, K.C.B., F.R.S., President of the Royal Geographical Society.
Mr. W. Warington Smyth, M.A., F.R.S.
Mr. H. C. Sorby, F.R.S., President of the Royal Microscopical Sociey.
Major-General R. Strachey, C.S.I., F.R.S.

SECTION B.—BIOLOGY.

The Right Hon. Lord Aberdare, President of the Royal Horticultural Society.
Professor H. W. Acland, M.D., F.R.S., President of the Medical Council of the United Kingdom.
Dr. G. J. Allman, F.R.S., President of the Linnæan Society.
Mr. G. Bentham, F.R.S.
Mr. C. Brooke, M.A., F.R.S.
Mr. G. Busk, F.R.S.
Dr. W. B. Carpenter, C.B., F.R.S,
Professor W. T. Thiselton Dyer, M.A., B. Sc.
Professor Flower, F.R.S.
Professor Michael Foster, M.D., F.R.S.
Colonel Lane Fox President of the Anthropological Institute.
Mr. A. H. Garrod, M.A.
Mr. A. C. L. G. Günther, M.A., M.D., F.R.S.
The Hon. Alan Herbert.
Dr. J. D. Hooker, C.B., President of the Royal Society.
Professor T. H. Huxley, LL.D., F.R.S.
Professor E. Ray Lankester, M.A., F.R.S.
Mr. W. K. Parker, F.R.S.
Mr. G. W. Royston-Pigott, M.A., M.D., F.R.S.
Professor W. Rutherford, M.D.
Professor J. S. Burdon Sanderson, M.D., F.R.S.
Mr. H. C. Sorby, F.R.S., President of the Royal Microscopical Society.
Mr. F. H. Wenham.

FOREIGN CORRESPONDENCE.

Science and Art Department,
South Kensington, S.W.
9th August 1875.

Science and Art Department to Foreign Office.

MY LORD,

I AM directed by the Lords of the Committee of Council on Education to forward to you copies of the accompanying paper on the subject of a Loan Exhibition of English and Foreign Scientific Apparatus which my Lords propose to hold at the South Kensington Museum, and which will open on the 1st of April 1876.

My Lords have instructed Mr. Norman Lockyer, F.R.S., corresponding member of the Institute of France, &c. to visit the various Foreign capitals and centres of scientific activity with a view of awakening an interest in the Exhibition and obtaining objects for it.

I am therefore directed to request that you will move the Secretary of State for Foreign Affairs to be so good as to cause Her Majesty's Ambassadors and Ministers at the courts of France, Germany, Austria, Italy, Holland, Belgium, and Switzerland, to be informed of Mr. Lockyer's intended visit; and to request them to afford him any assistance in their power, especially by placing him in communication with the Departments of the various Governments which it may be advisable for him to approach.

I have the honour to be, &c.

The Under Secretary of State for Foreign Affairs. (Signed) NORMAN MACLEOD.

Appendix A.

MINUTES AND CORRESPONDENCE.

Austria.

AUSTRIA.

MY LORD, Vienna, 27th March 1876.

WITH reference to your Lordship's despatch, No. 64, of the 9th November last of this series, I have the honour to transmit herewith a translation by Mr. Milbanke, of a note which has been addressed to me by the Minister for Foreign Affairs, informing me that he has been in communication with the Imperial and Royal Ministers of Public Worship and Education, and announcing that almost all the countries of the Austro-Hungarian Empire have expressed their intention of being represented at the Special Loan Exhibition of Scientific Apparatus to be held at the South Kensington Museum in the month of April. An officer of the Department of Education is already in communication with the Commissioners of the Exhibition.

I have the honour to be, &c.

The Earl of Derby, (Signed) ANDREW BUCHANAN.
&c., &c., &c.

Enclosure (Translation).

IN compliance with the wish expressed by Sir Andrew Buchanan in his note of the 10th January, the undersigned has the honour to inform His Excellency that he begged the Minister for Public Worship and Education in Vienna and Buda-Pesth to report to him whether, and to what extent, the Industrial Institutions of Austria-Hungary would be able to take part in the Special Loan Exhibition of Scientific Apparatus which it was proposed to open at the South Kensington Museum on the 1st April 1876.

Having now received replies from the two Ministers, the undersigned has the honour to inform His Excellency that the Imperial and Royal Minister for Public Worship had brought the subject to the notice of the Scientific Institutions, and that one of the chief officials of his office is already in communication with the directors of the Exhibition for the purpose of carrying out the required object. According to a communication from the Royal Hungarian Minister for Public Worship, it appears that only two collectors have announced their intention of taking part in the Loan Exhibition of Scientific Apparatus, and it has, therefore, been arranged that the Imperial and Royal Commissioner shall represent Hungarian, as well as Austrian interests, and a statement of the objects which it is proposed to send to the Exhibition from Hungary has already been forwarded to the Director of the South Kensington Museum.

No committee has, however, as yet been formed to make arrangements for the transmission of the articles which may be sent by Austria to the Exhibition. But the direction of affairs as well as the correspondence will, as the English Committee are already aware, be left to the officials of the Imperial and Royal Ministry of Public Worship, which will not prevent the advice of men of science being referred to in cases which it may be found necessary.

It has thus been found that almost all the countries of Cis-Leithania have decided to send articles to the Exhibition, and now that Hungary has also expressed her intention of taking part in it, the Austro-Hungarian Empire will in every case be represented there.

Vienna, 24th March 1876. (Signed) ORCZY.

Belgium.

BELGIUM.

MY LORD, Brussels, 17th December 1875.

I HAVE the honour to acknowledge the receipt of your Lordship's despatch, No 82 of this series of the 15th of October, and to report that I followed your instructions in notifying to the Belgian Government the proposed Exhibition of Scientific Apparatus to be opened at South Kensington in 1876.

Count de Lynden informs me in reply that the Department of the Interior would be glad to afford to the undertaking projected by the Lords of the Committee of the Council on Education the co-operation which they desire.

The Minister of the Interior will give to the Committee selected by the Council the sanction necessary for the fulfilment of their mission, and will see that the measures required to ensure the participation of Belgium in the projected Exhibition be taken in due time.

I have the honour to be, &c.

The Earl of Derby, &c., &c., &c.

(Signed) J. SAVILE LUMLEY.

DENMARK.

Denmark.

MY LORD, Copenhagen, 1st March 1876.

I HAVE the honour to enclose copy of a note, just received from Baron Rosenörn-Lehn, in reply to a communication which I had addressed to His Excellency on the 8th November last, by which he expresses the regret felt by this government in not being able to take any measures for the participation of Denmark in the Exhibition of Scientific Instruments to be held in the spring in the South Kensington Museum.

The administration of the Polytechnic Institution here object to running the risk which would be incurred in sending to London such rare and valuable instruments as would be fit for Exhibition, besides the inconvenience which would be occasioned by being deprived of the use of such instruments as are necessary for the instruction of the scholars in that Institution for so long a time as the Exhibition will last.

Why this determination should not have been communicated to me long ere this I cannot conceive, as I have repeatedly applied during the last four months for a reply to my note on this subject addressed to the Minister for Foreign Affairs as stated above on the 8th November last.

I have the honour to be, &c.

The Earl of Derby, &c., &c., &c.

(Signed) CHARLES LENNOX WYKE.

(Enclosure.)

MONSIEUR LE CHEVALIER, Copenhagen, le 29 Février 1876.

EN me référant à la lettre que vous avez bien voulu m'adresser en date du 8 Novembre de l'année passée au sujet d'une exposition d'instruments scientifiques au Musée de South Kensington, j'ai l'honneur de porter à votre connaissance que mon collègue le Ministre des Cultes et de l'Instruction publique, auquel je m'étais empressé de soumettre la teneur de votre lettre, vient de m'informer qu'il regrette de ne pas être à même de prendre des mesures pour que le Danemark participe à la dite exposition.

En effet, d'après les représentations qui ont été faites au Ministre susmentionné par l'administration de l'école polytechnique, institut qui était principalement appelé à s'associer à cette œuvre, les instruments scientifiques qui à cause de leur rareté et leur construction particulière seraient les plus propres à figurer à l'exposition dont il s'agit, sont si couteux et si délicats qu'il est à craindre qu'ils ne souffrent grandement par un déplacement et le transport à Londres. Comme en outre on a besoin de ces mêmes instruments pour l'instruction qui est donnée aux élèves de l'école polytechnique, on ne saurait sans inconvenients s'en passer pendant tout le temps que durera l'exposition.

Veuillez agréer, &c.

(Signed) (BARON) ROSENÖRN-LEHN.

Sir C. L. Wyke, &c., &c., &c.

Appendix A

MINUTES AND CORRESPONDENCE.

France.

FRANCE.

MY LORD, Paris, 7th February 1876.

WITH reference to your Lordship's commercial despatch, No 231 of the 15th of October last, and to my commercial despatch, No. 310 of the 21st of the same month, I have the honour to transmit to your Lordship a copy of a letter which has been addressed to me by the Minister of Public Instruction to inform me that he has appointed a Committee to represent France at the Special Loan Exhibition of Scientific Apparatus which it is proposed to hold in London next April.

I enclose, moreover, an authentic copy of the Arrêté appointing the Committee.

The members of it appear to be those suggested in the list which accompanied your Lordship's despatch, and which was communicated by me to the French Government.

I have the honour to be, &c.
(Signed) LYONS.

The Earl of Derby,
&c., &c., &c.

MONSIEUR L'AMBASSADEUR. Paris, le 5 Février 1876.

J'AI l'honneur de transmettre à V.E. une ampliation de l'arrêté par lequel j'ai institué un comité chargé de représenter la France à l'Exposition d'Appareils Scientifiques, qui doit avoir lieu à Londres, au mois d'Avril prochain.

Ce comité comme le remarquera Votre Excellence se compose de membres de l'académie des sciences, soit comme Directeurs, soit comme Professeurs à l'administration de nos grands établissements scientifiques.

En les désignant, j'ai cru répondre au désir de V.E. et aux intentions des hommes éminents qui ont organisé la prochaine exposition.

Agréez, &c.
(Signed) Le Ministre de l'Instruction Publique des Cultes et des Beaux-Arts.
(Signed) H. WALLON.

S.E. Mons. l'Ambassadeur d'Angleterre.

No. 161 d. Le ministre de l'instruction publique des cultes et des beaux arts
Arrêté.

Il est institué un comité chargé de prendre part, au nom de la France, à l'exposition d'appareils scientifiques qui doit avoir lieu à Londres en 1876.

Ce comité est composé ainsi qu'il suit.

Fait à Paris le 5 Février 1876,
Signé H. WALLON.
Pour ampliation le chef du Bureau des Archives,
(Signed) H. VALMORE.

Germany.

GERMANY.

South Kensington Museum, S.W.
16th January 1876.

SIR,

HAVING instructed Mr. Cunliffe Owen to proceed to Berlin, I ventured to convey through him the desire I had to secure the powerful interest of your Imperial and Royal Highness in the proposed Exhibition of Scientific Apparatus to be held at the South Kensington Museum in April next.

Mr. Owen has fully reported to me the gracious and prompt steps which your Imperial and Royal Highness, as well as Her Imperial and Royal Highness the Crown Princess of Germany, have taken in bringing *together* the leading scientific men of Berlin, and enabling them to

consider the question in the presence of the Ministers of Commerce and of Public Instruction.

At this Imperial reception, held on the 3rd January, at the special and personal request of your Imperial and Royal Highness, the Ministers above referred to agreed upon the nomination of an influential Committee whose members also consented to meet the following day at Dr. Hofman's who, I am glad to learn, has given further proof of his known sympathy by consenting to accept the chairmanship of the Committee.

Mr. Owen has further reported to me, and I desire to express my acknowledgment, of your Imperial and Royal Highness' offer to act on the Committee to act under your Imperial Highness' august patronage so soon as the formal sanction of the Prince Chancellor of the Empire has been given to the application sent at my request through Her Majesty's Ambassador at the Court of Berlin. This sanction, I am informed, has been since received, and I therefore beg your Imperial and Royal Highness to be pleased to convey to the Committee my sense of the active co-operation which they are good enough to give in the promotion of the exhibition of the valuable and interesting contributions from Germany.

Your Imperial Highness will perhaps be further pleased to convey to the Committee my full authority to act on my behalf, and I feel sure that the representatives of the various States of the German Empire will also concur in the sanction I wish to convey of whatever proceedings may be considered desirable on the part of the Central German Committee acting under your Imperial and Royal Highness' patronage.

(Signed) RICHMOND.

To Field Marshal His Imperial
and Royal Highness the Crown
Prince of Germany.

BAVARIA.

Bavaria.

MY LORD, Munich, 1st April 1876.

IN accordance with the instructions contained in your Lordship's despatches of this series, No. 1 of the 6th ultimo, and circular of the 18th ultimo, I communicated to Monsieur de Pfretzochner the hope of Her Majesty's Government that the Government of Bavaria would take part in the Scientific Apparatus Loan Exhibition which opens this day at South Kensington, and have now the honour to enclose a translation of the reply which I received yesterday from His Excellency.

I have the honour to be, &c.

The Earl of Derby, (Signed) CLEMENT H. HILL.
&c., &c., &c.

TRANSLATION.

Munich, 30th March 1876.

IN his note of the 9th instant, Mr. Hill called the attention of His Majesty's Government to the International Exhibition of Scientific Apparatus which opens in London on the 1st of April, and suggested that a Commission should be formed here to take part in it

The undersigned did not fail to communicate on the subject with the Minister of the Interior for Religion and Education, and has now the honour to state that a Branch Committee for the above purpose has for some time past been in existence here.

This Committee is under the presidency of the director of the Polytechnic Schools, Professor Dr. Beetz and of Professors Dr. Von Bauernfeind, Dr.

Appendix A.

MINUTES AND CORRESPONDENCE.

Gümbel, Dr. Von Jolly, Dr. Seidel, Dr. C. Voit, and of the optician Dr. Steinheil, all in Munich.

The undersigned begs further to remark that the loan of apparatus, models, and plans (Karten) from the scientific collections of the three universities of the general conservatorium, and of the royal Polytechnic Schools, to the Exhibition of Scientific Apparatus in London, has been sanctioned by the Government, on condition that the above-named conservators wish to exhibit them, and will be able to dispense with them while the Exhibition lasts. The Branch Committee has been informed of the condition, and also that as there are no funds at the disposal of the State for such purposes the Government cannot undertake to defray any expenses which may be incurred in the matter.

Finally, the undersigned begs to acknowledge receipt of the note of the 27th instant with printed copies of the revised edition of the prospectus of the Exhibition, which he has also communicated to the Minister for Religion and Education.

The undersigned avails, &c.
(Signed) V. PFRETZSCHNER.

Holland.

HOLLAND.

MY LORD, The Hague, 11th November 1875.

IN obedience to the instructions contained in your Lordship's despatch, No. 58 commercial dated October 16th, I addressed a note to the Minister for Foreign Affairs communicating the substance of that despatch, and soliciting the co-operation of the Dutch Government in the promotion of the Special Loan Exhibition of Scientific Apparatus, which the Lords of the Committee of Council on Education propose shall be held in the South Kensington Museum in 1876.

I have the honour to transmit copy of the answer of Monsieur de Willebois, according to which it appears that the Netherlands Government decline to appoint a Royal Commission, on account of the constantly increasing expenses to which the treasury is put with respect to foreign Exhibitions, but at the same time the Minister for the Interior declares himself ready to assist the Dutch Commission already constituted as much as lays in his power, by placing at their disposal any objects belonging to the State which may be of use to the projected Exhibition.

I have the honour to be, &c.,
(Signed) E. A. J. HARRIS.

The Earl of Derby,
&c., &c., &c.

Enclosure (Copy.)

MONSIEUR L'AMIRAL, La Hague, le 10 Novembre 1875.

J'AI l'honneur de porter à votre connaissance, que la difficulté de prêter le concours du Gouvernement aux differentes expositions étrangères de jour en jour plus nombreuses, surtout en vue des charges qu'elles entrainent nécessairement pour le trésor, semble à mon collègue de l'Intérieur faire obstacle à la nomination d'une commission royale pour l'exposition dont il est question dans votre officiel du 22 Octobre dernier, d'autant plus qu'il paraît qu'une commission Néerlandaise s'est dejà constatée à cet effet.

Nénmoins Monsieur Humsqirk n'hésite pas à se déclarer entièrement disposé à assister dans sa tâche, pour autant qu'il est en son pouvoir, la dite commission, de même qu'il mettra volontiers à sa disposition les objets appartenant à l'Etat, qu'elle jugera pouvoir servir au but qu'elle se propose, et dont on pourra se passer pendant quelque temps.

Je saisis &c., &c.
(Signed) J. D. D. DE WILLEBOIS.

Appendix A.

MINUTES AND CORRESPONDENCE.

Italy.

ITALY.

MY LORD, Rome, 31st December 1875.

WITH respect to your Lordship's despatch, No. 79 commercial of the first ultimo, on the subject of the Special Loan Exhibition of Scientific Apparatus at the South Kensington Museum in the month of April 1876, I have the honour to enclose copy and translation of a note which I have received in answer to my application from the Italian Government, stating that the Government of the King willingly availing themselves of the invitation of Her Majesty's Government have nominated three gentlemen, whose names are given in the note, as members of the Italian Commission for the above-named Exhibition.

I have the honour to be, &c.

The Earl of Derby, (Signed) A. PAGET.
&c., &c., &c.

(Enclosure.)

SIGNOR MINISTRO, Roma, 28 Decembre 1875.

MI reco a premura di annunziare a V.S. in riposta alla nota che ella si compiacque dirigermi il 15 del mese decorso che il Governo del Re, aderendo di buon grado all' invito del Governo Inglese, ha nominato a componenti la commissione Italiana per l' esposizione di instrumenti scientifici a Londra, i Signori Commendator Pietro Blaserna, professore di fisica e rettore della R. Università di Roma, Commendator Giovanni Cantoni, professore di fisica nella R. Università di Pavia, Cav. Lorenzo Respighi, professore d' astronomia nella R. Università di Roma, e direttore della osservatorio astronomico del Campidoglio.

A questi signori fù data comunicazione del tenore della nota di V.S. e furono rimessi i programmi del' esposizione.

Gradisca, &c.,
for the Minister,
(Signed) ARTONI.

Portugal.

PORTUGAL.

MY LORD, Lisbon, 22nd May 1876.

WITH reference to Mr. Morier's despatch, No. 29 of this series of the 6th instant, I have the honour to transmit herewith a translation of a note from Señor Corvo announcing that two instruments had been forwarded by the Polytechnical School in Lisbon through the Portuguese Consul-General in London, on the 24th of March last, for delivery at the South Kensington Museum.

This note, as well as five others, dated respectively the 8th of March, the 11th of April, two of the 18th of the same month, and one of the 16th instant, were delivered at the Legation on the evening of the 20th instant only.

I have the honour to be, &c.

The Earl of Derby, (Signed) H. CLARKE JERVOISE.
&c., &c., &c.

Enclosure (Translation.)

Foreign Department, Lisbon, 5th April 1876.
(Received 25th May.)

SIR,

I HAVE the honour to inform you that on the 24th ultimo two instruments, the chrono-goniometer and the "azimuthal" planisphere, were forwarded to the Consul General of Portugal in London for delivery to the South Kensington Museum.

The Polytechnical School of Lisbon, to whom notice was given of the invitation contained in Lord Lytton's note of the 13th of November last, which

Appendix A.

MINUTES AND CORRESPONDENCE.

he did me the honour to address to me, has decided to send the above instruments to the Scientific Exhibition which is about to be held there this month.

I avail, &c.

R. G. Watson, Esq., &c., &c., &c.

(Signed) JOAS DE ANDRADE CORVO.

Russia.

RUSSIA.

MY LORD, St. Petersburgh, 2nd February 1876.

WITH reference to your Lordship's despatch, No. 46 of the 26th of October, and to my despatch, No. 75 of the 10th of November last (both of this series), I have the honour to enclose herewith a copy of a note which I have received from Monsieur de Giers, stating that the Imperial Minister of War gladly accepts the proposal of Her Majesty's Government, and that he will have much pleasure in forwarding to the Exhibition to take place in London this spring certain articles belonging to the Museum of Military Instruction.

A list of the articles proposed to be sent is annexed herewith, to be submitted to the approbation of the Committee of Council on Education.

Monsieur de Giers begs that the Imperial Government may be informed of the decision of the Lords of the Committee with respect to these articles.

I have the honour to be, &c.

The Earl of Derby, &c., &c., &c.

(Signed) AUGUSTUS LOFTUS.

(Enclosure.)

A.L. Ministère des A. E. St. Pétersbourg.

21 Janvier, / 2 Fevrier, } 1876.

M. l'Ambassadeur.

JE me suis empressé de porter à la connaissance des autorités competentes le désir exprimé par le gouvernement de la Reine dans la note de l'Ambassade du 9 Novembre 1875 de voir la Russie prendre part à l'exposition scientifique qui s'ouvrira à Londres en avril prochain, et de leur transmettre les prospectus qui se trouvaient annexés à la dite note.

Le Ministère de la guerre m'informe aujourd'hui qu'il accepte avec empressement la proposition du Gouvernement Britannique et qu'il desire envoyer à la prochaine exposition de Londres les objets qui font partie de la collection du Musée pédagogique de l'administration supérieure des établissements militaires d'instruction.

M. l'Aide de Camp Général Miliontine a fait parvenir à cette occasion une liste énumerant les objets en question en priant de soumettre cette pièce à l'appréciation des Lords du Comité du Conseil d'éducation.

Me conformant à ce vœu j'ai l'honneur de transmettre ci-après à V.E. la liste soumentionnée, en la priant de vouloir bien informer le Ministère Imperial du résultat de l'appreciation dont elle sera l'objet.

Veuillez agréer, &c., &c.

(Signé) GIERS.

Spain.

SPAIN.

MY LORD, Madrid, 7th March 1876.

WITH reference to your Lordship's despatch, No 69 commercial of 26th October last, the contents of which were communicated to the Minister of State so far back as the 11th of November last, I have only been now informed by His Excellency that the Spanish Government

has decided upon sending various scientific instruments to the Exhibition to be held in London.

I have the honour to be, &c.

The Earl of Derby, (Signed) A. H. LAYARD.
&c., &c., &c.

SWEDEN.

Sweden.

MY LORD, Stockholm, 27th February 1876.

WITH reference to your Lordship's despatch, No. 22 commercial of the 26th of last October, I have the honour to transmit herewith copy of a note from General Bjornstjerna stating that the Swedish Government regrets that it will be unable, owing to the Exhibition at Philadelphia, to assist at the Loan Exhibition of Scientific Apparatus to be held next April at South Kensington, but that the Norwegian Government has appointed a Commission of three members, whose names are given, to co-operate with the English Committee.

I have the honour to be, &c.

The Earl of Derby, (Signed) E. M. ERSKINE.
&c., &c., &c.

(Enclosure.)

MONSIEUR LE MINISTRE, Stockholme, le 21 Février 1786.

ME référant à votre office du 9 Novembre dernier, j'ai l'honneur de vous informer qu'une collection complète des meilleurs instruments de physique usités pour les travaux scientifiques en Suède sera exposée à Philadelphie et qu' à défaut de matériel nécessaire pour former une seconde collection analogue le Gouvernement du Roi se voit à son grand regret empêché de prendre part pour ce qui concerne la Suède à l'exposition dont vous faites mention dans votre dit office, mais que la Norwège a l'intention d'y prendre part et qu'une commission a été nommée à cet effet composée de MM. les Professeurs L. Esmark, P. Waage, et H. Mohn.

Veuillez, &c.
(Signed) O. M. BJORNSTJERNA.

SWITZERLAND.

Switzerland.

MY LORD, Berne, 3rd January 1876.

ON receipt of your Lordship's despatch, No. 21 commercial of the 15th October last, relative to the proposed Loan Exhibition of Scientific Apparatus, to be held in the Kensington Museum in 1876, I addressed a communication to the Swiss Government with a view to obtain the official appointment of a Committee composed of persons who would represent the various branches of science which will be comprised in the Exhibition. I have now the honour to enclose copy of a note which I have received from the late President of the Confederation containing a list of persons who are ready to take part in the Exhibition as Representatives of Switzerland.

The Committee met and constituted itself at Geneva on the 16th ultimo.

I have the honour to be, &c.

The Earl of Derby, (Signed) EDWIN CORBETT.

UNITED STATES.

MY LORD, Washington, 28th May 1876.

ON the receipt of your Lordship's circular despatch of this series, and of the 30th March last, relative to the Loan Collection of Scientific Apparatus at the South Kensington Museum, I addressed a note to Mr. Fish communicating to him the substance of that despatch.

I have now the honour to enclose a copy of his answer, showing that it is out of the power of the Government of the United States at present to comply with the suggestions contained in that despatch.

I have the honour to be, &c.
(Signed) EDWARD THORNTON.

The Earl of Derby,
&c., &c., &c.

(Enclosure.)

SIR, Washington, 27th May 1876.

REFERRING to your note of the 13th ultimo, and to the reply thereto of the 17th April, in regard to a Loan Exhibition of Scientific Apparatus which it was proposed to open at the South Kensington Museum, I have now the honour to inform you that your note having been communicated to the Treasury, War, Navy, and Interior Departments, replies have been received from the first three of the Departments. The War and Navy Departments state that in consequence of the instruments required by the Centennial Exhibition and for use in those departments they will have none to spare for the purpose mentioned in your note. The Treasury Department has transmitted a copy of a letter from Professor Henry, president of the National Academy of sciences to whom the subject was referred, to the effect that although many instruments have been invented in this country for illustrating principles of science, they have been produced by professors of colleges, and in many cases but a single example exists, which is needed for instruction and could not therefore well be spared to be sent to England. Professor Henry further observes that the apparatus in general use in this country for both research and education is principally constructed in Europe, and to send this would be merely to duplicate what is already in the Exhibition.

I have, &c.
(Signed) H. FISH.

Sir E. Thornton, K.C.B.

MEMORIAL PRAYING FOR PROVISION OF A ROOM IN WHICH OBJECTS COULD BE SUITABLY DISPLAYED AND STUDIED.

22, St. John's Wood Road, N.W.,
7th February 1876.

MY LORD,

I HAVE been deputed to lay before your Grace the accompanying memorial, which I now have the honour to do in accordance with the wishes of a few artists interested in the object therein set forth.

I have the honour to be,
Your Grace's most obedient servant,
JOHN T. LUCAS.

To His Grace,
The Duke of Richmond, K.G.

To His Grace the DUKE of RICHMOND, K.G., LORD PRESIDENT of the COUNCIL.

Committee of Education,
Department of Science and Art.

THIS memorial showeth that the undersigned artists desire to express to your Grace their appreciation of the inestimable advantages afforded to them by the opportunities for study from the collection of antiques, and the many objects of interest thrown open for inspection at the South Kensington Museum, more especially as regards the ornamental furniture of different periods. They further beg your Grace and the Members of the Council to take into consideration, whether, in accordance with the arrangements for the management of the Museum and the proper custody of the objects, it would be possible to add to the advantages already possessed, the increased privilege of a suitable room where artists might have such objects of interest, as would be permissible, placed in a light and shade suitable for reproduction in pictures; and they venture to think that such an arrangement would be a great boon, not only to the student in Art, but also to the more advanced and earnest worker, whose power is often cramped by the technical difficulty of copying any object in an unsuitable light and shade.

Your memorialists beg that your Grace and the Members of the Council will be pleased to grant your kind consideration to their memorial, and they will be ever grateful.

July 1875.

South Kensington Museum,
25th February 1876.

SIR,

ADVERTING to your letter of the 7th instant, addressed to His Grace the Lord President of the Council, and to the memorial transmitted therewith, representing the desirability of a room being provided in the South Kensington Museum, in which objects of Art might be placed in light and shade suitable for their reproduction in pictures, I am directed to state that the Lord President is gratified to find that the memorialists, including the President of the Royal Academy, and other leading representatives of British Art, attach so much importance to the facilities for study which are afforded to them at South Kensington. It is the desire of His Grace that the collections of the South Kensington Museum should be made as largely useful as possible, and he would gladly accede to the request of the memorialists if it were possible to do so, but in the present crowded state of the buildings he regrets to find that there is no space available for the purpose.

I am, Sir,
Your obedient servant,
P. CUNLIFFE OWEN,
Director.

F. T. Lucas, Esq.

APPENDIX B.

1. Report on Science Schools and Classes by Major Donnelly, R.E.

Appendix B — Major Donnelly's Report.

The results of the examinations of Science schools and classes during 1876 are, as will be seen from the subjoined tables, of a most encouraging character. The total number of papers worked was nearly 7,000 in excess of the previous year, the increase being spread over nearly the whole of the subjects in which examinations were held, and the number of successful candidates also shows a satisfactory increase. The number of schools increased from 1,299 in 1875 to 1,426 in 1876, the number of separate classes in them from 4,106 to 4,931, and the number of individual students under instruction from 52,669 to 57,988, of whom 30,108, with 3,181 external candidates, were presented for examination, 27,682 of these or 83 per cent. being successful in one or more subjects. The number of 1st classes obtained was somewhat smaller than in 1875, being 10,271 in the elementary stage and 2,182 in the advanced stage, against 11,112 and 2,453 respectively in 1875. The number of 2nd classes was however larger, being 26,030 in the elementary stage and 7,600 in the advanced stage, as against 22,259 and 7,130 respectively in 1875. There was also an increase in the number of candidates who obtained 1st classes in Honours from 54 to 65, while the number who obtained 2nd classes was exactly the same.

The steady increase shown by the above figures is the more satisfactory inasmuch as the restriction referred to in my last report on the presentation of scholars in public elementary schools had been raised. In 1875 only those who had passed Standard V. of the English or Scotch Codes or the examination of the 5th class in Ireland were admissible. In 1876 it was necessary that they should have passed Standard VI. or the 1st stage of the 6th class. These restrictions must place an effectual check on cramming young children.

2. Results of the Science School Examinations, May 1875 and 1876.

—	1875.	1876.
Number of Schools* under Teachers examined - -	1,299	1,426
Number of Classes in the same - - - -	4,106	4,931
Number of individuals under instruction in Classes under Certificated Teachers - - - -	52,669	57,988
Number of the above who came up for examination -	27,985	30,108
Number examined in addition to the above who were not in Schools under Certificated Teachers - -	2,700	3,181
Number of individuals successful - - -	24,457	27,682
Number of these who have not been successful in a previous year - - - - - -	14,365	15,364

* Under the term school is included each separate institution in which Science instruction is being given. In some cases a school has only one class in one subject of Science, whilst in others there is a more or less complete course of study.

Total number of Papers worked		62,308	69,162
Number of Provincial Centres where Examinations were held		838	923
Number of Metropolitan Centres where Examinations were held (including South Kensington Museum)		100	128
Number who came up in the Elementary Stage		48,223	53,374
Number of 2nd Class		22,259	26,030
" 1st "		11,112	10,271
" Failures		14,852	17,073
Number who came up in the Advanced Stage		13,085	14,708
Number of 2nd Class		7,130	7,600
" 1st "		2,453	2,182
" Failures		3,502	4,926
Number who came up in Honours		1,000	1,080
Number of 2nd Class		184	184
" 1st "		54	65
" Failures		762	831
Total number of Papers worked		62,308	69,162
Total number of Successes		43,192	46,332
Total number of Failures		19,116	22,830

The payments to teachers which in 1875 from the large proportion of 1st classes obtained, rose from 13*s.* 10*d.* per student under instruction in 1874 to 16*s.* 1*d.* in 1875, fell again in 1876 to 14*s.* 8*d.* The number of teachers to whom payments were made being 1,449 in 1875 and 1,602 in 1876.

Reports have been received from several of the examiners as in previous years containing useful hints as to methods of teaching, &c. As these reports have been printed and circulated to the schools, short extracts only relating to matters of general interest are given here.

The late Prof. Bradley, the examiner in Practical, Plane, and Solid Geometry says: —

"The unsatisfactory result, so far as the elementary stage is concerned, is in great measure due to the carelessness of the student in reading his question.

It seems as if it were a matter of indifference to him as to what the conditions of the problem are so long as he produces a result something like the correct one . . . . The failure in the elementary stage is more remarkable when the excellence of the work in the other two stages is observed."

Major Seddon, R.E., the examiner in Building Construction says,—

"It will be observed that the first class per-centages in both the elementary and advanced stages are lower than last year, whilst the second class per-centages are in both cases higher . . . . A great deal of this apparent falling off is, I think, due to many of the students having been too ambitious in attempting the advanced stage, instead of making sure of passing in the elementary stage."

In the elementary stage the proportion of failures this year, though still 7·93 per cent. under that of 1874, exceeds that of last year by 7·5 per cent. . . . . .

At the same time signs of good teaching are constantly met with.

There was a slight improvement this year in the answering of the 43 Honours papers."

Mr. Savage, the examiner in stages 4, 5, 6, and 7, of Mathematics says,—

"The answers in stage 5 were unusually good; in stage 4 the answers in geometry, and more particularly in solid geometry, gave me rather an unfavourable notion of the way in which these subjects are taught."

The Rev. Mr. Twisden, the examiner in Theoretical Mechanics says,—

. . . . "The results of the examination are on the whole satisfactory though the failures are proportionately more numerous than they were last year."

Dr. Debus acting with Dr. Tyndall as examiner in Magnetism and Electricity says,—

"On the whole the candidates shewed themselves very well instructed in the subjects, and the result of the examination may fairly be considered very satisfactory."

Dr. Michael Foster, acting with Prof. Huxley, as examiner in Animal Physiology and Biology, says with reference to Animal Physiology :—

"The division of the papers sent in into those from schools well taught, and those from schools badly taught, is even more marked this year than last. In the case of many schools scarcely any papers were rejected; in the case of many others scarcely any passed . . . .

"In what may be called the good schools there seems to be a slight but distinct improvement over last year . . . .

"In what may be called the bad schools fewer papers have been rejected; but the papers are not as a whole distinctly better."

With reference to Biology, Dr. Foster says,—

"The papers sent in this year do not differ essentially in character from those of last year."

Appendix B.

MAJOR DONNELLY'S REPORT.

Dr. Woolley, the examiner in Navigation and Nautical Astronomy, says,—

"The working of the questions in Navigation seems fully up to the average, and in some instances beyond. With a few exceptions, the answers show sound and careful teaching . . . .

In the advanced paper on Nautical Astronomy the answering was not quite so good as in former years, but there is a marked improvement in the working of the elementary papers."

Prof. Ansted, the examiner in Physical Geography, says,—

"In the examination of the elementary papers in Physical Geography I have to report the general opinion of my assistants (confirmed by my own revision) that while there were perhaps fewer than usual remarkably well worked papers, the average of answering was higher and the comprehension of the subject more complete . . . . . .

The advanced papers certainly show a higher tone, and indicate generally greater care in preparation and greater soundness of knowledge . . . . . .

In the examination for Honours I found as usual a large number of attempts utterly unjustified by the knowledge and intelligence of the student."

Prof. Tanner, the examiner in Agriculture says,—

"Upon the general character of the answers from the candidates I would remark that they bear evidence of a strong educational force in the country which is doing thoroughly good work. With a little encouragement and a more complete organization these advantages may be more widely extended and become a great benefit to the agricultural community."

The detailed results of the examinations are given in the following tables. In the first are given the results for 1876 compared with those for 1875 in absolute numbers, while the second tables give the same results as per-centages.

3. TABLE showing the DETAILS of SUCCESSES and FAILURES in each STAGE of each SUBJECT.

The figures in italics relate to May 1875.

—	Advanced Stage.				Elementary Stage.

In accordance with the Minute of 22nd November 1875, printed at p. 2 of the 23rd Annual Report of the Science and Art Department an examination in the principles of agriculture was held in May 1876, at which 150 candidates were examined. As will be seen on reference to the table at p. 41, a large proportion of these were successful and already numerous classes have been formed for the teaching of the subject.

The summer courses of training for Science teachers in 1876 were given in botany, and magnetism and electricity, at the Science Schools, South Kensington. The course in botany, by Mr. Thiselton Dyer, extended over nearly eight weeks and was attended by 30 teachers; the course in magnetism and electricity by Prof. Guthrie occupied a little more than three weeks and was also attended by 30 teachers. The teachers attending these courses were selected from nearly 300 applicants and almost without exception were reported to have worked well and profited considerably by the instruction given. In addition to these arrangements short courses of lectures in connection with the Loan Collection of Scientific Apparatus were delivered as follows :—

LECTURES to SCIENCE TEACHERS given in connexion with the LOAN COLLECTION of SCIENTIFIC APPARATUS, South Kensington, 1876.

Date.	Day of Week.		Lecturer.	Subject of Lecture.
July 3rd	Monday,	10 a.m.	*Prof. G. Forbes -	Velocity of Light.
		4 p.m.	†Mr. Bramwell, F.R.S. -	Steam Engine.
4th	Tuesday,	10 a.m.	*Prof. G. Forbes -	Radiation.
		4 p.m.	Mr. Bramwell, F.R.S. -	Steam Engine.
5th	Wednesday,	10 a.m.	*Prof. Barrett - -	Sensitive Flames.
		4 p.m.	Prof. Francis Guthrie -	Air Pumps. Capillarity.
6th	Thursday,	10 a.m.	W. Chandler Roberts, F.R.S.	Assaying.
		4 p.m.	Prof. Francis Guthrie -	Air Pumps. Capillarity.
7th	Friday,	10 a.m.	Prof. MacLeod - -	Eudiometers.
		4 p.m.	Mr. Chisholm - -	Balances.
10th	Monday,	10 a.m.	*Professor Stokes, F.R.S.	Absorption and the colours of Natural Bodies.
		4 p.m.	†Mr. Merrifield, F.R.S. -	Measurement, Linear, and surface.
11th	Tuesday,	10 a.m.	*W. Spottiswoode, M.A., LL.D., F.R.S.	Optical Instruments employed in the Polarization of Light.
		4 p.m.	†Mr. Merrifield, F.R.S. -	Measurement, Linear, and Surface.

Appendix B.

MAJOR DONNELLY'S REPORT.

Date.	Day of Week.		Lecturer.	Subject of Lecture.
July 12th	Wednesday,	10 a.m.	*Professor Roscoe, B.A., F.R.S.	Technical Chemistry.
		4 p.m.	J. Norman Lockyer, F.R.S.	Spectroscopes.
13th	Thursday,	10 a.m.	*Professor Roscoe, B.A. F.R.S.	Technical Chemistry.
		4 p.m.	†J. Norman Lockyer, F.R.S.	Spectroscopes.
14th	Friday,	10 a.m.	*Prof. Stokes, F.R.S. -	Fluorescence.
		4 p.m.	Prof. E. Ray Lankester	Microscopic Investigation.
17th	Monday,	10 a.m.	†Captain Abney, R.E., F.R.S.	Photography.
		4 p.m	*Mr. H. Dent Gardner -	Time Measures.
18th	Tuesday,	10 a.m.	†Captain Abney, R.E., F.R.S.	Photography.
		4 p.m.	*Mr. H. Dent Gardner -	Time Measures.
19th	Wednesday,	10 a.m.	Prof. Williamson, Ph.D., F.R.S.	Metallurgical Processes.
		4 p.m.	Mr. Kempe - -	Link Motions.
20th	Thursday,	10 a.m.	Prof. Williamson, Ph.D., F.R.S.	Metallurgical Processes.
		4 p.m.	Prof. T. F. Pigot -	Geometrical and Engineering Drawing.
21st	Friday,	10 a.m.	Prof. G. Carey Foster, B.A., F.R.S.	Electric Measurement.
		4 p.m.	Prof. T. F. Pigot -	Geometrical and Engineering Drawing.
24th	Monday,	10 a.m.	†Dr. W. H. Stone -	Instruments for Experiments on Sound.
		4 p.m.	*Prof. J. P. O'Reilly -	Apparatus for Mining Surveying.
25th	Tuesday,	10 a.m.	†Dr. W. H. Stone -	Musical Instruments and Temperaments.
		4 p.m.	*Prof. J. P. O'Reilly -	Apparatus for Mining Surveying.
26th	Wednesday,	10 a.m.	Prof. G. Carey Foster, B.A., F.R.S.	Electric Measurement.
		4 p.m.	Prof. Flower, F.R.S. -	Museum Specimens for Teaching purposes.
27th	Thursday,	10 a.m.	Dr. Siemens, F.R.S. -	Measurement of Density, Bathometer, &c.
		12 noon	†Sir Joseph Whitworth	Measuring Instruments.
		4 p.m.	Mr. Baillie Hamilton -	New Musical Instruments.
28th	Friday,	10 a.m.	Prof. Story-Maskelyne, M.A., F.R.S.	Mineralogical Apparatus.
		4 p.m.	*Dr. Huggins, F.R.S. -	The Spectroscope applied to Astronomy.
31st	Monday,	10 a.m.	Prof. Michael Foster, M.D., F.R.S.	Use of Lecture Experiments in Biological Teaching.
		4 p.m.	*W. Chandler Roberts, F.R.S.	Graham's Researches.
Aug. 1st	Tuesday,	10 a.m.	† Major Wilson, R.E., F.R.S.	Surveying Instruments.
		4 p.m	J. Hopkinson, D. Sc. -	Glass as applied to Telescopes and Lighthouses.
2nd	Wednesday,	10 a.m.	Major Wilson, R.E. F.R.S.	Surveying Instruments.
		4 p.m.	R. H. Scott, M.A., F.R.S.	Meteorological apparatus.
3rd	Thursday,	10 a.m.	Prof. Burdon Sanderson, M.D., LL.D., F.R.S.	Recording Instruments.
		4 p.m.	R. H. Scott, M.A., F.R.S.	Meteorological Apparatus.
4th	Friday,	10 a.m.	Dr. Lauder Brunton, F.R.S.	Apparatus for Physiological Chemistry.
		4 p.m.	Mr. Vines, B.A. -	Apparatus for Vegetable Physiology.
7th	Monday.	10 a.m.	*Prof. Goodeve, M.A. -	End Measurement.
		4 p.m.	†Prof. Ball, LL.D., F.R.S.	Astronomical Instruments.
8th	Tuesday,	10 a.m.	*Prof. Goodeve, M.A. -	Conversion of Motion.
		4 p.m.	Prof. Ball, LL.D., F.R.S.	Astronomical Instruments.
9th	Wednesday,	10 a.m.	*Prof. Goodeve, M.A. -	Illustrations of Applied Mechanics.
		4 p.m.	Prof. Ball, LL.D., F.R.S.	Calculating Machines.
10th	Thursday,	10 a.m.	Mr. Sorby, F.R.S. -	Microscopes.
		4 p.m.	Mr. Bottomley - -	Electrometers.

Date.	Day of Week.		Lecturer.	Subject of Lecture.
Aug. 11th	Friday,	10 a.m.	Dr. H. E. Armstrong -	Organic Chemistry.
		4 p.m.	Mr. Bottomley - -	Electrometers.
14th	Monday,	10 a.m.	*Prof. Barrett - -	Simple Apparatus for teaching Physics.
		4 p.m.	*Prof. Geikie, F.R.S. -	Geological Maps and Apparatus for Surveying.
15th	Tuesday,	10 a.m.	Prof. Geo. Forbes -	Thermal conductivity.
		4 p.m.	Prof. Geikie, F.R.S. -	Geological Maps and Apparatus for Surveying.
16th	Wednesday,	10 a.m.	Prof. Kennedy, C.E. -	Kinematical Models.
		4 p.m.	Mr. Froude, M.A., F.R.S.	The Laws of Fluid Resistance as they affect Ships.
17th	Thursday,	10 a.m.	Prof. Kennedy, C.E. -	Kinematical Models.
		4 p.m.	Mr. Froude, M.A., F.R.S.	Propulsion of Ships.
18th	Friday,	10 a.m.	*Professor Barrett -	Sources of Electricity.
		4 p.m.	†Prof. Geo. Forbes -	Thermo-Dynamics, Specific and Latent Heat.

*† The lectures marked * were delivered in the Lecture Theatre at the Science Schools, and the lectures marked † were delivered in the Lecture Theatre of the South Kensington Museum. All the rest were delivered in Room O (Conference Room) of the Exhibition.*

Free tickets of admission to these lectures were issued to all Science teachers who made application for them and a travelling allowance was made to 330 teachers in various parts of the United Kingdom to enable them to visit the collection and attend the lectures.

Applications were received from 167 candidates for admission to the winter courses at the Science Schools, South Kensington, as Science teachers in training. Of these 16 were selected to attend the course in chemistry, 9 in biology, 12 in physics, and 12 in mechanics. The conduct and progress of these Science teachers in training have been very satisfactory.

The number of competitors for the Royal School of Mines and Royal College of Science, Dublin, was last year 65 as compared with 60 in 1875.

The standard of excellence among the competitors for these exhibitions is still maintained, and it may be mentioned, as showing how successful the system of competition adopted has been, that a very large proportion of the prizes offered at the two institutions among all their students was obtained by Royal Exhibitioners.

The local exhibitions formed by a local contribution of 25*l.* supplemented by the grant of an equal sum from the parliamentary vote were last year 9, of which 3 were newly established, and 6 renewals of previously existing exhibitions.

The numbers of Science and Art and Elementary School Scholarships in 1876 were 54 and 57 respectively, as compared with 59 and 55 in 1875.

The grants towards the purchase of apparatus amounted to 842*l.* 15*s.* 9*d.* In the previous year they amounted to 1,043*l.* 9*s.* 10*d.* Laboratory grants were made under § LXXI. of the Science Directory to 84 schools, to the aggregate amount of 643*l.* 5*s.* Grants under this head were made in 1875 to 86 schools, the total amount being 611*l.*

The number of candidates for the scholarships founded by Sir J. Whitworth was last year 51, as compared with 48 in 1875. Thirty-three passed in the essential theoretical subjects and of these 19 were selected to go forward to the examination in practical workmanship, which was held as in previous years at the workshops of Sir. J. Whitworth & Co. (Limited), Manchester. The examination for prizes of Whitworth

Appendix B.

MAJOR DONNELLY'S REPORT.

scholars appointed in 1874 and 1875 was also held. The results of both these competitions are printed on p. 50.

Numerous applications were received for the collections of apparatus prepared for circulation to local schools. A list of places to which these have been sent is printed at p. 222.

On the next page I give a list of the officers of Royal Engineers who were employed as in previous years in inspecting for the Science and Art Department. At p. 50 a list of the Royal Exhibitioners. This is followed by the list of the candidates successful in obtaining Whitworth scholarships in 1876 and the results of the examination in 1876 of the scholars appointed in 1874 and 1875. To these succeed at p. 51 a list of the local exhibitions and scholarships and at p. 54 of the Queen's medallists. The schools obtaining laboratory grants are given at p. 56. After which come at p. 59 the list of Science schools examined in May 1876, showing the number of students under instruction in 1875 and 1876, with the prizes and medals obtained by each school in those years, and the fees received from students during the Session 1875–6. The table showing the classes, subjects taught, and number of students in each subject in the Science schools in January 1877 is given at p. 92. It will be observed on reference to this table that the Minute of 15th August 1876 has had a very marked effect on the classes in Physical Geography. The number of students in this subject in January 1876 (see p. 103 of 23rd Annual Report) was 18,282, while in January 1877 it had fallen to 7,845.

The payments on results to each school and teacher will be found at p. 159, and an alphabetical list of the teachers at p. 203. The school sclosed between May 1875 and May 1876 are given at p. 215.

J. F. D. DONNELLY, Major, R.E.

LIST OF ROYAL EXHIBITIONERS.

5. LIST of CANDIDATES who have been successful in obtaining ROYAL EXHIBITIONS of 50*l.* per Annum each for Three Years, and Free Admission to the Course of Instruction at the following Institutions :—

1. The ROYAL SCHOOL of MINES, Jermyn Street, London.

Name.	Age.	Occupation.	Address.
Marsh, Walter - -	24	Engineer -	Southampton.
Eastick, J. J. - -	21	Teacher -	Bury.
Lancaster, R. W. -	20	Assist. Teacher	Kendal.

2. The ROYAL COLLEGE of SCIENCE, Dublin.

Name.	Age.	Occupation.	Address.
Sisson, George - -	19	Analytical Chemist.	Gateshead.
Weston, Louis - -	19	Student - -	Old Charlton.
Sexton, Frederick M. -	16	Assistant Chemist.	Old Kent Road, London.

6. (*a.*) CANDIDATES successful in the Competition for the WHITWORTH SCHOLARSHIPS, 1876.

Name.	Age.	Occupation.	Address.	No. of Marks.		Total.
				Theoretical.	Practical.	
Shaw, Henry, S. H. -	21	Engine Fitter -	Bristol -	1,282	1,448½	2,730½
Greenhalgh, Robert -	21	Mechanical Engineer	Atherton (near Manchester).	882½	1,512	2,394½
Ryan, John - -	21	Engineering Student	Newport, Monmouthshire.	1,335	854½	2,189½
Williams, William H. -	21	Draughtsman -	Swindon -	854	1,259½	2,113½
Wright, John W. B. -	21	Pattern Maker -	Hull -	639½	1,458½	2,098
Nichols, Jerdan -	20	Mechanical Engineer	Over Darwen	1,465	619½	2,084½

(*b.*) EXAMINATION for WHITWORTH SCHOLARSHIP PRIZES, 1876.

1. SCHOLARS appointed in 1874.

Name.	Marks obtained.			Prize awarded.
	Theory.	Practice.	Total.	
Sisson, William - -	2,330	2,297½	4,627½	First prize, 100*l.*
Martin, William -	1,899	1,901	3,800	Second prize, 60*l.*
Sloan, Robert A. - -	2,136	1,410	3,546	Third prize, 50*l.*
Stubbs, Frederick - -	1,596	1,447½	3,043½	Fourth prize, 40*l.*
Daltry, Thomas L. -	1,370	1,359	2,729	Fifth prize, 30*l.*
*Muckley, James.	1,295	1,173	2,468	Sixth prize, 20*l.*

* Appointed in 1875 to fill a vacancy.

2. Scholars appointed in 1875.

Name.	Marks obtained.			Prize awarded.
	Theory.	Practice.	Total.	
Poole, Joseph - -	1,170	2,357½	3,527½	First prize, 100*l.*
Harrison, Joseph - -	1,749	1,487½	3,236½	Second prize, 60*l.*
Goodwin, George - -	1,319	1,425	2,744	Third prize, 50*l.*
Garside, Franklin -	1,439	1,273	2,712	Fourth prize, 40*l.*
Dick, Frank W. - -	1,467	998	2,465	Fifth prize, 30*l.*
Alldred, John - -	611	1,323½	1,934½	Sixth prize, 20*l.*

Appendix B.

List of Queen's Medallists.

8. List of Queen's Medallists.—Science Examination, May 1876.

The Queen's Medals, which are offered for competition throughout the United Kingdom at the general examination of Science Schools and Classes, held each year in May consist of Gold, Silver, and Bronze Medals. Anybody may compete, but the Medals cannot be taken by persons who are not students of Science Classes, nor by persons engaged in teaching (including students in training colleges and pupil-teachers over 17 years of age), nor by those who have taken the same Medal previously.

Name.	Age.	Occupation or (*f.*) Father's Occupation.	School.	Teacher.	Medal.
Subject I.—Practical Plane and Solid Geometry.					
Hilton, Arthur	22	Millwright	Hulme Wkg. Men's Inst.	T. Jones	Gold.
Whitrow, George H.	17	Book-keeper	Newport Saving's Bank.	W. Bush	Silver.
Shaw, Henry S. H.	21	Fitter	Bristol Trade	J. Munro	Bronze.
Salt, Charles T.	17	Student	North London Sch. of Art.	C. Swinstead	Bronze.
Subject II.—Machine Construction and Drawing.					
Sloan, Robert A.	21	Engineer's Apprentice.	Liverpool Inst.	F. Evans	Gold.
Goodwin, George	21	Whitworth Scholar.	Birbeck Inst. Chancery Lane.	J. C. Fell	Silver.
Banister, George H.	19	Fitter	Woolwich Royal Arsenal.	W. Busbridge	Bronze.
Subject IV.—Naval Architecture.					
Grant, Richard	31	Shipwright	Devenport, Haddington Road.	W. J. Barratt	Silver.
Agnew, G. A.	22	Draughtsman	Dumbarton, Burgh.	C. H. Johnson	Bronze.
Subject V.—Mathematics.					
Watkin, Fredk. W.	17	At School	Manchester Gram. Sch.	Rev. J. Chambers.	Gold.
Sisson, William	23	Engineer	Elswick Mech. Inst.	W. T. Rowden	Silver.
Holme, Arthur E.	17	At School	Manchester Gram. Sch.	Rev. J. Chambers.	Bronze.
Russell, Robert	18	"	Dublin, Santry.	M. Beckett	Bronze.
Subject VII.—Applied Mechanics.					
Edmonds, James C.	19	Engineer	Plymouth Sci. and Art College.	H. Evers	Silver.
Subject VIII.—Acoustics, Light, and Heat.					
Sloan, Robert A.	21	Engineer's Apprentice.	Liverpool Inst.	E. B. Ewart	Gold.
Cannon, Charles J.	19	Turner's Apprentice.	Old Ford Road Sci.	J. Z. Ames	Silver.
Quiggin, Daniel A.	20	Engineer's Apprentice.	Liverpool Sch. of Sci.	J. Wright	Bronze.
Davis, William E.	20	Clerk	Birmingham, Severn St.	W. J. Lancaster	Bronze.

Name.	Age.	Occupation or (*f.*) Father's Occupation.	School.	Teacher.	Medal.
Subject IX.—Magnetism and Electricity.					
Sisson, Geo. (jun.)	19	Analytical Chemist.	Elswick Mech. Inst.	W. T. Rowden	Gold.
Ruedi, John, V. S.	23	Clerk	Chancery Lane, Birkbeck Inst.	W. J. Wilson	Silver.
Cheyne, Forbes	25	"	Londonderry Nat. Sch.	W. Patterson	Bronze.
Booth, H. H.	28	Chemist	Olney Nat. Sch.	A. W. Glover	Bronze.
Subject X.—Inorganic Chemistry.					
Sisson, Geo. (jun.)	19	Analytical Chemist.	Elswick Mech. Inst.	W. T. Rowden	Gold.
Glover, Thomas	19	Chemist	St. Helen's Mech. Inst.	J. Bournes	Silver.
Jellicorse, William J. A.	21	Student	Birmingham Midland Inst.	C. J. Woodward	Bronze.
Seward, Harold	13	(*f.*) Teacher	Liverpool Inst.	E. B. Ewart	Bronze.
Subject XI.—Organic Chemistry.					
Kay, William E.	20	Laboratory Assistant.	Manchester Gram. Sch.	R. Ll. Taylor	Silver.
Barfoot, John R. D.	20	Druggist's Apprentice.	Chesterfield, St. Helen's.	E. Francis	Bronze.
Mestes, Sidney E.	16	Clerk	Chelsea Onslow Coll.	W. H. Martin	Bronze.
Subject XIV.—Animal Physiology.					
Levy, Jacob	24	Hatter	Nottingham Mech. Inst.	H. Major	Bronze.
Subject XXII.—Steam.					
Oram, Henry J.	17	Engineer Student.	Plymouth Navigation Sch.	J. Merrifield	Bronze.

Appendix B. — Laboratory Expenses.

9. List of Schools applying for the Special Grant in aid of Laboratory Expenses according to § LXXI. of the Science Directory.

Town.	Where held.	No. of Students.	No. of Sets of Apparatus.
Buckinghamshire:			
High Wycombe -	Boys' Board School - -	11	7
Cheshire:			
Macclesfield - -	Modern Free School - -	35	35
Stockport - -	Sunday School - -	12	11
Cornwall:			
Camborne - -	Working Men's Club - -	13	7
Helston - -	Commercial School - -	8	4
Pendeen - -	National School - -	4	4
Penzance - -	Royal Cornwall Geological Museum.	23	23
Derbyshire:			
Chesterfield - -	St. Helen's Board School -	20	20
Derby - -	Central School of Science -	25	25
Devonshire:			
Exeter - -	Science School - - -	7	7
Plymouth - -	Bank of England Science School	21	20
Durham:			
Barnard Castle -	Mechanics' Institute - -	15	12
Durham - -	Science School - -	16	14
Gloucestershire:			
Cheltenham - -	Whitworth School of Science -	12	12
Gloucester - -	School of Science - -	11	11
Hampshire:			
Southampton - -	Hartley Institute - -	12	12
Kent:			
Woolwich - -	Royal Arsenal - - -	23	23
Lancashire:			
Accrington - -	Cooperative Hall - -	26	26
" - -	Mechanics' Institute -	10	5
Burnley - -	Grammar School - -	16	16
Bury - - -	Athenæum - - -	17	17
Liverpool - -	Philadelphia Chambers - -	32	26
" - -	Board School, Queen's Road -	7	7
Manchester - -	St. Mark's Church Institute	14	14
" - -	Mechanics' Institute - -	22	22
" - -	Grammar School - -	88	88

Collins, John	337
Collins, Thomas	55
Collins, W. T. H.	710
Considine, J.	1,174
Constable, John	1,016
Cook, Ernest H.	208
Cook, John (Marske by the Sea.)	971
Cook, John (Arbroath)	1,065
Cook, John T.	83
Cook, W.	1,069, 1,111
Cooke, Stephen	1,076
Coomber, Thomas	208
Cooper, Arthur	391
Cooper, Mr. Zebina	562
Copley, James	84, 683
Corbin, P. G.	243
Cordall, Edward	375
Corder, Fred. H.	670
Cordery, George W.	66
Corfield, G.	246
Cormack, A.	1,078
Cornish, W. H.	426
Corus, John W.	419
Corrigan, Terence	409
Corry, John	1,289
Cotton, Edwin	988
Courtman, Reuben S.	307
Cowham, Josh. H.	634
Cowley, James	910
Cowlishaw, George	84
Cowlishaw, John	79
Cox, Arthur W.	819
Cox, Joseph	990
Cox, William	1,008, 1,009
Coyle, Denis	655
Crabb, Janet	499
Craddock, Edmund W.	872
Craddock, Edwin	867, 872, 875

Appendix B.

LIST OF SCIENCE TEACHERS.

Science Teachers to whom Payments have been made—*cont.*

Name.	Number in preceding Table.	Name	Number in preceding Table.
Craig, John	21	Dixon, George	1,218
Craig, William	1,199	Dixon, William	33
Craister, Walter	22	Dodgson, W.	350, 401, 446
Crawford, J. B.	1,180	Doherty, J. J.	1,246
Crawford, Samuel	174, 176	Dolbé, Rev. C. V.	549
Craze, John	149	Donaldson, Robert	1,002
Critchley, William	703	Donaldson, T.	1,202
Crompton, James	373	Dony, Josh. H.	6
Cronshaw, W. H.	310, 311	Douds, John	1,244
Crook, Frederick J.	199	Dowlen, Ethelbert	773
Crooks, W.	1,281	Dowling, James	1,193
Crooks, W. J.	1,222	Dowling, W. E. H.	589
Cross, George	20	Downing, R. W.	234
Cross, James	1,291	Downing, Sampson	46
Crossley, Abraham	321, 473, 928, 931	Doyle, Patrick	1,267
Crossley, William	361	Drew, George C.	554
Crouch, Maria	526	Dronfield, John	543, 566, 597
Crowley, Mary A.	1,183	Drury, Arthur E.	1,001
Crowther, William E.	33, 420	Duckett, William	280
Cryer, Thomas	963, 967, 968, 969, 1,020.	Duerr, George	350, 374, 452
Curnow, John	101, 152	Dumas, James	10
Currie, Adam	169	Duncan, Esdaile	1,088
Curtis, C. H. O.	783	Duncum, Joseph E.	244
Curtis, John C.	768	Dunkin, W. J.	449
Cuthbertson, Josh.	808, 816	Dunman, Thomas	525, 758
Dalley, Henry	538	Dunn, A. McF.	1,121
Dangar, Rev. J. G.	128	Dunn, George S.	806, 821
Daniel, Rev. Evan	758	Duxbury, J. H.	355
Daphne, W.	844	Dwyer, R.	1,177
Davenport, Thomas	30	Dye, William	214
Davey, W. C.	864	Dyer, Bernard S.	518
Davidson, J. M.	1,263	Dyer, Frederick	416
Davidson, W. W.	1,263	Dyke, Edwin G.	59
Davies, Alfred T.	58	Ealden, J. M.	597
Davies, Edward	388	Easterbrook, J.	539
Davies, G. W.	30, 32	Easton, H.	770
Davies, John	1,027	Eaves, J.	21
Davies, S. W.	583, 592	Eddy, Henry	50, 53, 62
Davis, Miss B.	168	Edgecombe, G. H.	110, 111
Davis, Thomas	800	Edwards, C. W.	257
Davison, William	22	Edwards, S.	405
Davy, William	536	Eld, Rev. F. J.	871
Dawkins, W. W.	322	Elderkin, B.	162
Dawson, George	367	Eldridge, W. H.	212
Dawson, James	1,103	Ellercamp, H. G.	275, 573, 779
Dawson, Samuel	367	Elliott, Thomas	402
Dean, John	382, 453, 469	Elliott, Torrens	1,203
Dearsley, H.	543	Elliott, W. D.	944, 947
Debnam, Alfred R.	108, 146	Elliott, W. J.	1,179
Dedman, J. C.	852	Ellis, Alfred	282, 306
De Gruchy, F.	915	Ellis, R. H.	822
Denison, G. T.	85	Elton, Samuel	167
Dennis, George A.	188	Eltoft, Thomas	552, 593, 615
Dennison, Benjamin	657	Eltringham, W. T.	669, 671
Denny, John	662	Embrey, George	212, 219, 220
Denton, James	299	Engledow, J. W.	614
Denyer, Alfred	2	Enright, J.	558
De Pennington, J.	445	Ensor, Edward	211, 218
Derrick, F. W. B.	635	Erskine, Alexander	1,200
Devine, M. J.	1,186	Ettock, John	327
Devlin, John	1,223	Evans, F.	389
Devonshire, J. H.	573	Evans, G. A.	204
Dewar, E. P.	1,215	Evans, H. T.	1,032
Dewhurst, H. T.	481	Evans, Richard	640
Dibdin, Henry	714	Evers, Henry	142
Dick, A. H.	1,108	Ewart, E. B.	389
Dickie, Hugh	1,078	Exley, John	300
Dishart, W.	22	Fairchild, John	694
Dittmar, W.	1,101	Fairman, J. B.	256, 257
Dixon, Alexander C.	802, 840, 842	Fairmaner, W.	579, 580, 581
Dixon, E. M.	1,107	Farlie, J. B.	308
		Farnfield, Samuel	773
		Farnsworth, Edwin	1,009

Science Teachers to whom Payments have been made—*cont.*

Name.	Number in preceding Table.	Name.	Number in preceding Table.
Farrah, W. H.	942	Goffin, R. E. H.	633
Farrar, Edward	899, 921	Goldie, Alexander	1075, 1138
Faulkner, Joseph	564, 775, 781	Goldie, Edward	669
Faunthorpe, Rev. J. P., M.A.	541	Goode, F. B.	723, 724, 824, 826.
Fedarb, E. H.	632		
Fell, John C.	536	Goodman, W.	777
Ferguson, S. H.	1,303	Gordon, F. M.	583
Field, William	749	Gordon, Graham	478
Filer, Charles	600	Gornall, Henry	891, 904, 908
Fisher, Alexander	798	Gorse, Frederic	476
Fisher, Frederick H.	689	Gosling, James W.	112, 115
Fisher, Henry	536	Goudie, Lydia H.	82
Fitzgerald, D.	1,187	Goyer, Abraham	14
Fitzpatrick, Thomas	1,171	Graham, J. D.	1,066
Fleming, A.	473	Graham, Peter	1,288
Foister, J. S.	424, 477	Graham, Rev. T.	558
Forbes, G.	1,101	Graham, Thomas	401
Foreman, Charles	850	Grainger, G. W.	185
Foster, John	29	Grainger, T. A.	789
Foster, Frederick	253	Grant, Alexander	621
Foster, George	323	Grant, James	1,119
Foster, Thomas J.	203	Grant, John H.	344
Foulds, W.	354	Gray, John Y.	1,134
Fowler, Archibald	1,225	Gray, P. L.	242
Fox, John	561	Greaves, J. E. E.	382, 452, 454, 468, 472, 481,
Francis, Edward	80		
Freeman, Alfred	78	Green, J. B.	994
Freeman, G. A.	37, 41, 51	Green, George	976, 977
French, A.	615	Green, W. J.	524
French, Smith	946, 947	Greenhalgh, John	395, 444
Fretwell, R. J.	947	Greenwood, Holmes	310, 311, 373
Froysell, Josh.	389	Gregory, James	394
Fursey, Samuel	36	Gregson, Rev. J.	337
Gahan, Garner	1,191	Griffin, James	277, 287
Gahan, Mary A.	1,191	Griffiths, W. T.	756
Gahan, Michael	1,191	Grigsby, W. S.	309
Gallagher, Francis	1,251	Grimshaw, John	312
Galt, John	1,060, 1,099	Grindle, Thomas	407
Galloway, Jesiah	917	Groves, Rev. C. W.	552
Gamwell, William	946	Groves, Richard C. W.	125, 129
Gane, William	504	Grubb, A. G.	1,134
Garaway, Francis	1,047	Grubb, W. M.	1,081
Gardiner, Thomas	793	Gunn, A.	754
Gardner, Henry	517	Guthrie, James	86, 87
Gardner, John	336, 444	Guy, G. H.	57
Garrett, C. W.	606	Gwinnell, W. F.	293, 537
Gasson, F. G.	63	Haigh, John	1,013
Gaud, John H.	150	Halfhead, T. W.	360
Gaunt, James	966	Hall, Robert E.	106
Gautrey, Thomas	1	Halstead, Alfred	347
Gay, Francis	114	Hamilton, John	1,240
Gayne, A. J.	237	Hamlyn, Edwin	138
Gee, William	410	Hammonds, E.	759
Genner, Benjamin	664	Hamlet, W. M.	644
Geoffroi, H. M.	54, 72	Hampton, J. H.	1,163
George, Thomas	847	Hams, John	18
Gerald, Alexander	1,056	Harbison, M.	1,265
Gibson, John W.	1,128	Hardcastle, W.	891
Gibson, Greenwood	448	Harding, F. G.	49
Gibson, G. H.	487	Hardman, John	398
Gibson, Thomas	431, 471	Hardy, James	597, 615
Gibson, W. H.	460	Harford, Andrew	686
Gilbert, H.	380	Hargreaves, John	708
Gilbert, R. M.	294	Hargreaves, Thomas	314
Gill, John (Helston)	45	Harland, Arthur	583
Gill, John (Cheltenham)	218	Harnett, Rev. F. W.	14
Gill, L. W.	880	Harper, E.	803
Gillespie, James	1,255	Harrington, Michael	1,192
Gillott, Miss M.	541	Harris, A. C.	260
Gilmore, R. M.	1,262	Harris, George S.	596
Gittings, Albert	866	Harris, Henry	512
Glover, A. W.	4, 7, 12	Harris, Jesse	544
Goddard, J.	500	Harris, Joseph	1,051

Appendix B.

LIST OF SCIENCE TEACHERS.

Science Teachers to whom Payments have been made—*cont.*

Name.	Number in preceding Table.
Harris, Moses	1,051
Harris, R. F. P.	965, 968
Harris, Robert	405
Harris, W. J. P.	969
Harrison, Josh.	883, 886, 902, 912, 950, 984, 992, 1,011.
Harrison, Thomas (Hull)	944
Harrison, Thomas (Belfast)	1,209
Harrison, W. H.	701
Harrison, W. J.	491
Harte, John	613, 757, 774. 783.
Hartley, J. J. E.	296
Hartley, P. G.	966
Hathaway, F.	834
Hatt, Frederick	15
Hatton, G. H.	607
Havell, C. R.	8
Hawking, W. T.	69
Haworth, George	506
Hayes, Charles J.	520
Haynes, S.	865
Hays, George	769
Hayter, T. G.	665
Headen, W. P.	1,168
Heagan, Robert	1,275
Heald, J. T.	313
Heap, C. J.	839
Heather, Henry	793
Heaton, John	905
Henchie, E. J.	633
Henderson, Annie	171
Henderson, John	1,123
Henry, William	1,158
Henshaw, F.	763
Hepworth, James	493
Hepworth, John	269, 271
Hernaman, J.	774
Hewison, Rev. G. H.	1,024
Heywood, W. W.	82
Hick, Thomas	891, 892
Hick, Thomas	966
Hickin, Henry	566, 587
Higginson, John	1,223, 1,229
Hill, H. G.	209
Hill, Rev. J. H.	405
Hinchliffe, James	358
Hinde, H. R.	728
Hines, E.	545
Hinton, R. W.	574
Hiorns, A.	820, 825
Hirst, W. H.	471
Hiscox, G. D.	13
Hitchings, John	112. 142
Hobbiss, H. J.	1,007
Hobson, Amos	617
Hobson, J. B.	408
Hobson, Rev. E.	759
Hockey, Alfred K.	587
Hocking, E. C.	192
Hodgetts, W.	862
Hodges, Louis	489
Hoffert, Henry	156, 161
Hogg, Walter	1,028
Holden, Frederick	442, 443
Holding, Alfred	199, 202, 546
Holding, Thomas	547, 570, 627
Holland, Abraham	895
Holland, Thomas	232, 233
Holmes, Emily	955
Holmes, Thomas	1,013
Holmes, William	1,290
Holroyd, John	680
Holt, Alfred	736
Holt, George	748
Hood, W.	975
Horn, Joseph	848
Horrox, W.	98
Horsman, T.	966
Houghton, C. J.	871, 874
Houghton, James H.	513
Houldsworth, B.	1,014
House, Joseph	533
House, J.	552, 739
Howard, John	562
Howard, Nathaniel	527, 614, 620
Hudson, John H.	438
Hudson, Robert S.	55
Hughes, E.	1,041
Hughes, Hugh	390
Hughes, W. H.	518, 554
Humberstone, F. W.	837
Hunt, Robert	561
Hunter, Robert	1,208
Huntington, A.	141
Hurley, Timothy	1,192
Hurrell, M. H.	148
Hurst, W.	23, 24
Hutchinson, C. W.	164
Hutchinson, W.	751
Hutton, George	694
Illston, George A.	989
Ilott, Herbert J.	296
Inch, Henry A.	553
Ingham, William	1,026
Innes, J. B.	1,148
Isaac, J. W. H.	47
Isherwood, H.	329
Isherwood, Thomas	329, 339, 358
Ison, Edwin	961
Jackson, John	25
Jackson, Miss C. T.	851
Jackson, R.	430
Jackson, T. S.	1,279
Jackson, William	503
Jacobs, William	973
Jagger, William	261
Jago, C. S.	140
James, M. H.	941
James, Walker K.	1,089
Jamieson, Thomas	1,038, 1,067, 1,114.
Jarmain, George	922, 940
Jarvis, William	264
Jeacock, J. S.	856
Jeffares, I.	241
Jeffrey, George	1,130
Jeffrey, James	1,103
Jenner, W.	700
Jennings, James (Wanstead)	201
Jennings, James (Oswaldtwistle.)	436
Jerman, Richard	125
Jesseman, A.	523, 543
Jesseman, E.	543
Jesson, George	956
Johnson, C. H.	1,073
Johnson, Benjamin	524
Johnson, Caroline	782
Johnson, J. B.	887, 890
Johnson, John	180
Johnson, Richard	304
Jones, Annie	1,039
Jones, David	1,048
Jones, E.	347

Science Teachers to whom Payments have been made—*continued.*

Name.	Number in preceding Table.
Jones, Francis	405
Jones, J. E.	1,039
Jones, J. T.	523
Jones, John	513
Jones, T. L.	1,035
Jones, Thomas (Manchester)	400, 466
Jones, Thomas (Bury St. Edmunds.)	755
Jones, T. W.	89
Jones, W.	881
Joyce, P. K.	1,161
Kay, James	357
Keast, Archibald	1,045
Kell, James	1,206
Kelly, John	1,172
Kemm, Miss A.	541
Kemp, John	219
Kendall, Harry S.	616
Kendall, Henry	549
Kennedy, Joseph	1,058
Kennedy, Rankin	1,123
Kennedy, Walter P.	1,112
Kenyon, Joseph	877, 889
Kent, William	579
Kent, William H.	623
Kerr, A.	1,090
Kerr, John	1,108
Kershaw, Thomas	318, 427, 471, 913, 940.
Kidson, Enoch	743, 812
Kilvington, William	185
Kimmins, James C.	224
King, Henry	801
King, Mark	308
King, William	250
Kinmond, D. G.	1,076
Kinton, J. Louis	634
Kirby, Joseph	26
Kirkwood, John	1,072
Kitto, Benjamin	56, 70, 71
Kitto, Edward	41
Knaggs, Henry	925
Knight, Henry	515
Knight, J.	704
Knowles, M.	888, 891, 892, 919, 1,021.
Knowles, W. J.	1,197, 1,220, 1230.
Laidlow, J.	756
Laing, Alexander	1,101
Lakin, Robert	423
Lancaster, J.	879
Lancaster, W. J.	807
Landon, J.	844
Lane, E. H.	52
Lane, Thomas	304
Langton, J.	168
Latchford, G. D.	1,177
Lavis, H. J. J.	615
Law, James (Sergeant)	267
Lawson, John	1,096
Lawson, William	539
Leader, L. M.	645
Leadley, L.	891
Leary, T. G.	781
Lee, Albert	332
Lee, G. W.	1,065
Lee, George	653, 661
Lee, Henry (Holloway)	566
Lee, Henry (Richhill)	1,244
Lee, John P.	1,163
Leech, Edwin	434
Lees, Charles	655
Lees, William (Edinburgh)	1,084, 1,092
Lees, William (Wishaw)	1,155
Leipner, A.	208
Lescher, Miss F. M.	383
Lescher, Miss M. A.	383
Letcher, T. H.	40, 61
Lethbridge, E. B.	796
Lethbridge, W. T.	626
Lewis, Edward W.	252
Lewis, Henry	628
Lewis, J. T.	389
Leworthy, George	834
Liddell, Edward	567
Lilley, Joseph	1,232
Lilley, Levi	370
Lindsay, R. H.	940
Lindsay, T. M.	1,216
Linehan, P.	1,287
Litting, G.	255
Lloyd, C. W.	284
Lobban, Alexander	1,056, 1,093
Locke, A. C.	1,004
Lockie, John	1,132
Lofthouse, John	452
Logan, James	1,219
Lomax, Miss E.	383
Long, J.	844
Longstaffe, J.	821
Looman, E.	347
Lord, T.	427
Lovell, John J.	718
Lowe, W. J.	1,264
Lucas, John	433
Lucas, William	132

Appendix B.

LIST OF SCIENCE TEACHERS.

Science Teachers to whom Payments have been made—*continued.*

Name.	Number in preceding Table.
Robinson, John (Cork)	1,178
Robinson, Matthew	1,012
Robinson, Samuel	1,292, 1,293
Robinson, William	654
Robson, W. H.	174, 176
Rodgers, A. E.	507
Roe, R. G.	656, 658
Roe, William	827
Rogers, Tudor	273
Rogers, W. H.	245
Rolfe, Walter	240
Rose, S. B.	16
Rose, Winfred	189
Roser, M.	986
Ross, David	1,096
Ross, J. A. G.	179, 669
Ross, Z. M. H.	1,072
Rostron, Isaiah	325
Rowden, W. T.	668
Rowe, Rev. G.	1,026
Rowland, G. J.	95
Rowland, J. C.	1,029, 1,034
Rudd, Rev. T.	289
Runtz, W.	588
Rushforth, J. T.	989
Ruse, J. F.	136
Russell, Alexander	1,106
Russell, E. T.	1,006
Russell, James H.	386
Ryan, J. F.	649
Ryan, L. J.	1,166
Sampson, James	1,299, 1,307
Sanderson, Newlove	1,005
Sands, Joshua	402
Sandys, A.	651
Santon, William	911
Satterley, Charles H.	102
Saul, Joseph	932
Saunders, James	254
Saunders, John	195, 196, 527, 529.
Savage, Hugh	1,195
Savage, W. A.	1,030, 1,049
Savill Arthur S.	399, 415
Sayle, James	328
Scaping, Zebedee	945
Scarf, Isaac	582
Scargill, Edward T.	585
Schofield, Enoch	363
Schofield, John	914
Schofield, Rev. Joseph	891
Scholfield, W. E.	377
Scotson, James	407
Scott, John	1,252
Scott, Walter	667
Scully, Richard	772
Seabrook, William	660
Searle, John	516
Seddon, Edward	428
Seddon, W. J.	694
Selby, Joseph	686
Semmons, William	385
Senior, William Clare	1,023
Sergeant, George H.	280
Sergeantson, Rev. J. J.	736
Severs, George	883, 891
Seward, William	1,031
Seymour, Philip W.	538
Shackleton, John	361, 960
Shardlow, J. Thomas	97
Sharman, Daniel	940
Sharpe, C.	239
Sharrocks, John	349
Shaw, Roger	732, 750
Shearer, George	385
Shekelton, W. A.	1,159
Shellard, Albert E.	722
Shelmerdine, Jesse	663
Shelton, J.	271
Shepherd, John	1,058
Sheppard, William	125
Shipman, Charles	190
Shirley, John	804
Shore, Thomas W.	241
Shorthouse, E.	807
Simmons, Charles	405
Simpson, Alfred	946
Simpson, Bentham	519, 552, 765
Simpson, James	1,104
Simpson, John (Freemantle)	235
Simpson, John (Belfast)	1,201
Singleton, Henry	885
Skewes, Edward	67
Skillen, H. A.	1,221
Skinner, W. E.	543
Slade, James	536
Slatter, G. W.	919, 1,164
Slingo, William	628, 757, 791
Smart, Henry	239
Smeeth, Rowland	1,212
Smeeton, James	490
Smith, Albert	285
Smith, Alfred F. (Borough Road.)	768
Smith, Alfred F. (Birmingham.)	821
Smith, Alfred H.	210
Smith, Charles J.	540
Smith, Eli	333
Smith, Esau J.	981
Smith, George Thomas	3
Smith, Henry	417
Smith, James	14
Smith, Jessie	963
Smith, John (Sunderland)	175, 178, 184
Smith, John (Nottingham)	683
Smith, John, (Retford)	688
Smith, John R.	575, 764, 785
Smith, John T.	329, 438, 439
Smith, Paul L.	223, 225, 226, 227, 228.
Smith, Robert	73
Smith, W. J.	32
Smith, William	561
Smyth, Andrew	1,170
Smyth, G. G. J.	1,163
Snell, John	41, 68
Snowden, Henry	384
Snowdon, W. J.	1,276
Snoxell, Emanuel	604
Somerscales, Francis	947
Sothern, Jane	934
Southerton, R.	21
Southwick, Thomas	752
Sowden, John	893
Spafford, C. S.	943
Spare, Walter	198
Sparkes, A. L.	727, 740
Speaight, Annie	552
Speers, Adam	1,261
Speers, Robert	1,210
Speight, Christopher	315
Spencer, Edward F.	550
Spencer, James	951
Spenser, Frank H.	684
Spittal, James	1,136

Science Teachers to whom Payments have been made—*continued.*

Name.	Number in preceding Table.
Spriggs, Christopher	338, 401
Staines, Lawrence	494
Stamp, Arthur	33
Stanfield, H.	268
Stanger, J. W.	290
Stanier, W. H.	852
Stanley, Miss C.	541
Stansbie, J.	819
Stanton, George	695
Start, Thomas W. K.	405
Steele, Frances A.	782
Stenhouse, Thomas	475, 928
Stephens, Henry	608
Stephenson, W.	946
Stevens, John	1,127
Stevenson, Andrew	966
Stevenson, James	1,121
Stevenson, John	1,108
Stevenson, J. McN.	1,217
Stevenson, R. J.	1,141
Stewart, Andrew	1,129
Stewart, J. H.	1,165
Stewart, Robert	321
Stewart, William (Buckie)	1,070
Stewart, William (Paisley)	1,139
Stockdale, Thomas	366

Appendix B.

LIST OF SCIENCE TEACHERS.

Science Teachers to whom Payments have been made.—*continued.*

Name.	Number in preceding Table.	Name.	Number in preceding Table.
Wakeham, James	335	Whitman, Thomas	650
Walbank, Joseph	926	Wickham, A. E.	764
Walbank, T.	75	Wigley, T. B.	819
Walke, A. J.	597	Wilcher, Henry	265, 274
Walker, George	1,236	Wild, John	382, 455, 481
Walker, James	629	Wild, Robert	619
Walker, Joseph	731	Wilde, Samuel	495
Walker, Samuel	873	Wilkinson, H.	819
Walker, Thomas	751	Willcock, Christiana	966
Walkley, William H.	690	Williams, Charles	120
Walmsley, John	368	Williams, J. (Swindon)	852
Walsh, James	356	Williams, John (Camborne)	38
Walton, James P.	88	Williams, John (Swansea)	1,050
Walton, Thomas	946	Williams, John (Wolverhampton.)	751
Walton, William	184	Williams, Joseph	857, 859
Ward, George	966	Williams, T. M.	1,268
Ward, John	944, 946, 947	Williams, W.	1,046
Warren, J. S.	65, 118, 134	Williamson, F. H.	756
Waters, Thomas	924	Williamson, W. A.	1,137
Watson, Adam	27	Wilson, Andrew	1,084
Watson, George	1,152	Wilson, Annie	1,052
Watson, Hugh	993	Wilson, Benjamin	521
Watson, James (Penketh)	441	Wilson, E.	683
Watson, James (Poyntzpass)	1,242	Wilson, Francis	1,147
Watson, Matthew	894	Wilson, G. J.	652
Watson, William	1,243	Wilson, Samuel	76
Watters, Thomas	1,277	Wilson, W.	331
Watts, Arthur	170	Wilson, W. J.	536
Watts, W. A.	401, 455, 482	Windass, John	997, 1,024
Watts, W. M.	915	Windle, John	100
Way, G. A.	711	Winfield, Rev. B.	412
Way, W. C.	186, 673, 676	Winson, Walter	82
Weall, Kate	411	Winterbottom, D.	429
Webb, Alfred	488, 501	Witton, J. C.	378
Webb, F. J.	137	Wodehouse, Joseph	48
Webb, George	295	Wood, Philip	1,086
Webb, James	92, 991, 1,000, 1,006.	Woodcock, Charles	738
Weblin, William T.	590	Woodcock, F. W.	344
Webster, G. E.	84	Woodhead, Edmund	399, 412
Weedow, Joseph	35	Woods, J. W.	696
Welch, Charles	308	Woodward, C. J.	821
Welch, G. W.	954	Woodward, W. J.	712
Wellington, W. H.	42	Woolfenden, Thomas	456
Wells, William G.	522, 530	Woolner, Henry	698
Welsh, James	208	Woolnough, A.	646
Wensley, George	351	Wonnacott, J.	122, 135, 143, 144, 145.
West, John	944, 946, 947	Wren, J. W.	293
West, William	537, 593, 597	Wright, James	28, 388
Westmoreland, J.	683	Wright, J. D.	647
Wheadon, W. B.	158, 721	Wright, J. T.	258
Wheatley, W. H.	1,084	Wright, J. R.	432
Wheeler, Alfred	848	Wright, Macauley	907
Wheeler, F. F.	212, 213	Wright, Thomas	195
Wheeler, Moses	73	Wroe, James	360
Whitaker, James	987	Wyld, Samuel	509
White, C. W.	283	Yates, W. F.	36
White, George	759	Yeoman, J. M.	743, 805, 832, 835.
White, Henry	747, 825	Yerbury, Walter	194
White, J.	952	Yewdall, J. H.	993
White, T. F.	137	Young, Frank W.	1,065, 1,080
White, William	1,213	Young, John	1,103
Whitehead, A. E.	90	Young, W. S.	600
Whiteley, James	510	Youngman, H. S.	586, 601, 789
Whitford, William	1,214, 1,227		
Whitman, H. J.	556		

15. LIST OF SCIENCE SCHOOLS CLOSED FROM MAY 1875 TO MAY 1876.

Place.	School.
ENGLAND AND WALES.	
Aberdare	National School, Cardiff Street.
Aberdovey	Schoolroom.

GRANTS in AID of the ERECTION, ENLARGEMENT, or PURCHASE of BUILDINGS for SCHOOLS of SCIENCE AND ART.

GRANTS IN AID OF BUILDINGS.

Report by Major Festing, R.E.

During the past year grants have been made for Art Schools at Worcester and Winchester.

At the former place a building in which the School of Art has been carried on for some years has been acquired by the Committee who have made some alterations and improvements in the building. A grant of 500*l.* was made.

At Winchester a building has been erected by the Corporation on their property. The amount of the grant made was 359*l.* 11*s.* 6*d.*

Applications have been received during the year from the following places :—

Bath.—For an extension of the present building, in which will be Science and Art Classes.

Bewdley.—A building has been obtained which will be altered and partly rebuilt so as to give accommodation for Science and Art Classes.

Kilmarnock.—It is proposed to erect a building for Science and Art Classes.

Selby.—It is proposed to erect a building for an Art School.

Appendix C.

REPORT OF ASSISTANT DIRECTOR.

APPENDIX C.

1. REPORT of the ASSISTANT DIRECTOR for ART on SCHOOLS of ART and ART EXAMINATIONS.

The extension of Art instruction is promoted by regulations under which aid is given:—

First, to Elementary Schools for the Poor where drawing is taught concurrently with reading and writing, and is specially directed to the improvement and refinement of the perceptive powers of the children;

Second, to Diocesan and other Training Colleges, in which the teachers of elementary schools obtain certificates as teachers of drawing;

Third, to Classes for children above 12 years of age and artisans; in these classes the primary instruction of the children is carried further than in the Elementary Schools, and they are associated with adult students in the study of form, light and shade, and linear drawing;

Fourth, to Schools of Art which are entirely devoted to Art instruction, and where the student, after having obtained sound elementary knowledge, pursues the technical study of Art in the direction required by his occupation;

Fifth, to selected students of Local Schools of Art, to enable them to attend the National Art Training School, which is maintained for training Art teachers, designers, and Art workmen.

Elementary Schools.—The number of children under instruction has increased during the year from 387,904 to 460,961, of whom 331,348 were presented for examination. The aid given by the Department amounted to 24,895*l.* 13*s.* 5*d.*, divided among 3,335 schools, an average of 7*l.* 9*s.* 3*d.* per school.

These payments were made under the following rules:—

The payments which may be made on the results of the annual examination are as follows:—

a. 1*s.* for every child in regular attendance upon the ordinary instruction of the day school, who *only gives satisfactory evidence* of having been taught drawing in the school during the previous year.

b. 2*s.* for every such child who shows proof of *proficiency* in one or more subjects of the 1st grade.

c. 3*s.* for every such child who *excels* in one or more subjects of the 1st grade.

d. 5*s.* for every such child who passes in one or more subjects of the 2nd grade. No child is eligible for examination in any subject of the 2nd grade who has not shown proficiency, or excellence, in previous examinations, in *all the subjects* of the 1st grade.

e. 10*s.* on account of every exercise of the 2nd grade satisfactorily worked by a pupil-teacher, or paid monitor, of the day school, who has been taught drawing in that school.

f. 1*l.* for expenses in conducting the annual examination, provided that at least 20 children give satisfactory evidence of having been taught drawing in the school.

By an alteration in the Art Directory future payments will be on the following scale:—

a. 1*s.* for every child who *only gives satisfactory evidence* of having been taught drawing in the school during the previous year.

b. 1*s.* 6*d.* for every exercise of the 1st grade in which a child shows proficiency.

c. 2*s.* 6*d.* for every exercise of the 1st grade in which a child excels.

d. 5*s.* for every exercise of the 2nd grade in which a child passes.

No child is eligible for examination in any subject of the 2nd grade who has not shown proficiency, or excellence, in previous examinations, in *two of the subjects* of the 1st grade.

e. 10*s.* for every exercise of the 2nd grade satisfactorily worked by a pupil-teacher, or paid monitor, of the day school, who has been taught drawing in that school.

f. 1*l.* for expenses in conducting the annual examination, provided that at least 20 children give satisfactory evidence of having been taught drawing in the school.

A list of the schools aided and the results obtained in them are given in Table A., p. 228.

Training Colleges.—Alterations made in the Art Directory have considerably increased the encouragement given to instruction in drawing in these colleges, the payments having risen from 485*l.* 10*s.* to 1,285*l.* as shown in Table B., p. 340.

The rule that—

"A payment of 2*l.* is made to the authorities of training colleges on account of *every resident student* who obtains the certificate D. of the 2nd grade, subject to a deduction of 10*s.* on account of each of the required subjects in which the student may have passed previous to admission to the college,"

was altered to—

"10*s.* will be paid to the authorities of training colleges for *each exercise* of the 2nd grade successfully worked by a resident student in subjects in which the student has not previously passed."

Art Classes.—The definition of these classes has been altered from—

"An Art Night Class is a class for instruction in elementary drawing held after 6 p.m., to which the public is admitted on payment of fees within the reach of persons who support themselves by manual labour."

to—

"An Art Class is a class for instruction in elementary drawing."

The results of the instruction given in them are stated in Table C, p. 342, and show a continued increase in the numbers of classes and students and in the amount of payments earned.

This table is followed at p. 372 by a list of teachers to whom prizes have been awarded under the following rule:—

"Prizes consisting of—

One sum of 20*l.*,
Ten sums of 10*l.*,
Forty sums of 5*l.*,

will be awarded to the head masters of Art Night Classes in which the results, as tested by the examinations of the Department, and considered with reference to the number of students under instruction, shall be most satisfactory."

This rule has been superseded by one allowing—

"Twenty shillings, or a sum in proportion to the works sent up, but not exceeding 20*s.* on account of every industrial student who shall

Appendix C.

REPORT OF ASSISTANT DIRECTOR.

submit satisfactory works executed in the class during the previous year, in drawing, painting, modelling, or designing for architecture, manufactures, and decoration, in advanced stages of instruction."

A grant of—

"Two pounds for the clerical labour of making the necessary returns, filling up forms, incidental expenses, &c., when 20 or more students pass either in Science or in Art, or in both; or 1*l.* when less than 20 students pass," has been withdrawn, and a moiety of the allowance made to special local secretaries is now required to be paid by the local committees of the schools in populous districts for the examination of which their appointment becomes necessary.

Science Classes.—Table D. p. 374, gives the amount of payments to these classes for success in such of their studies as admit of the exhibition of artistic skill.

A number of schools ineligible to receive direct aid by payment of grants from the Department have been examined with the results shown in Table E., p. 377.

Schools of Art.—Abstracts from the reports by Committees of Schools of Art extend from p. 379 to p. 445. They are followed by Table F. giving the results of the examinations, and by Table G., showing firstly; the total income of each school made up of subscriptions, fees, and grants, and secondly; the total aid given to each school by the Department, which includes grants in money, aid towards the cost of examples, and prizes. The totals of Tables F. and G. indicate that these schools are firmly established and steadily progressive.

Table H. shows the large number of persons that are instructed in Art by teachers in connexion with the Department, and the number of students of schools of various classes which contribute to this total.

Table I. is a summary of the aid given towards the cost of their instruction.

A list of Schools of Art aided by Building Grants is given at p. 458, Table J.

The details of prizes given for success in all branches of Art instruction are stated at p. 458. The total cost is 5,703*l.*, of which 1,940*l.* is incurred for children of Public Elementary Schools.

The works and exercises of Schools of Art and Art Classes are now submitted to the examiners under monograms instead of under the names of the schools and students, so that equal standard of award may be maintained in all schools.

National Competition of Schools of Art.—The report of the examiners on the highest productions of the schools given at p. 461 indicates the position which has been reached by the Art instruction of the schools. A list of successful candidates is given at p. 463.

The Princess of Wales Scholarships have been awarded to Miss Lydia Habershon of the Sheffield School of Art, and Miss Maria Prevost, of the Lambeth School of Art.

The list of masters of Schools of Art who have obtained prizes on the general result of their instruction is given at p. 469, followed by a table showing the distribution of these prizes since their institution in 1868. These prizes will not be given in future years, the following alterations in the Art Directory substituting other payments for them.

The prizes, consisting of—

One sum of 50*l.*
Three sums of 40*l.*
Six ,, 30*l.*
Twenty ,, 20*l.*
Thirty ,, 10*l.*,

offered to the head masters of Schools of Art in which the results of instruction, considered with reference to the number of students, as tested by the examinations of the Department, shall be most satisfactory, are withdrawn. The sum of *Thirty* shillings, or a sum in proportion to the works sent up, but not exceeding 30*s.*, on account of every such student who shall submit satisfactory works executed in the school during the previous year in drawing, painting, modelling, or designing for architecture, manufactures, and decoration, has been raised to *Forty* shillings, and the following additional payments are offered on the results of examinations *limited to students in Schools of Art who have previously passed in the four subjects of 2nd grade Art* in local Schools of Art, in the following subjects of the 3rd grade :—

Painting from Still Life.
Anatomy.
Advanced Perspective.
Architecture.
Design.
Drawing from the Antique.
Drawing from the Life.
Modelling ornament (design).
Modelling from the Antique.
Modelling from the Life.

Two pounds for every exercise passed satisfactorily.
Three pounds for every exercise marked excellent.

Art Certificates of the Third Grade.—A list of teachers who have obtained or increased this qualification is given at p. 473.

The results of the competition for prizes liberally offered by the Worshipful Company of Plasterers are stated at p. 474.

The Registrar's report on the National Art Training School will be found at page 475.

The Head Master of the school having been authorized to visit several continental Art Schools, has made a report which will be found at p. 477.

An extra summary is given at page 457, indicating the progressive increase during the last five years in all kinds of schools and classes aided by the Department.

AWARDS TO TEACHERS OF ART CLASSES.

5. Awards to Teachers of Art Classes, 1876.

The following sums have been awarded by the Lords of the Committee of Council on Education to the Teachers of those Art Classes in which, during the session 1875–76, the general amount of work, as tested by examinations, and having regard to the number of students taught in each Class, was most satisfactory :—

		£

15. Report on the National Competition of the Works of Schools of Art, 1876.

Appendix C

Report of Examiners on Competition for National Medals.

The drawings sent up from Schools of Art for examination have increased from 100,400 in 1875 to 123,800 this year. Of these 1230 were referred to the national competition.

1st Day's Examination.—Figure Drawing and Modelling.

Examiners:

F. R. Pickersgill, Esq., R.A.
W. F. Yeames, Esq., A.R.A.
J. E. Boehm, Esq.
E. J. Poynter, Esq., R.A., Director for Art.
H. A. Bowler, Esq., Assistant Director for Art.

The number of drawings from the life submitted was small, the principal contributions being from Lambeth and Sheffield. An extra gold medal was awarded in this class, and it is hoped that the intended reintroduction next year of the gold medal for life-drawing will stimulate competition in this, the most important branch of figure study.

The antique drawings were very numerous, and on the whole above the average of merit, the best drawings being sent up from Lambeth, Edinburgh, and South Kensington. The gold medal was awarded in this class, and an extra gold medal to a full-size drawing, from Lambeth, of the Fighting Gladiator.

Many, however, of the drawings from the antique show that a trivial and elaborate minuteness of execution has been the aim of both master and student, rather than a proper mastery of form and of the principles of light and shade. Such work being entirely valueless where these more important qualities are not taught, or are misunderstood, cannot be acknowledged as deserving of reward, however much time and labour may have been spent over it. On the other hand, there was a tendency displayed in some of the drawings showing the best understanding of these higher qualities to neglect that neatness and delicacy of execution and completeness of modelling which is an essential part of all thoroughly artistic work.

The modelling exhibited was so inferior that it was impossible to find any work deserving of the gold medal, and the silver medals were awarded rather as an encouragement than on account of the merit of the works. The want of that workmanlike power over the material, which is so noticeable in all French productions of this class, was most conspicuous. As long as this continues a large proportion of the decorative figure or ornament design in relief made for the English market will be in the hands of foreign artists.

Appendix C.

REPORT OF EXAMINERS ON COMPETITION FOR NATIONAL MEDALS.

SECOND DAY.—PAINTING IN OIL AND WATER COLOURS.

EXAMINERS:

F. R. Pickersgill, Esq., R.A.
W. F. Yeames, Esq., A.R.A.
Val Prinsep, Esq., and
The Director and Assistant Director for Art.

The best painting of the group of still life received an honorary gold medal, being executed by a student in training of the Central School.

A good work was again submitted from Lincoln by the student who obtained the gold medal last year, and who could not therefore again receive it: this student obtains this year an extra gold medal for a group in water colour. The work in oil from Sheffield to which the gold medal was awarded as being on the whole the best of those qualified to compete, would have been better had the background been studied from nature as carefully as the objects in the picture. The result is a want of harmony in tone between the background and the group, and consequent failure to produce reality and unity of effect.

To some good works of a smaller size than that presented for the gold medal, silver medals were awarded, and one of these sent up from Portsmouth would have gained the gold medal had it been of the required dimensions. Some works of merit would have been better for a more appropriate selection of materials for the group; others suffered, as in the one already mentioned from Sheffield, through the made-up character of the background. The paintings from Lincoln, though in many respects cleverer than any sent up, were notably deficient in workmanlike execution, and were disfigured by an unmeaning roughness of texture and by a want of perception of the more subtle qualities of form and colour.

With a view to stimulating competition in the higher branches of painting, a gold medal will be in future offered for a painting from the life either from the nude figure or from a head.

THIRD DAY.—DESIGN.

EXAMINERS:

J. E. Boehm, Esq.
Val Prinsep, Esq., and
The Director and Assistant Director for Art.
W. Morris, Esq., was prevented by accident from attending.

The best designs were in the class of patterns for muslins, to which a gold medal was awarded; these showed both taste and originality and great refinement in colour and drawing. A design for iron gates from Westminster was in good style and gained a gold medal. In the designs for carpets there was a signal want of taste; the same monotonous system of harsh contrasts of colour ran through most of the designs, showing a complete absence of perception of the harmonies to be obtained by the alliance and gradations of kindred tints, or of the artistic use of the contrast of colours in themselves agreeable. In the works from Kidderminster too much reliance was also placed on the geometrical arrangements of plant forms taken direct from nature. The

study of natural forms should rather suggest ideas for patterns than, as in this case, be used to supply want of invention. A gold medal was also awarded, as heretofore, to Nottingham for lace design.

FOURTH DAY.

EXAMINERS:

William Morris, Esq.
George Aitchison, Esq.
J. E. Boehm, Esq., and
The Director and Assistant Director for Art.

A gold medal was awarded to Westminster for some designs for painted tiles, showing much originality and ingenuity in arrangement, with good taste and refined feeling for colour. The class of wall paper designs was poorly represented, and showed great want of originality both in idea and treatment. The analysis of flowers is evidently applied wrongly to the treatment of flat decoration; as a means of gaining knowledge of the structure of plants, and so aiding the student in his drawing, and to a limited extent as suggestive of decorative forms, the analysis is of great value, but it is clear that in many cases there is an idea that a flower dissected and arranged geometrically will of necessity produce a good design. The result plainly shows that when the analysis is used to supply the designer with ideas and take the place of natural artistic perception and taste in combination of form and colour, it is more calculated to mislead than to be of use. Some sets of studies done in the South Kensington Museum showed much taste and delicacy of execution, and one set was thought so good that it received the award of a gold medal.

---

16. LIST of STUDENTS rewarded at the NATIONAL COMPETITION, 1876.

STUDENTS REWARDED AT NATIONAL COMPETITION OF SCHOOL OF ART.

GOLD MEDALS.

Name.	School.	Stage.	Subject.
Fisher, Samuel W. .	Lambeth . . .	8 c.	Chalk drawing of figure from the nude.
Goodall, Thomas .	Lambeth . . .	8 b. 2.	Chalk drawing of figure from the antique.
Goodfellow, C. E. .	Westminster (Hide Place).	23 d.	Design for iron gates.
Green, Robert R. .	Westminster (Hide Place).	23 c.	Design for tiles.
*Habershon, Lydia H.	Sheffield . . .	15 a.	Group in oil-colours.
Irwin, Marcella .	Dublin (R. D. S). .	23 c.	Design for muslins.
Logsdail, W. . .	Lincoln . . .	15 b.	Group in water-colours.
Needham, Robert .	Sheffield . . .	23 c.	Design for muslins.

Crawford, Elizabeth M. Sharman.	Cork	14 a.	Painting flowers from nature.
Daintrey, Alice S.	South Kensington	15 a.	Group in oil-colours.
Drew, H. P.	Exeter	23a. (For set).	Architectural drawing.
Elson, Robert	Lambeth	8 c. 23 c.	Chalk drawing of human figure from the nude. Design for linoleum.
Fisher, Samuel W.	Lambeth	16 a.	Monochrome painting of figure from the antique.
Goodfellow, C. E.	Westminster (Hide Place).	23 d.	Design for a gold cup.
Harris, F.	Lincoln	8 b. 1.	Chalk drawing from the antique.
Harrison, Emily	Lambeth	23 c.	Design for tiles.
Hastling, Annie E.	Manchester (R. I.)	15 a.	Group in oil-colours.
Huskinson, John	Nottingham	19 d.	Model of figure from life.
Irwin, Elizabeth	Dublin (R. D. S.)	23 c.	Design for lace.
Jordan, Frances Lydia	Dublin (R. D. S.)	23 c.	Design for inlaid border of a table.
Logsdail, W.	Lincoln	14 b.	Architectural view.
Lovering, Ida	Bloomsbury	8 d.	Chalk drawing of head from life.
McGowan, Wm.	Belfast	23 c.	Designs for backs of watches.
McLellan, Christina.	Bradford (Ch. Inst.)	23 c.	Design for a fan.
Maw, Annie	Derby	15 b.	Group in water-colour.
Montalba, Henrietta	South Kensington	19 d.	Model from nature.
Moore, Madena	West London	8 b. 1.	Chalk drawing of torso from the cast.
Morris, H. A.	West London	23 d.	Design for jewellery.
Parkinson, John William.	Portsmouth	15 a.	Group in oil colours.
Parting, Emma	West London	15 b.	Group in water-colours.
Reason, Florence	Bloomsbury	14 a.	Painting flowers from nature.
Roques, Casimir	Edinburgh	16 a.	Monochrome painting of figure from the antique.
Schafer, H. T.	St. Martin's	17 b.	Painting from life.
Sharples, Kate.	Manchester (R. I.)	15 b.	Group in water-colour.
Thickett, Ernest	Sheffield	23 d.	Design for a cup.
Thomson, William	South Kensington	8 b. 2.	Chalk drawing of figure from the antique.
Watkins, Theophilus	Birmingham	23 d.	Design for jewellery.
Wilde, Arthur W.	Nottingham	23 c.	Design for lace.

BRONZE MEDALS.

Name.	School.	Stage.	Subject.
Adam, Patrick.	Edinburgh	9 a. (For two.)	Anatomical studies.
Anthony, Alfred	Nottingham	10 a. (For two.)	Flowers in outline from nature.
Armstrong, Caroline F. J.	South Kensington	25 c. (For set.)	Design for enamelled casket.
Austin, Emily	Bloomsbury	15 a.	Group in oil-colours.
Barnes, Ellen	Edinburgh	8 b. 2.	Chalk drawing of figure from the antique.

Bronze Medals—*continued.*

Name.	School.	Stage.	Subject.
Bearcroft, E. S.	South Kensington	23 c.	Design for wall decoration.
Bedford, Fred.	Barnsley	23 c.	Design for damask.
Booth, James	Sheffield	8 c.	Chalk drawing of figure from nude.
Bramley, F.	Lincoln	14 b. 8 d. 15 a.	Architectural view. Chalk drawing of head from life. Group in oil-colours.
Broad, Sophia	South Kensington	12 a.	Monochrome painting from cast.
Chambers, John	Nottingham	23 c.	Design for lace.
Corbett, Charlotte	Worcester	15 b.	Group in water-colours.
Coulson, Matthew	Westminster (Hide Place).	23 b.	Design for side of room.
Cruickshank, J. R.	Westminster (Hide Place).	23 c.	Design for tazza.
Daymond, Edwin	Westminster (Hide Place).	23 b. (For set.)	Architectural design.
Davy, Frederick	Ipswich	22 d.	Studies of historic styles of ornament.
Dean, Thomas	Hanley	14 a. (For set.)	Painting flowers from nature.
Edmondson, H. E.	Bradford (Gram. Sch.)	23 c.	Designs for card backs.
Fallon, Sarah	Edinburgh	16 a.	Monochrome painting of figure from the antique.
Fisher, Samuel	Lambeth	8 b. 2.	Chalk drawing of figure from the antique.
Fraser, Edward	Edinburgh	15 b.	Group in water-colour.
Fulton, G. E.	St. Martin's	8 b. 1.	Chalk drawing from the cast.
Gibbons, Francis	Cirencester	23 d.	Design for plaster work.
Glazier, R.	Halifax	23 c.	Design for wall decoration.
Gould, John	West London	19 d.	Modelling from the life.
Hadden, Robert	Edinburgh	12 a.	Monochrome painting from the cast.
Hammond, T. W.	Nottingham	23 c.	Design for damask.
Hanslip, Alice	Bloomsbury	8 c.	Time studies in chalk from life.
Hardisty, John	Manchester (Gram. Sch.).	23 a. (For set.)	Mechanical drawing.
Hoyland, Edwin	Sheffield	23 d.	Designs for scissors.
Humphries, Charles	South Kensington	23 d.	Design for jewellery.
Huskinson, John	Nottingham	19 b.	Model of figure from the antique.
Jackson, Emily F.	South Kensington	15 b.	Group in water-colours.
Johnston, Annie	Dublin (R. D. S.)	23 c.	Design for tapestry.
Jones, Rowland	Lambeth	8 d.	Chalk drawing of head from life.
Kennington, T. B.	Liverpool (S. D.)	8 b. 2.	Chalk drawing of figure from the antique.
Kingston, W. T.	Leeds (M. I.)	23 c	Design for a fan.
Lambert, Lizzie	Dublin (R. D. S.)	23 c.	Designs for muslins.
Ledward, R. A.	Burslem	20	Modelling foliage from nature.
Liggett, Israel R.	Nottingham	22 c.	Filling spaces in colour.
Macleod, Mary.	Manchester (R. I.)	14 a.	Painting flowers from nature.
Manning, Mary R.	Dublin (R. D. S.)	8 b 1.	Chalk drawing of details from the cast.
Miles, Pauline	Gloucester	15 b.	Sketch of interior of room.
Millar, Henrietta	South Kensington	16 a	Monochrome painting of figure from the antique.
Morgan, Jessie	Newcastle-under-Lyme	23 c.	Designs for plates.
Murray, Thomas	Macclesfield	23 c.	Design for damask.
Noke, Edward	Worcester	14 a.	Painting flowers from nature.
O'Keefe, P.	Westminster (Hide Place).	23 b. (For set.)	Design for doorway and grille.
Pattison, C. H.	Coventry	10 a.	Flowers in outline from nature.
Platt, Walter	Great Yarmouth	23 c.	Design for tiles.

18. AWARDS to MASTERS and MISTRESSES of SCHOOLS of ART.

AWARDS TO MASTERS AND MISTRESSES OF SCHOOLS OF ART IN 1876.

In accordance with the principles laid down by the Minute of the 19th February 1868, and having regard to the number of students taught in each School, the following sums have been awarded by the Lords of the Committee of Council on Education to the Head Teachers of those 60 Schools of Art in which the general amount of work, as tested by examinations, was relatively most satisfactory :—

		£
Andrew F. Brophy	Westminster, Hyde Place	50
John Sparkes	Lambeth	40
Edward R. Taylor	Lincoln	40
Louisa Gann	Bloomsbury	40
John S. Rawle	Nottingham	30
Joseph Harris	Salisbury	30
William Cox	Sheffield	30
William Tucker	Kidderminster	30
C. D. Hodder	Edinburgh (Male)	30
David W. Raimbach	Birmingham	30
George A. Stewart	West London	20
Alfred A. Bradbury	Hanley	20
Z. Pritchard	Manchester Gram. Sch.	20
W. J. Muckley	Manchester Royal Inst.	20
James Wallace	Berwick-on-Tweed	20
Robert Greenlees	Glasgow	20
Andrew Stevenson	Leeds	20
W. H. Stopford	Halifax	20
Alexander Fisher	Brighton	20
R. Edwin Lyne	Dublin, Royal Dublin Soc.	20
Geo. A. Illston	Rotherham	20
Robert Clough	Saltaire	20
W. C. Way	Newcastle-on-Tyne	20

Appendix C.

AWARDS TO MASTERS AND MISTRESSES OF SCHOOLS OF ART IN 1876.

		£
Albert Hodder	Worcester	20
George Ryles	Warminster	20
J. Bentley	Birkenhead	20

PRIZES OF THE PLASTERERS' COMPANY.

21. PRIZES of the PLASTERERS' COMPANY, 1876.

The Worshipful Company of Plasterers, London, offered the undermentioned prizes to be competed for by students in Metropolitan and Provincial Schools of Art in connexion with the Science and Art Department:—

I.—MODEL IN PLASTER.

For an ornamented capital of a pilaster 16 inches high, including the abacus and neck moulding, 12 inches wide at the necking, and 3 inches projection from the wall. To be designed and modelled by the competitor. The subject must be original, and any style may be chosen.

First Prize, 7*l.* 7*s.*, awarded to William J. Merritt, of the National Art Training School.

Second Prize, 4*l.*, awarded to John Huskinson, of the Nottingham School of Art.

II.—A DESIGN IN MONOCHROME.

An original design for the entablature of a room, including architrave, frieze, and cornice, of which the ornamental frieze, not less than 12 inches wide, is to be the principal feature. A portion of the ornamented soffit must also be shown, full size, in plan, and a profile of the whole either full size or to a convenient scale. The whole work must be drawn on one imperial sheet.

First Prize, 8*l.* 8*s.*, awarded to Francis Gibbons, of the Cirencester School of Art.

Second Prize, 5*l.* 5*s.*, awarded to Edward Gibbons, of the National Art Training School.

These prizes are open to all students in the Provincial or Metropolitan Schools of Art, including artisan classes in those schools; but the first and second prizes in either case cannot both be taken by students of the National Art Training School at South Kensington.

The models and designs remain the property of the competitors, but the Plasterers' Company reserves the right of taking copies of them should it be thought desirable.

22. Report of the Registrar on the National Art Training Schools.

Sir,

I have the pleasure to submit my report on the National Art Training School for the year ending 31st July 1876. I am happy to say that it exhibits a steady maintenance of its attractiveness and efficiency. In the period over which this report extends, from 1st October 1875 to 31st July 1876, the number of "*students in training*" receiving instruction has been 36, and of "*national scholars*" 16. These besides being free students receive weekly allowances varying from 10*s.* to 30*s.*

During the year the Art Schools at Edinburgh, Birmingham, Nottingham, Wolverhampton, Kidderminster, and Stafford, have received the temporary assistance of teachers from the Training School, and Art Masters have been appointed from its classes to the schools of Stroud, Dollar, and Edinburgh, during the same time.

One student in training has retired from the class receiving allowances.

During the year the Art Schools of Brighton and Dundee have each sent one student to the class of students in training, and the school at South Kensington has contributed three, making a total of five received into the class in the year.

The Art Schools of Birmingham, Hanley, Belfast, and South Kensington have sent each one national scholar to the school during the year.

Seven students in training have been engaged in giving instruction in district schools and elementary day schools in London, as a part of their training. Four national scholars have left, their time having expired. One went to an engagement as designer for textile fabrics, one as modeller and designer for metal work, and two are engaged as general designers on their own account.

A total number of 100 students have attended the schools without payment of fees; these have consisted of 36 students in training, 13 national scholars, 28 who had won free studentships by obtaining medals in the annual national competition, or by passing examinations of the highest grade; and also of students formerly in training, and ex-national scholars 21 men of the Royal Engineers have received free instruction, and 20 students have been admitted on payment of "half-fees."

The number of individual students of all classes attending the schools during the year has been 843, of these 373 were males, and 470 females. The total amount of fees paid by them was 3,500*l.*; of this sum 276*l.* 16*s.* was paid by evening students only, and the balance, 3,223*l.* 4*s.*, by day students.

The schools were open for study 203 days during the year; the smallest attendance recorded being 38 on the 1st October, and the largest 487 on the 16th June 1876. The total number of attendances on the 203 days was 75,295, the average daily attendance 370. These numbers, as compared with last year, show an *increase* of 808*l.* 14*s.* in fees, of 89 in number of students, of 10,855 in the total number of attendances, and of 53 in the average daily attendance.

In the annual National Competition of 1876, the general or fee-paying students of these schools won 3 silver medals, and 9 bronze medals, 9 Queen's prizes of books; besides 123 prizes of books in the Local Competition. The students in training and the national scholars won in the same competitions 2 gold medals, 3 silver medals, 6 bronze medals, and 2 Queen's prizes of books; making a total of 2 gold medals, 6 silver, and 15 bronze medals, 11 Queen's prizes of books, and 123 local prizes, won by the students in these schools.

Appendix C.

NATIONAL ART TRAINING SCHOOLS.

At the 2nd grade examination in May last, which consists of examinations by printed papers in geometry and perspective, and exercises in freehand and model drawing, 87 students "passed," 29 won "prizes," and 20 students obtained certificates of the 2nd grade.

At the 3rd or highest grade examinations 28 students of this school obtained the teacher's certificate.

Of the annual prizes of 25*l.* in value, offered by the Worshipful Company of Plasterers, one of 7*l.* 7*s.* was awarded to W. Merritt, and one of 5*l.* to Edward Gibbons, students of this school.

Of the annual prizes offered by the Worshipful Company of Goldsmiths, the 1st, of 50*l.* was taken by J. Watkins, and two others of 25*l.* each, were taken by W. Marshall and J. Eyre, national scholars from this school.

A prize of 5*l.* was offered by Dr. Zerffi for the best design for a salver and jug, decorated in the Assyrian style, and was awarded to G. Morton, student of this school.

On an average 5 students have attended the Etching Class under the instruction of Mons. Legros.

I have the honour to be,
Sir,
Your most obedient servant,
R. W. HERMAN,
Registrar.

To the Director for Art,
Science and Art Department.

REPORT BY MR. SPARKES.

23. REPORT of the HEAD MASTER of the NATIONAL ART TRAINING SCHOOLS on his visit to the ART SCHOOLS of BELGIUM and DÜSSELDORF.

SIR, October 1876.

I HAVE the honour to submit the following Report of my visit to Belgium and Düsseldorf, whither I went, at your request, to inspect the Art Schools with the view of obtaining such information as might serve as a commencement of a comprehensive Report on the foreign system of Art Instruction.

I went to Antwerp, Ghent, Brussels, Dinant, Namur, Liege, Düsseldorf, and Cologne, and saw Art Schools in all those towns, though, with the exception of Antwerp and Düsseldorf, the students were in vacation. Hence the observations I have to make are often founded on the statements of professors, and a close inspection of the drawings, and not always from actual personal intercourse with the students.

The whole of the Belgian system of art instruction has a certain resemblance, whether it is practised for the development of artists or those who practise industrial art. These resemblances may be tabulated thus :—

1. Gratuitous instruction.
2. Compulsory attendance of all who join the classes.
3. Elementary and advanced classes in all the sections.
4. For men only.
5. The working time is for six months in the year only.
6. A fixed time for the completion of each exercise.
7. A fixed time for a student to remain in any one section.

The above principles are common to all schools, and they have but little modification and expausion even in those schools where High Art is the subject principally taught.

The schools are supported from three different sources. The Government, the Commune, and the Province all contribute to their mainte-

nance. The Municipality provides the building, the Government and Province contribute money for the professors' salaries and for exhibitions for students. Teachers are appointed in some towns by the Municipality, in others by the State. The higher professors and directors are Government appointments.

All schools are under Government inspection and are nominally under a Government system, but considerable room is left for development to meet local necessities and the views of individual professors. The only school really formed on the Government model is that at Ghent; all the others are so modified by the above-mentioned influences as to be in great measure the product of the localities where they exist.

Prizes, which are chiefly honorary, are awarded by a jury of professors and local artists and members of the municipal body. They all have a local character except those granted by the State, as exhibitions and travelling studentships, to the Schools of Fine Art.

The courses are graduated, but the students pass from one grade to another at the will of the professors.

Examinations in theoretical subjects take place annually, and usually theory and practice are taken together in order to come to a decision on a student's position, so that clever handicraft in drawing is not allowed to come to the front if it is not also associated with sound reading.

Antwerp.

To take the schools more in detail, Antwerp is a Royal Academy of Fine Art, and the instruction is arranged with the intention of developing a painter, sculptor, or architect to the highest point. A section of the work here, however, is applied to the education of ornamentists, chiefly decorators. A student enters for one or the other of these two sections. There is no continuous course of study which leads from one to the other; thus, while in the School of Fine Art ornament and archæology are taught, and in the School of Ornamental Art, in the same academy, figure drawing is taught, it is always understood and kept in view that in one case it is ornament for artists, and in the other, that it is figure study for the decorator that is given.

The elementary classes corresponding with our artizan art classes meet only in the evening, from October till April. The Fine Art classes are open from October till August. April and September are months of vacation.

In this section the daily work is from 6 in the morning to 5 in the afternoon in summer, and from 9 in the morning to 8 in the evening in winter.

In the course of study for ornament, the students begin by copying an outline of ornament, and proceed to copy an example of shaded ornament with black and white chalk, and carry on this method of copying from the flat until they pass into the class of mural decoration. Here they are required to form compositions of ornamental forms for decorations, and in the same course to copy white casts of ornament on a large scale; the power of imitating the whiteness of the cast being much prized.

The whole plan of instruction does not run into figure work, except so far as an ornamentist requires a knowledge of the figure. The ultimate practical product of this school is not such as to justify any imitation of it in this country.

In the Fine Art Section there are three courses of figure instruction; the elementary, the middle, and the advanced.

The course of figure drawing is commenced by outlining drawings from rather coarse but strongly drawn lithograph copies of heads, masks,

Appendix C.

REPORT BY MR. SPARKES.

or extremities, always the size of life. In these examples everything is very strongly expressed. The second step in this course of outline is where the student draws the whole length figure, still from the copy in outline, on which the proportions are marked; while still in the elementary section the student copies a drawing of a head, or torso, done by some past student or perhaps a professor, with the view of learning the quickest method of laying in a drawing. Therefore the stump is employed with a restricted use of chalk added to it, but nothing like our method of "stippling" is permitted, and the head is treated in the largest, broadest method of light and shade; no reflections are represented, and only the largest half tints are expressed. It is an exercise to help the student to master his material, while at the same time he learns to see the model in its simplest masses.

The middle course is now taken up. In the lower section of this course the student draws from casts of masks and parts of faces, limbs, hands and feet, and groups are made up of these. The torso and full bust are the middle section of the middle course.

The principle of having a fixed time for each exercise is strictly carried out, and each object or group of objects is changed every week.

The advanced section of the middle course is drawing from the whole antique figure; each figure is placed for eight days, and is worked at two hours every day; therefore 16 hours is the whole time allowed for the completed work. The exception to this is only when figures are drawn for competition, then 20 hours are allowed, the additional time being given in consideration that the student receives no advantage from the professors' supervision.

A time limit is imposed on students in this section; that is to say, if they are not passed on into the highest class in two years it is assumed that they have no strong gift for their profession of painter, and are denied the privileges of the school.

The next step is with the advanced course, where they paint from the life, having either the head or both head and torso. The head is painted in eleven hours; the model sits on two consecutive days for five hours and a half each day. The torso is painted in 20 hours on four days.

In this painting practice the student applies the teaching he has had from the beginning of his career, viz., that form consists not only of outline in profile but in actual projection towards the spectator, and has to be truly represented by a double expedient; one is the contour, where the form cuts against a background, for example, and the other is tone (or change of real colour), by which means only all advance and recession of surface is expressed.

This pactice is combined with drawing from the whole length living model. It is a morning class from 6 to 8 in summer, and an evening class in winter. Sixteen hours is the time allowed here, two hours a day on eight days. No female model sits in the classes.

Throughout the whole school the professors do not touch the students' drawings, but give many illustrative sketches at the side of the drawings, and insist on great accuracy in proportion, form, and anatomy. Local colour or tone is everywhere insisted on, as leading to the painter's practice more even than form in contours.

Everything is expressed with the least amount of mechanical work, hence no stipple or elaboration of tints with either stump or chalk is permitted.

The consequence is that the apparently short time that is given to the work is in reality amply sufficient for the purpose.

Each student in one year's practice in the antique and life school commences and finishes drawings of thirty-three whole-length antique

figures, and has obtained experience and power in his work. In this matter, especially, the contrast of our system to that of Antwerp is seriously to our disadvantage.

The student in sculpture passes through a similar course. He draws the outline copies for proportion and action, and the fitting of limbs and head and body together, then models from the mask and extremities, and the bust. In the higher elementary course he models the torso.

In the middle course he is taught the principles of bas-relief, and models the whole figure in relief and in the round. Finally, in the advanced course he models from the life.

For the modeller of ornament a similar course is prescribed. In the elementary course he models in clay from simple copies in plaster, and then works out similar designs from drawings.

In the middle course he carries on his work from drawings of greater intricacy, and in all grades of relief; and, finally, in the advanced course he models flowers and foliage from nature.

He then passes on to the section of applied arts, and works out original compositions for various purposes in various materials.

This section is perhaps better in theory than in practice.

The architectural course is remarkably thorough and good, but does not so immediately apply to the subject I had more particularly to report on.

An essential part of this system is the combination of theory and practice.

The work of each day closes with a lecture of an hour's duration, and these lectures are attended by the students according to their position in the school.

These lectures are on the following subjects:—

1. Perspective, linear, aërial, or picturesque.
2. Costume and antiquities.
3. History.
4. Anatomy of bones and muscles.
5. Expression.
6. Æsthetics, or comparative history of art in different schools, with their tendencies.
7. Composition, that is, historical painting, or modelling.
8. General literature.

The above course is compulsory on all students in painting, sculpture, and architecture who are in the advanced sections, and an examination is conducted for the highest rewards annually, in which the student who is successful must have come out well in all the subjects that are taught theoretically, as well as in those which more relate to practical art.

I cannot speak too highly of the excellence of the drawings and paintings executed in this school. A great amount of power and handicraft is developed, but this is properly subservient to the thorough understanding of the model, and also to the student's individuality.

The highest competitions for the travelling studentships are conducted on the usual continental plan, viz., a sketch is made in a day of the subject which has been drawn, in the manner of a lottery. The students who enter still into competition are then confined to a studio from early morn till late at night for a certain number of days, and produce a picture after their sketch. The materials they require, such as models, costumes, &c., are supplied by the Academy, The same plan is adopted for the competition in sculpture and architecture.

These competition works, when produced "en loge," are remarkable for their power and the evidence they give of perfect command of the material.

Appendix C.

REPORT BY MR. SPARKES.

Other classes in Antwerp are those for engraving on wood, on copper and steel, and for naval architecture.

(I append the Government scheme for the reorganization of the Antwerp School, in which will be found many details with which this Report does not deal.)

Brussels.

At Brussels the Royal Academy of Arts was not to be seen, as the old building of the Academy had been pulled down, and the new one, on a very fine spacious plan, with good exterior elevation, was not finished. The classes had met in various rooms belonging to primary schools during the winter, but the inconveniences were so great that they had given up their meetings early in spring. Being thus unable to investigate the system of work followed by the Academy, I had the greater opportunity of seeing the practical working of the art-work in primary schools, and in those which correspond with our night classes. These were in full operation and I visited—

1. The Model School.
2. The Normal School.
3. The School of St. Josse-ten-Noode.
4. The Free University.
5. The "Ecole professionelle des femmes."

The Model School is a secular school, of which many are established in Belgium, as a protest against clerical domination. They are absolutely without a religious system of teaching. Many friends of the anti-religious party assume that all a child should learn at school is such as can be taught on a scientific basis as distinguished from a speculative one, and, consequently, science is the basis of their system of instruction. The root of a scientific education is double, one is arithmetic and mathematics, the other is drawing. Hence we see a great development in the application of drawing to education; for instance, geography is almost wholly taught by drawing on the black board, made by the teachers and copied by the children; physiology and entomology, and other sciences, are taught in the same manner.

The black boards surround the room, as a dado adjusted to the children's height; and on these they add line to line, following the teacher, and develop the plan of the town, the construction of a country, the anatomy of an insect, or the anatomy of the human body.

In the lower classes the instruction is given by a graduated system, invented by Mr. Hendricks, and does not materially differ from our own except in one particular; it is that the drawings, whether of straight lines or symetrical curves or floral forms, are all made to a large scale.

In a large communal school,—for girls,—the same system is admirably carried out; drawing is thus made to subserve an important use in general education, and the children are brought up in the practice of expressing their knowledge and thought through their handiness in chalk drawing.

It was natural to find that sufficient opportunity and teaching were given to the pupil-teachers of the town to qualify in this art of drawing diagrammatically on the black board. This was seen in a class in the normal school for teachers, where youths and young men who had passed the morning in the primary schools came to carry on their own higher studies in the afternoon.

The drawing lesson was by Mr. Hendricks himself. The drawings that were being done were four and five feet long, and were nailed down to large desks, which served as drawing boards. The original drawing,

of ordinary octavo size, was placed in a frame before the student, and glazed, so that no measurement on the surface of the copy could be made.

The originals were elaborate engravings of ornament, shaded. The copies were first made correct in outline, and then were either stumped in chalk or washed in water colour with the greys and shadows to produce the effect of the original drawings.

Everything is translated, not slavishly copied. A lithograph copy is not imitated as a lithograph, but is enlarged, and then translated with sepia, Indian ink, or stumping chalk.

The advantage of this more thoughtful method over the comparatively thoughtless one of mere mechanical imitation was shown where the students draw from the cast. The habit of translating and interpreting was already formed, and they drew well from the cast from the beginning of their practice.

In the drawing from the cast, the objects for light and shade were simple, and required but little drawing; thus the students' attention was concentrated on the large masses of light and shade, the reflections being carefully ignored in the first steps of the work.

Elementary design also was being taught, but it went no further than the composition of simple geometrical lines to produce patterns by their intersections, bringing out frets of various angles and repeats,—more ingenious than useful.

The drawing at the "Université Libre" was that of the ordinary Polytechnic School of the Continent and is confined to the students of that section of the University.

The subjects are model drawing from geometrical forms; mechanical and architectural drawing. All are thoroughly drilled in perspective and the projection of shadow.

Violet le Duc's plates are extensively used as examples for construction and for drawing copies. The classes for construction study the various questions of strength of material and resistance, and all scantlings were worked out arithmetically.

The "Association pour l'enseignment professional des femmes" have a school in which women, principally young girls, are trained in various subjects to qualify themselves for employment. A sort of apprenticeship system is adopted, by which the constant attendance of the girls is secured for three years.

Book-keeping, English and German languages, for those who wish to qualify as clerks, are taught.

Dressmaking, with scientific cutting out. Artificial flower making is another section.

In practical Art the classes are formed for drawing ornament from copies and the cast, elementary design, painting on fans, and on china and earthenware.

An excellent set of copies for the construction of ornament is used. All copy work is enlarged considerably, and cast drawing is stumped and represented in the simplest light and shade.

The figure drawing from the bust and extremities was very good, large in style, and of simple light and shade.

The school is partly self-supporting, but requires subscriptions to meet the payments to teachers, &c. It is interesting to see that the exclusion of women from the advantages of secondary education is being abandoned in Brussels.

The evening classes held in the upper floor of the primary school of St. Josse-ten-Noode, a suburb of Brussels, may be fairly compared with the similar classes held in our district schools.

There are 300 to 400 students who work every evening from 7 to 9, and are taught gratuitously various subjects useful to the artizan popu-

Appendix C.

REPORT BY MR. SPARKES.

lation which fills the suburb. Building construction, such as walls for bricklayers and masons, joiners' work, metal work for locksmiths, are carefully fitted to the particular trades of the students.

The course of ornament excellent; for construction or analysis is taught from the beginning, from exceedingly good copies, by Mr. Hendricks. These are always drawn enlarged to about the size of an imperial sheet in charcoal or chalk.

An advanced course of copying from ornament is formed of those students who copy elaborate designs from the flat of partly natural and partly conventional construction on large sheets of paper, four feet long. A firm strong chalk line expresses all the contours. The light and shade is filled in either with the stump or with washes of Indian ink.

Finally, the students in this class compose ornament, certain conditions being given by the professor, such as a spiral line, and a drawing of an olive branch, to be worked into an Italian panel of the cinque-cento type, and so on. These are always worked out to a large size; about 5 feet seemed to be the usual length.

The arrangements of the desks here is not uncommon in Belgium, all the students stand to their work, and pin or nail their paper down to the broad desk before them, which is painted black, and is of size sufficient to take the large sheets of paper in use.

There are thus no drawing boards in the school, except only in the architectural section.

The section of drawing from the cast was excellently represented. Cones, spheres, or other geometrical figures are placed on a moulded or hemispherical or other shaped basis and then hung to the wall, so that the apex of the figure points towards the student, while the base is parallel to the wall; and being then strongly lighted by a side light, the shadows naturally fall over the moulded surfaces, and give great variety of depth and tone.

Shading is also carried on from large casts, examples of Roman ornament (the Trajan scroll, for instance); everything is rendered realistically, that is, the whiteness of the plaster is the first thing to be noticed, then all the gradiations from light to dark. The stump and chalk alone are used, but to such good effect, that the drawings are true to illusion.

The classes for the antique and life presented nothing remarkable, except from the fact that the antique drawings, even from the full sized figures, were always the size of the casts.

A daylight class for painting the head of the living model was an exceptional thing, but had produced good firm painting from copies, intended to show to inexperienced students where the greys and local colour were to be found. All the painting was direct imitation, without any method of work being discernible.

A painting school, having for its aim the production of decorative artists, worked through the elementary course to the composition of ceilings and wall spaces with geometric lines and panels of decorative forms, either conventional or natural, or to any given historic style.

The highest art practice in the class is the painting of flowers and groups from nature.

These were always done the size of nature, and with arranged back grounds, and the usual time for a flower and foliage, such as a group of peonies, is three hours.

Prizes are awarded to each section yearly, by a jury of professional artists and masters in various trades. The awards are made on the whole mass of work. No award is made to a small amount of work, however good.

The time limit is not a hard and fast rule here. The professor gives out the time that he thinks sufficient to complete each object when it is posed.

The time is however short, as a large Roman acanthus nest of a scroll was done in 10 hours.

My general impression is, that in the system of drawing ornament on principal and planned construction, this school is far in advance of any thing we have in England; so with the imitation of the cast in the elementary classes, and also in painting from nature, all of which is done by a certain powerful straightforward method, quite in contrast to the methods in use in the average English Art School.

Namur.

At Namur is an academy of painting and drawing, conducted on the same general principles as that at Antwerp; but copying from the flat, especially heads in oil and still life in water colour, is carried on to a greater extent, to the disadvantage of the students. The copies were poor and the originals not good. It is evident that, although the system may be excellent, yet that very much depends on the capacity and power of the teachers.

I cannot but think that at Namur the want of careful supervision was evident in the students' works, although this opinion is not formed on a large experience of the drawings, as the students were in vacation, and not one of the professors was in the town. Here, as at other provincial towns, the "plant," that is, desks, gas arrangements, tables, stands for framed copies, &c., is all excellent, and there also seemed to be abundance of room to each student.

Dinant.

At Dinant the same system is said to be in operation, but the whole town was en fete, and I could not obtain access to the rooms in which the School of Art met.

Liège.

At Liège I found an Art School of 300 students on the usual plan, *i.e.*, a seat or place to each elementary student, ample space in large rooms specially lighted, and graduated classes working up to the highest Art School practice.

The works of a recent annual competition were shown me, and were all of high quality. Every exercise was the result of twenty hours' study. In the modelling school there were :—

1. Model from life, 3 ft. 6 in. in height, in high relief, and in strong, somewhat exaggerated style, but manly and full of character and knowledge of anatomy.
2. Model from the antique,—very good.
3. Elementary work from the bust was excellent in style and power.
4. Modelling from a drawing. The original was a rich Roman scroll full of detail, and 18 in. long. This was increased to 30 in., admirably done, and completely finished in 20 hours.
5. Architecture; here also the same time was allowed, viz., 20 hours, for an excellent drawing of an Ionic portico and façade with a gateway; the proportions, &c., are given in description.
6. Architectural design. In the competition in this class a written specification of a subject is drawn from a bag and given out. The last was the peristyle of a university building in the Italian sixteenth century style. The sketch is made in a day, then 20 hours are allowed to work it out; the result being a highly finished design far beyond what is obtained from our students.

Appendix C.

REPORT BY MR. SPARKES.

It is a different thing from the general course, and is arranged for architects solely, and attended by men who pass all their time in this study. All students are superannuated at 21 years of age. They enter the school as young as 10 years of age.

Lectures on theory are given, and examinations are held in the subjects of these lectures, with only one exception. They are—

Perspective, elementary and advanced.
Archæology, or History of Art (but on this subject there is no examination).
Expression—Anatomy.
Construction.
Descriptive Geometry, and
Ornament.

In the middle and elementary sections the practice prevails of enlarged work all done within a time limit. The imitation of the plaster was a matter much insisted on; dark backgrounds are invariably used and imitated.

As at Antwerp, the figure class is of two advanced sections and two elementary; that is to say, the work done from extremities and the torso is distinct from the antique, as we understand it, and the life. The student thus graduates in his work.

The drawings from life were well drawn, but roughly and imperfectly shaded compared with those from Antwerp.

For the whole school of 300 students there are 10 professors, who are engaged for six months in the winter. They are architects or painters, who thus occupy themselves during their evenings at a season when their time is of small value. A very superior class from which to draw teachers is thus available.

Of the 300 students, 20 form an advanced art class and paint from life, and compose pictures under the director. Of these, some who do not come under the definition of artizan pay 20 francs annually for their instruction; otherwise it is free.

The town provides and keeps the buildings. The professors are paid salaries from a fund, partly voted by the Government and partly by the Province.

Medals and honourable mentions are awarded every two years by a jury of local artists, Government inspectors, and the professors.

The school seems to be doing a large and important work in the Birmingham of Belgium, especially in the modelling sections. Students from this school hold lucrative appointments as modellers for silver and metal work in England.

Ghent.

The school at Ghent is in some sort the most interesting school of any in Belgium, for here the pure and simple Government system is carried out without any mixture of local influence to modify or suppress any part of the scheme.

The elementary rooms are three in number, extending in one line 250 feet. They are 29 feet wide, and accommodate 600 students sitting at their desks, with ample room to each. This portion of the school is only used as an evening class six nights a week. The professors arrive five minutes before the doors are opened, and remain till all the students have left.

The course is planned for a three years' practice in the elementary rooms, to be supplemented by a furthur course of two years in advanced classes.

The lowest elementary class practice is drawing from an ornament drawn by the professor line by line on the blackboard. This may be a simple or a complicated piece of work, and may be finished in one evening or in four. On two nights in each week the students draw on paper, on other nights they draw on their black desks with white chalk.

In this section the students are thoroughly drilled in the construction of ornament, from the simplest geometrical form to the most complicated.

In the second year they draw, in light and shade, from models and geometrical figures, devised especially to teach all the variety of light and shade on mouldings, on spherical or cylindrical surfaces, and the shadows of these, cast on to every variety of background.

In the third year they draw from the cast of the figure, that is to say, masks modelled so as to be clearly seen, and of colossal scale, for the same end. This mask is lighted by a gas arrangement independent of the lights by which the students work. These students' lights are screened from the cast, so that it is visible only by its own light. Above the mask on a shelf is placed a cube and a cylinder, in order that the students may see the light and shade of the largest surfaces of the cast in their simplest expression, the cube showing the largest planes, the cylinder the graduation in the half tone to the shadow.

In the same section is a class for the torso and extremities.

All students, whether painters, designers, architects, sculptors, or of any other calling, must pass through this three years' course. Architects then follow a course of ornament always shaded, sculptors then model, the painters pass on to the whole-length figures and the life. This class and that for painting from the model is reached in the fifth year.

Although this is the course always prescribed, yet much is left to the discretion of the teacher, who may promote any student to the class above his own if he is satisfied that the student can do the work required intelligently.

In the antique or life classes, 30 hours is the time allowed for the completion of the drawing or model.

Advanced students draw in charcoal and stump the size of life from the model; this is done occasionally.

The modellers form the outer ring in the artizan and life schools, and always work in relief.

The course of architecture is probably the most thorough and complete in Belgium. The teaching of this art is based on classic forms. There are three classes, one (the lowest) works from large flat copies which have all the dimensions, sections, &c. of the orders. The second class carries this copying system further by working out details, plans, and elevations of known buildings.

The third class works at compositions and designs.

All this study is still based on classic models, but special classes are formed for the study of the Romanesque and Gothic styles.

A valuable feature in the elementary classes is a set of models to a large scale of the orders from base to pediment complete.

In the competitions, which are annual, for honours, the work is done strictly against time.

In alternate years the highest prizes are awarded, all competition is done under strict rules, the students' sketches are made in locked studios, one man in each room, which he does not leave for 20 hours, he is during this time cut off from any opportunity of obtaining assistance in his work.

Appendix C.

REPORT BY MR. SPARKES.

The sketch thus produced is examined, and if worthy is the basis of a finished drawing to a large scale, if in the architectural, or of a painting if in the painting class, which must be finished in 40 days.

No deviation from the original design allowed.

There are 200 students in the class of architecture, 30 of these are in the highest class, of which number 20 are in the Gothic section.

Concurrently with this practical work are lectures on theory. All the elementary students above the lowest class attend lectures on perspective and geometry.

Those in the upper elementary classes carry on their perspective into advanced work, and add descriptive geometry, the architects adding trigonometry and algebra, the painters anatomy.

In the highest classes of the fourth and fifth year, all, *i.e.*, painters, sculptors, and architects, attend lectures on the proportion of ancient buildings. The architects work at perspective and stereotomy.

The painters and sculptors now add advanced anatomy, archæology; especial stress is laid on the history of arms, armour, costume, domestic architecture, &c.

A peculiarity worthy of adoption is that of providing ample space, so that the student sits at arm's length from his board, which is never moved from its support in front of him.

The teachers never touch the students' work.

Here, as at every other school of importance, there is a gallery of casts or store room, in which each cast, whether of extremities or whole length figure, has its place.

The whole-length figures are on castors, and are wheeled into the antique room as they are wanted. Only one cast at a time is there.

The impression conveyed by seeing the work of the whole school is that the architects' training and work are excellent, perhaps the best in the country, and far in advance of anything provided in this country.

The figure work, although very good, is not so excellent, as that produced at Antwerp.

The elementary system is carried out to perfection, but perhaps too elaborately, considering that it is only a preparation for a higher end in artistic practice.

And the figure work did not seem to lead so directly to the development of the painter as at Antwerp, the figure paintings that were shown me being inferior in brightness and effect to those of the Antwerp school. The student does not paint so soon as at that school.

The obvious deduction to be made from the whole Belgium system is, that while good teachers produce good students, irrespective of system, yet that the Belgium system is in advance of our own at certain points, which may be recapitulated here :—

1. Ample buildings for the school, so that every cast is well lighted, well seen, and drawn from in comfort.
2. The time limit that is placed on every work, whether for practice or for competition.
3. The universal teaching of students to imitate what they copy on the assumption that they are all to become painters.
4. The plan of theory by lecture, and practice in the schools being carried simultaneously, and stern examinations in both.

Düsseldorf.

In Germany a different system is met with; for instance, at Düsseldorf all students pay for their instruction.

In the elementary school instruction is given in drawing from copies, usually outline, of a large but somewhat coarse character, and from shaded drawings of heads and extremities; these are copies done by professors or advanced students.

Form in contours and method of manipulation are chiefly looked to here. The proper intonation of the drawings from the figure or from the cast is not attempted in this stage, hence the use of white chalk on grey paper is common.

In the antique and life schools drawings are made also in this manner and students compete for promotion from one section to another, with drawings the size of the casts, which are done in a fixed time, which varies according to the professor's prescription.

The advanced classes are those which work in the studios of the Academy, and paint pictures under the eye of the professors of composition, thus the young students are brought in contact with the leading men of the country. This section is very vital to the traditions of the school, and here the future artist is formed in style and habits of thought.

The chief professor does not remain many years at his post. Seven or eight years is probably the time each composition master passes with his students.

Students work about five years in the Academy; they must pass into the life classes in two years, if not they are denied the privileges of the school.

In the life school the student paints at once from the head, and draws at night from the nude figure.

Here again is no fixed time other than that prescribed by the professor; at one time a head will take a month to finish, at another it must be done at a single sitting of five hours; he thus exercises his students in observation and extreme finish; at others, urges them to express their knowledge in the most rapid manner.

There is throughout no great respect for academic traditions, but an earnest striving to discover and foster the individuality of the student; there is no compulsion in attendance, and no early work. The standard from an academic point of view is not so high as that reached at Antwerp.

The hours of attendance are 9 till 12 and 2 to 4. Painting or drawing with a life class for two hours in the evening from 6 to 8 or 7 to 9.

	£	s.	d.
The fees are 12 thalers per annum in the antique school, equal to -	1	16	0
24 thalers in the life school -	3	12	0
and 36 thalers for the studio	5	8	0

This latter payment includes gas and heating and all properties and apparatus, but not models.

There are about 40 students in the antique school, about 20 in the life school, and 12 to 15 in the studios.

In general no great reliance seems to be placed on the system, but very much on the teacher.

Appendix C.

REPORT BY MR. SPARKES.

It happens that many students commence work who are unfitted for development in high art. It is generally regretted by past and present professors that there is no school for industrial art which could absorb those persons who miss their aim in painting as a fine art.

Cologne.

In Cologne there is an Art School meeting in the museum under the direction of a well known local painter of landscape and genre.

The drawings are neat, and elaborated on grey paper with white chalk, not better than the average work of an English Art School. All the work from the casts truly represents the texture, colour, and relief of the original.

In the absence of any official connected with the school, I could not ascertain the plan of work.

In general the impression conveyed by the drawings was that they are somewhat overworked with an artificial mechanical finish.

I am, Sir,
Yours obediently,
JOHN SPARKES.

APPENDIX D.

Appendix D.

REPORT ON SOUTH KENSINGTON MUSEUM.

SOUTH KENSINGTON MUSEUM.

REPORT OF THE ACTING DIRECTOR.

MR. OWEN having received two years leave of absence it has become my duty to report on the management and progress of the South Kensington and Bethnal Green Museum Collections during the past year.

Accommodation.

The difficulty of finding room for the ordinary increase in the Museum Collections and in office accommodation has been considerably increased by the removal of the original entrance to the Museum, and the offices and corridors attached thereto. These offices and corridors were pulled down to make room for the proposed new Library and Reading Rooms.

Loan Collection of Scientific Apparatus.

The Loan Collection of Scientific Apparatus was opened on Saturday the 13th of May, 1876, by Her Majesty the Queen, accompanied by the Empress of Germany. It occupied the western galleries of the late Annual International Exhibitions, which were kindly lent for the purpose by Her Majesty's Commissioners for the Exhibition of 1851, and a portion of the southern galleries of the South Kensington Museum. The enterprise was warmly supported by the governments and institutions of foreign countries, among which may be mentioned The Conservatoire des Arts et Metiers of France; The Instituto Superiori of Florence; The Gewerbe Akademie of Berlin; The University of Leyden; The Imperial Academy of Sciences, St. Petersburgh; and the Academy of Sciences, Madrid.

The number of exhibitors was 1,238, and the total number of objects received about 20,600.

Division of Collection.

The collection was divided into three heads.

Firstly. The historical division, which contained relics such as Galileo's telescopes, microscope, and magnet, Tycho Brahe's quadrant, Otto von Guerrickes air pump, the Magdeburg hemispheres, Janssen's microscope, &c.

Secondly. Apparatus used in research, including Faraday's and De La Rive's magnetic instruments, Black's and Cavendish's balances.

Thirdly. The educational division, in which section both Germany and Russia were largely represented.

Conferences.

The conferences, which were arranged in order that men of science from all parts of the world should be able to meet together for the discussion of recent discoveries, were opened on Tuesday, the 16th of May, by an address from Lord Sandon, and were continued until the 2nd of June. Many of the exhibitors were constantly in attendance to demonstrate the principles of their inventions, and by such means the exhibition was rendered of great use as a medium for general instruction.

Lectures.

Free evening lectures were given by distinguished men of science and proved a great success, the number of the audience being limited only by the accommodation which the Lecture Theatre afforded. A course of seventy lectures was delivered to science teachers.

Donations.

Liberal donations of valuable apparatus were received from both British and Foreign exhibitors with a view to increasing the value and completeness of the present Permanent Educational Collection.

By the kind permission of several of the foreign institutions the Department has been able to make reproductions of some of the more important historical instruments.

Appendix D.

REPORT ON SOUTH KENSINGTON MUSEUM.

The Exhibition closed on the 31st of December having been visited by no less than 275,813 persons.

Bequests.

Two very important bequests to the Art Museum have been received and arranged for public inspection, namely,—the collection of books, manuscripts, and pictures belonging to the late Mr. Forster, and the collection of water-colour drawings of the late Mr. William Smith.

Forster Bequest.

The magnificent bequest of Mr. Forster consists of oil and water-colour paintings, drawings and sketches, engravings, manuscripts, autograph letters, a library of upwards of 18,000 volumes of printed books, &c.

Amongst the paintings are works by Frank Hals, Vanderhelst, Greuze and Torburg, Reynolds, Gainsborough, Bonington, G. S. Newton, Eastlake, Landseer, Maclise, Clarkson, Stanfield, Boxall, Frith, T. D. Hardy, Watts and Webb of Dusseldorf. The drawings and sketches comprise some hundred examples of Maclise. The manuscripts and autograph letters include note books of Leonardo da Vinci with sketches; the originals of the greater part of the works of Charles Dickens, given or bequeathed by him to Forster, his friend and executor, and the "Garrick Correspondence" in 39 folio volumes. In the Library there is a remarkable assemblage of bound tracts relating to the Great Rebellion and Commonwealth, Archbishop Laud, Ireland, and Dean Swift, and many volumes of especial interest in the shape of presentation copies, original editions, and books containing autographs, letters, and MS. notes.

Special notice must also be made of Grangers "Biographical History of England" illustrated with 5,562 portraits, &c. in 31 folio volumes, and of a rare collection of Hogarth's own plates, with duplicates showing various states in which they were issued.

Through the generous liberality of Mrs. Forster, who had the option of retaining the property during her life, but who, unsolicited, waived the power of reservation given to her by her husband's will, "the Forster Collection" has come at once into the possession of the Museum, and is now exhibited to the public in a portion of the galleries recently occupied by the National Gallery pictures, side by side with the Dyce Collection which has been removed from the ground floor of the Museum, an arrangement which is particularly appropriate, Mr. Forster having been the intimate friend of Mr. Dyce and his executor. It is intended to open one of the rooms as a Reading Room for the two collections.

Smith Bequest.

The very important collection of water-colour drawings consisting of 136 examples left to the Museum by the late Mr. William Smith has been arranged in the picture galleries, and together with the 86 specimens of the works of the older masters given to us during Mr. Smith's lifetime form in themselves an admirable illustration of the English school of water-colour painting. Mr. Smith left also to the Museum his library of books on art, catalogues, and manuscripts; the manuscripts are especially valuable, containing as they do a great amount of unpublished and original information.

Japanese Pottery.

A very interesting collection of Japanese Pottery and Porcelain formed by the Japanese Government for the South Kensington Museum, and first exhibited at the Philadelphia Exhibition has been received and arranged in the Oriental Collection. A descriptive catalogue written in Japan has been translated and is in preparation for publication.

Purchases.

In consequence of the great reduction of the purchase votes of the Museum the acquisitions for the year have necessarily been limited, especially in the Art Library, many very desirable examples having been lost through want of means.

Circulation.

The circulation to schools of art, local museum, and institutions continues steadily to increase, a large number of the more important and

instructive works in the Museum collections have been circulated through the country without loss or accident.

Appendix D.

REPORT ON SOUTH KENSINGTON MUSEUM.

The total number of visitors to the collections was 1,172,351, being an increase of 343,129 over the previous years.

Visitors.

An offer from the Directors of the Dulwich College to lend for a short period the pictures of the Dulwich Gallery to Bethnal Green Museum having been accepted, the pictures were removed from the college to the Museum and arranged in the last gallery; the collection was opened for public inspection on the 7th August and remained open for six months, at the end of which period they were safely returned to Dulwich College.

Pictures from Dulwich College.

On the close of the exhibition at the India Museum of the presents made to H. R. H. the Prince of Wales during his tour in India, His Royal Highness kindly consented to allow them to be exhibited at the Bethnal Green Museum. The collection was accordingly removed and re-arranged in the central hall of the Museum, and has afforded great gratification to many hundreds of thousands of visitors.

Prince of Wales' Indian presents.

Among the more important loans to the Museum are the collections of oriental porcelain lent by Mr. Franks, and a collection of various works illustrating the arts and manufactures of Japan lent by Mr. Alt, who also contributes some fine pictures.

Loans.

The fine collection of British Lepidoptera lent by the trustees of the late Mr. Henry Doubleday has been placed in a separate room, and admission for study, under certain regulations, is granted to the general public. Large additions have been made to the collections of economic entomology and forestry.

Doubleday Collection of Lepidoptera.

The work of re-organization and arrangement of the Food Collection by Professor Church is proceeding satisfactorily.

Food Collection.

The number of visitors that passed through the turnstiles during the year is 938,794, being an increase of 416,096 over the previous year.

Visitors at Bethnal Green.

I append the reports made to me by the keepers of the various Museum Collections.

MAJOR FESTING, R.E., the Assistant-Director, specially entrusted with the charge of the buildings, including lighting, heating, ventilation, &c., reports as follows:—

"There have been no works or alterations in the buildings during the past year.

"The arrangement of the Loan Collection of Scientific Apparatus has necessitated a considerable amount of work in making cases, fittings, &c. The cases will, however, all come into general use in the Museum.

"The total consumption of gas at the Museum (including the Loan Collection Galleries) has been 28,838,600 cubic feet costing 5,474*l.* 16*s.* 5*d.*

Consumption of Gas

"The consumption at the Bethnal Green Museum has been 4,645,700 cubic feet, costing 871*l.* 1*s.* 4*d.*

"Such a large expenditure in gas naturally leads to the consideration of the question whether there is any other method of illuminating the courts and galleries of the Museum which while equally convenient and safe may be more effective and yet not more expensive. Mineral oils give a light superior to that of gas in its whiteness, and they give out a less quantity of heat in proportion to the amount of light; moreover they may be obtained perfectly free from sulphur, which gas never is, and it is this impurity which is the cause of most of the mischief done by gas. Oil would, however, no doubt be dangerous to use, particularly on such a large scale as would be necessary in this case, it would also be dirty. Many endeavours have been made to utilise the electric light for the interior illumination of buildings, but its extreme intensity and the difficulty of sufficiently diffusing it have hitherto prevented its use. In the Loan Collection of Scientific Apparatus a new method of

Method of Lighting Museums.

Appendix D.

REPORT ON SOUTH KENSINGTON MUSEUM.

arranging the carbon points for electric lights was shown, which promised to be useful for purposes of illumination; since then I understand that it has been used in Paris for lighting some large shops, where also the difficulty as to the intensity of the light has been overcome by an arrangement for dividing the electric current so as to have several lamps in the circuit of one machine. At present I have not been able to get any information as to this system which would enable me to judge whether it would be applicable to the Museum or to any part of it, still less to propose any scheme for its trial.

Heating Apparatus.

"The heating apparatus was at work as usual for about 7 months, during which period the mean temperature of the Museum proper was 59° and that of the outside air 45½°."

Temperature.

The annexed table gives an abstract of the temperature in various parts of the building and out of doors throughout the year:—

Station.	Temperature.			Diurnal Variation.	
	Min.	Mean.	Max.	Max.	Mean.
	°	°	°	°	°
Competition Gallery -	45	60·5	81	14	4·7
New Sheepshanks Gallery -	53	62·9	83	12	5·5
Raphael Gallery - -	46	61·5	82	15	6·4
Old Western Gallery -	45	59·3	85	16	6·2
North Court - - -	51	61·5	78	9	4·7
Lord President's Court -	49	61·0	76	8	3·9
New South Court - -	50	60·6	76	9	2·9
Standard (out of doors) -	25	50·2	89	30	11·7

THE ART COLLECTIONS.

Mr. WALLIS, the KEEPER of the ART COLLECTIONS, reports, that—

Acquisitions during the year

"The number of objects acquired for the Art Museum during the past year, and registered, is considerably in excess of any year since its establishment, being 3,062; the largest number in any previous year having been 1,764, acquired in 1871. The general character of these objects have been in many instances of more than ordinary importance to the completion of certain divisions of the Museum, the Japanese Collection having been further increased by an important series of old bronzes, lacquer work, and keramic ware. The historical series, illustrative of the various fabrics of the latter, produced in Japan, collected for this Department by the Japanese Government, and exhibited at the International Exhibition at Philadelphia, 1876, is especially valuable for the information to be derived from its study.

Japanese objects.

Bequests and donations.

"The bequests and donations have been of considerable interest and value, including as they do the bequest of 136 water-colour drawings of the English School, by the late William Smith, Esq., F.S.A., Vice-Chairman of the National Portrait Gallery, whose gift in 1871 of 86 water-colour drawings, painted prior to 1806, already formed so important a portion of the historical series illustrative of the art of water-colour painting in England. The bequest, as reported, is of great importance to the completion of the Collection. An interesting collection of 37 specimens of Sèvres white porcelain was given by the French Minister of Public Instruction. These, with the gift of a collection of

148 fans from Sir M. Digby and Lady Wyatt, are noteworthy additions to the Art Collections.

Appendix D.

REPORT ON SOUTH KENSINGTON MUSEUM.

"The most important bequest of the year, however, was that of the late John Forster, Esq., consisting of paintings in oil, water-colour drawings, sketches by eminent artists, engravings, manuscripts, and autograph letters, together with a library of upwards of 18,000 volumes of printed books. Many of the paintings are of great historical interest, and others illustrate the works of able artists of the English School. Among the sketches there are a large number by D. Maclise, R.A.

Forster Bequest.

"The same readiness on the part of collectors and owners of works of art to lend objects of art, paintings, &c., which has existed and been taken advantage of during past years, continues to be manifested. The removal of the National Gallery pictures afforded an opportunity for accepting the loan of the fine collection of paintings from Althorp, the property of the Right Hon. Earl Spencer, K.G., and an important selection from the collection of W. Fuller Maitland, Esq., of Stanstead. Two other portions of the galleries vacated have been devoted to the Dyce Collections, which have been re-arranged, and the Forster bequest of books, paintings, and drawings, still under arrangement. It is to be regretted, however, that the space in the west cloisters of the South Court, formerly occupied by the Dyce Collections, was not available to relieve the great pressure for space in immediate connexion with the Loan Collection, owing to such space being required for the construction of temporary offices, pending the erection of the new buildings to complete the quadrangle.

Loan Collections.

"The objects in the various divisions of the Museum, especially textile fabrics, metal work, furniture, and the Japanese Collections, have been more largely sketched from and studied during the past year by students and designers than at any period since the establishment of the Museum; but on the whole the number of foreign students and draughtsmen appears to have been somewhat less. The greatest care is taken to prevent objects on loan being drawn from without the written consent of the owners, but it is gratifying to find that the permission when asked for is very rarely refused."

Use of the objects in the Museum by students and designers.

CIRCULATION.

"The circulation of objects, paintings, drawings, &c. to Schools of Art for the direct purposes of study shows a very considerable increase when compared with 1875, and the deficiency of examples of oil paintings, suitable for use in the schools, becomes more and more evident as the demand increases.

Demands from Schools of Art for examples on loan.

"The local museums now being established in various parts of the country have been assisted as far as possible. The museums at Nottingham, the Wedgwood Institute, Burslem, the Corporation Art Galleries in the Birmingham and Midland Institute, in immediate connexion with the Birmingham School of Art, the Smith Institute, Stirling, and the Mechanics' Institute Museum at Hanley, have received the usual deposit loans at periods varying from one to twelve months.

Provincial museums and deposit loans.

"The chief provincial exhibitions of art and industry held during the year, and assisted by loans of objects in glass cases, paintings, and drawings, have been as follows:—

Public exhibitions during the year.

"1. Belfast, held from 23rd May to 12th August. The number of visitors was 102,000, and the proceeds 3,700*l.* A surplus of 2,700*l.* was reported.

"2. Wrexham, held from 22nd July to 27th November. The number of visitors was 98,122, and the proceeds 4,159*l.* 9*s.* 6*d.* It is to be regretted that a serious deficit resulted from this exhibition, owing to

Appendix D.

REPORT ON SOUTH KENSINGTON MUSEUM.

the extent to which the various sections were carried out and the cost of a special building.

"3. Middlesborough, held from 8th November 1876 to 2nd January 1877. The number of visitors was 9,784, and the proceeds 356*l.* 4*s.* 7*d.* A surplus of 50*l.* was reported.

"4. Leicester, held from 28th September to 30th December. The number of visitors was 26,048, and the proceeds 800*l.* 10*s.* 6*d.*

"4. Greenock, held from 25th October 1876 to 30th January 1877. The number of visitors was 5,970, and the proceeds 153*l.* 3*s.* 6*d.*"

REPRODUCTIONS.

Reproductions.

"Ninety electrotype reproductions and 15 plaster casts were acquired during the year 1876.

ELECTROTYPES.

Electrotypes.

"By permission of the Barbers Surgeons Company a selection of 10 articles of the period of Charles II. and Queen Anne, from the collection of gold and silver plate the property of the company, has been reproduced by Messrs. Elkington; and a collection of 65 pieces has been received in exchange from the Bavarian Gewerbe Museum at Nuremberg.

PLASTER CASTS.

Plaster casts.

"1. A reproduction in plaster of a remarkable example of Flemish renaissance art has been set up in the South-east Court. It is a copy of the Tabernacle in the Church of Saint Léau, near Brussels, executed in 1552 by Corneille de Vriendt. It is in the form of a pyramid, 60 feet high, rising in tiers, exhibiting more than 300 figures, and elaborate carved details of fruit and flowers. It was acquired by exchange from the Royal Commissioners for Belgium.

"2. From the tomb of Phillipe le Hardi, Duke of Burgundy, executed in 1390 by Claux Sluter, copies of 10 of the figures of monks have been acquired.

Fictile ivories. Want of space for a complete arrangement.

"It is to be regretted that the large collection of casts representing more than 300 examples of carved ivories are still awaiting space to exhibit them, when incorporated in chronological order with those already mounted and exhibited in connexion with the collection of carved ivories.

BETHNAL GREEN BRANCH MUSEUM.

Bethnal Green Branch Museum.

"The changes in the contributions on loan, and in the general arrangement of this branch Museum have been very considerable and of a highly satisfactory character.

Indian Presents of H.R.H. the Prince of Wales.

"H.R.H. the Prince of Wales graciously commanded that his collection of Indian presents, consisting of 2,677 specimens, should be removed from the India Museum to Bethnal Green in order that the inhabitants of the eastern district of London may have the advantages of its permanent exhibition. The result has been most satisfactory, as shown by the number of visitors.

The Dulwich Collection of Pictures.

"The governors of Dulwich College having found it necessary to renovate the galleries containing the Bourgeois collection offered 296 oil paintings on loan from August 1876 to January 1877. These also attracted great attention and proved of much interest to the population of eastern London.

Col. Lane Fox's Anthropological Collection.

"The interesting contribution of 338 objects constituting the Anthropological Collection formed by and the property of Col. A. Lane Fox,

R.E., remains in the Museum, as also the valuable collection of Japanese Art, consisting of porcelain, bronzes, lacquer work, textiles, &c., making in all, 1,629 objects, contributed by W. J. Alt, Esq. Appendix D. REPORT ON SOUTH KENSINGTON MUSEUM.

"Although the fine collection of drawings lent by Miss James for a considerable period, as also the collection of paintings belonging to the late Lord Mayor (Alderman Cotton, M.P.), have been withdrawn by the owners, the miscellaneous collection of paintings has been well kept up, and the examples of modern art lent by W. J. Alt, Esq., and those of foreign and English masters lent by Lieut.-Col. J. A. H. Moore-Brabazon, together with the contributions of other lenders, keep up the number of works of art to the full measure of the space available. Mr. W. J. Alt's Japanese Collection. Miscellaneous Collection of Paintings.

Mr. R. H. SODEN SMITH, the Keeper of the National Art Library, reports:—

"1. The attendance of readers in the Art Library continues to increase as it has done progressively during some years past in proportion as the extent and value of the collections of books, prints, &c. have increased and become better known. The number for the past year was 24,033; against 21,922 for 1875. Attendance.

"2. The increase is the more observable when the inconveniences to which readers are subjected are taken into consideration. No additional accommodation has been gained, and intending readers have been obliged on some evenings to leave for want of space even to stand at the desks in the rooms. Upwards of 200 students have visited the library in one day; more than 70 trying to read at the same time, there being sitting room barely for 50. It is to be hoped that it may soon be unnecessary to dwell on this topic, or to repeat the statements made in every report which I have had the honour to submit for several years past; the necessity for additional accommodation having been fully recognised and steps proposed to be taken to provide a remedy; the plans for the future Art Library are prepared, the details of its arrangements have been carefully considered, and the whole is ready to be carried out when the necessary grant is made. The public utility, in fact necessity, of such a building need scarcely be dwelt upon, when every considerable city and town in Europe and America are establishing free libraries and purchasing books to fill them:—here, we have already a collection of books and prints of great value, and a public eager to use them, but the building to render the collection available is still wanting. Continued want of accommodation.

"3. The classification of all works acquired has been carried on according to the system adopted some years ago, and the placing the books in their classes accomplished as far as space permits. Classification.

"4. Binding the books has been continued as before in colours according to their classification, and a large number, 539, have during the past year been so bound; 551 volumes worn by constant use have been repaired. Binding.

"5. Owing to the reduction down to two fifths of its full amount (from 2,500*l.* to 1,000*l.*) of the grant hitherto allowed to the Art Library for the purchase of drawings, prints, photographs, and books, the acquisitions during the past year have been very limited, the more so as while the means of purchase have diminished, the prices of all that is most needed for the library have increased, in some cases doubled, in others quadrupled, within the last few years. Much has therefore been lost which is necessary to the completeness of this national library, and which, if ever acquired hereafter, must be acquired at a far greater expenditure than would be necessary now. Acquisitions.

"The most important increase to the collection has been made by the valuable bequest of the late Mr. William Smith, F.S.A., Deputy Chairman Mr. W. Smith's bequest.

Appendix D. — Report on South Kensington Museum.

of the National Portrait Gallery, who left his judiciously-selected working library of art books to be incorporated with the collection here. Appended is a list of the works included in this bequest. Among the volumes so given must be specially mentioned various series of interesting and important catalogues; also a series of 10 volumes folio, containing a MS. biographical catalogue of British portraits with indexes to counties. This work, the most remarkable of its kind that, as far as I know, has ever been accomplished in this country, is invaluable to art students as a comprehensive and precise record—compiled with a knowledge and experience quite unequalled—of what was to be ascertained respecting the portraiture of British celebrities; it was the life-long labour of Mr. Smith's father, and was augmented by himself and his brother Mr. George Smith. In addition to these volumes there are a series of others compiled upon a similar plan by the same accurate and laborious hand, containing the portraits of notable persons classed under the English counties to which they belonged. Other MS. volumes containing lists of engravers and etchers with occasional notes of Mr. William Smith's on their lives and works—the fruits of a study of prints and an experience in their acquisition such as few in this country have ever possessed. Alas, that such accumulated stores of knowledge and unsurpassed discrimination, held moreover at the service of all who were competent to profit by them, should inevitably pass away with the acute and candid mind of their generous possessor.

"The number of printed books, parts and pamphlets purchased during the past year has been 873; presented, 995.

"Among works presented in addition to those already noted from the Smith bequest may be mentioned the fine work entitled Galerie des Fêtes de l'Hotel de Ville de Paris; Peintures Murales exécutées par Henri Lehrmann en 1853, détruites par l'Incendie de 1871, 28 plates, elephant folio, Paris 1876; presented by the Préfet de la Seine.

Books purchased.

"Among those purchased the following may be mentioned:—A good copy of Turner's Picturesque Tour round the Southern Coast of England, 2 volumes; the Triqueti Marbles in the Albert Memorial Chapel, Windsor, illustrated by a series of 117 photographs; Brayley and Britton's Topographical History of Surrey, 5 volumes, with 400 plates; Delafosse's Iconologie historique; Los Rios, Historia de la villa y Corte de Madrid; Braun, Civitates orbis terrarum æneis et coloribus expressæ, 3 volumes, folio, Cologne 1599; Segar's Honor, Military, and Civill, sm. folio, London, 1602.

"6. Also—as examples of early printing and book ornament, to add to the series which otherwise it has not been possible to enrich to any extent this year—a copy of St. Justinian, Doctrina, &c. Gothic letter, Venice 1494; Heures a lusaige de Romme, &c., Paris, Simon Vostre, 1515; also Heures de Cour, &c., miniature copy, Paris 1679; Officium Hebdomadæ Sanctae, rubricated and with woodcuts, Venice 1568; Champfleury, auquel est contenu l'Art et Science de la Deue et Vraize proportion des Lettres, &c., 8vo. Paris 1549.

Duplicates.

"7. Duplicates of books much in request are greatly needed both in the reading room of the central library, and for loan to provincial schools. A few have been acquired. Among them are Lièvre, Les Arts décoratifs, 2 volumes folio; Architectural Association Sketch-book, 6 volumes; Chippendale's Cabinet Maker's Director, a book now rare and much sought for by makers of ornamental furniture and cabinet work; Ruskin's Seven Lamps of Architecture.

"A list is kept of works frequently asked for which owing to the want of duplicate copies it has been impossible to supply, and this list is now a very long one, applications being constantly made from the schools for

the loan of important and useful books of which only one copy exists in the collection. Appendix D.

REPORT ON SOUTH KENSINGTON MUSEUM.

"8. Booksellers' lists, catalogues of sales, and of new works, British and foreign, have been systematically examined as heretofore; the works required for the library noted and some purchased. A tabular statement showing the number of books, essays, pamphlets, &c. on art subjects known to have been published in their respective countries is given at p. 529. The total is 670, of which 591 have been acquired. Books noted.

"9. The number of original drawings acquired last year has been 1,176. Of these 602 are contained in a volume presented by Mr. L. J. Van Péteghem of Brussels, and consist of academy studies, designs of ornament, architectural and other sketches; a set of original designs for furniture by Mr. R. Charles, presented by the designer; various original designs of the late Mr. Owen Jones, purchased at the sale of his drawings; drawings of jewellery from pictures in the gallery of the Louvre, executed for the library collection by Mr. T. W. Wilson; careful drawings of the Museum Buildings by Mr. J. Watkins; a large collection of Chinese drawings and examples of calligraphy, together with some specimens of old Cingalese writing; a volume containing Chinese drawings of flowers. Drawings.

"10. The number of prints added to the collection has been 1,013. Among these may be mentioned a collection of ornamental and decorative subjects, chiefly French, of the 17th and 18th centuries; a few additions to the early engravings of objects of ornament, as the set of vases after Polidoro da Caravaggio and a few to the collection of the "little masters," and the works of Callot; also a set of proof impressions of etchings by Legros. Prints.

"I have taken occasion in former reports to point out the great value to students of the early engravings of ornament, and especially the works of some of those artists of the 16th century who are classed as "little masters." The sudden rise in money value which has followed the more general appreciation of these prints renders it now difficult for the Art Library to secure specimens when they occur for sale, as public and private collections compete eagerly for such works. On the occasion of the recent dispersion of the well-known Liphart cabinet of engravings, which included a great number of works of ornament that ought to be available to our students here, but which are still wanting to our series, the Art Library obtained but very few examples.

"11. The collection of engraved National Portraits has been augmented by about 150 prints; of these 8 were presented by the late William Smith, Esq., F.S.A. This collection, which has been exhibited in part at Edinburgh and elsewhere, is about to be shown at Bethnal Green. Each portrait when framed has a brief biographical notice given in addition to the label bearing the name and title of the person represented. National portraits.

"12. The number of photographs added to the collection during the past year has been 888. Photographs.

"Among these are a series of art objects in the Royal collections in Spain; objects in the National Museum at Nuremberg and in the Royal Bavarian School of Art and Industry; the completion of the valuable series of photographs of the People of India, now making 8 volumes; illustrations of some of the principal objects in the Green Vaults of Dresden, a work being issued in parts; buildings and various works of art in Persia; art objects either on loan or belonging to the Museum.

"13. 1,481 drawings, diagrams, and prints, and 1,104 photographs belonging to the Art library have been lent during the past year, either for exhibition in the Art Museum, or at the Bethnal Green Branch Museum, or in provincial collections and schools of art, or for use in the lecture theatre. A large collection, in which some changes have been made Circulation.

Appendix D.

REPORT ON SOUTH KENSINGTON MUSEUM.

during the past year, including drawings, illuminations, prints, and photographs continues deposited in the charge of the Art Museum for use in the circulating series or is exhibited in the galleries here.

Cataloguing.

"14. The cataloguing of all books acquired up to the present time has been carried on as heretofore The books included in the bequest from Mr. William Smith, being recently delivered to the library, have not yet been catalogued in detail; otherwise there are no arrears.

"15. A list of works on costume or illustrative of the subject has been compiled and will shortly be ready for use; the works will be classified and a copious index added. Lists of works on painting, sculpture, &c. and on heraldry are either prepared or in preparation, such classified lists being of great practical value in the working of a library where art students and others whose acquaintance with books is slight seek for information and guidance in the history as well as the practice of art.

"16. The tables given at page 520 furnish, 1st, a comparative statement of the statistics of the library for five years past; 2nd, the return of the numbers of readers for the years 1875 and 1876, with the average daily attendance, showing the increase to which allusion has already been made; 3rd, the return of the number of books, prints, diagrams, &c. lent to schools of art; 4th, the list of donations to the library; 5th, the list of publications received from various foreign museums and other institutions in exchange for the publications issued by this Department; 6th, the return prepared by Dr. Appell, Assistant Keeper, of the number of art books and pamphlets published during the year 1876 classed according to the countries of their publication."

EDUCATIONAL AND SCIENTIFIC COLLECTIONS.

MR. A. C. KING, the Keeper of the Educational Library and Collections reports as follows:—

Educational Library.

"1. THE LIBRARY.—1,356 books have been added to the Library in 1876 by donation, loan for Exhibition, and purchase; and the Library of the Committee of Council on Education, comprising 1,894 volumes, has been transferred hither from the Central Office in Downing Street.

"The donations are 282 in number, among these should be specially noted a collection of Reports of the Geological and Geographical Survey of the United States, with various other Reports relating to the Boston Free Library and other Institutions, together amounting to 108 volumes. This collection was made for the Museum by Mr. Edward Atkinson, of Boston, U.S., at the suggestion of Mr. Soden Smith, the Keeper of the Art Library, who visited America as Reporter on Pottery, etc., in the Philadelphia Exhibition of 1876. Another valuable collection of Reports received from Professor F. V. Hayden, of the U.S. Geological Survey, since the close of 1876, will call for record in the next Annual Report.

"Fifteen volumes of Turkish School Books and Educational Regulations were received from the Turkish Government through the Foreign Office.

"The Wurtemberg Board of Trade has, through Dr. Steinbeis, the President, forwarded copies of its recent publications.

"The following Institutions have continued to present copies of their publications as they appear:—

Royal Bavarian Academy of Arts and Sciences.
British Museum.
Meteorological Committee of Royal Society.
Physical Society.
Netherlands Society for Promotion of Industry, Haarlem.

Imperial and Royal Society of Agriculture, etc., Brünn.
School Board for London.
Smithsonian Institution, Washington.
United States Naval Observatory.

"From 27 publishing houses the Library has received 623 books on Loan for Exhibition and reference.

"The purchases are 449 in number, they consist chiefly of Scientific Works, and of continuations of various periodical publications.

Attendance.

"The return of readers is as follows:—

Managers and teachers of schools for the poor, including pupil-teachers - - - -	4,701
Students in Art and Science in schools connected with the Department - - - -	7,224
Persons reading for examination, and miscellaneous visitors - - - - -	9,061
	20,986

"This shows an increase of 1,044 over the return for 1875, and gives an average attendance of 67·5 for each of the 311 days on which the reading room was open.

Accommodation

"For some years past the Annual Report has dwelt on the inadequate accommodation which the reading room afforded for the increasing number of Students, and of late the defective ventilation had become a serious evil. At the beginning of 1876 it was felt to be absolutely imperative that more suitable premises should at once be provided. These have been obtained by transferring the examples of school furniture and other educational appliances to the galleries overlooking the Horticultural Gardens, and giving up the space thus gained to the Library and reading room; hence these now occupy a range of temporary buildings at the extreme west of the Museum, connected by a long wooden corridor with the permanent buildings. The reading room is in every respect better than the old one, the only drawback is its great distance from the entrance to the Museum.

"By working before and after the hours during which the Museum was open to the public, the transfer of books and furniture from the old to the new rooms was carried out without closing the reading room for a single day, and without serious inconvenience to the readers.

Contents of Library.

The books in the Educational Library have recently been carefully counted, and the number found to amount to 36,884. This is exclusive of duplicates and old editions. The following is a summary of the return:—

English language and literature, including grammars, reading lessons, poetry, juvenile books, &c. - - - - -	5,445
Classical languages and literature - -	2,179
Modern languages and literature, including examples of school books used in various countries - - - - - -	5,520
Biography and history - - -	2,224
Theology, church history, &c. - -	920
Works on pedagogy, reports, examination papers, &c. - - - - -	5,224
Political, domestic and social economy -	1,326
Drawing and writing - - -	748
Music - - - - -	1,291
Mathematics - - - - -	1,426

Appendix D.

REPORT ON SOUTH KENSINGTON MUSEUM.

Geography and astronomy - - -	1,781
Geology and mineralogy - - -	524
Botany and general natural history -	1,546
Chemistry, general physics and mechanics -	1,859
	32,013
Special collections of books not separately classified - - - - -	4,871
	36,884

Educational Apparatus.

"2. THE COLLECTION OF EDUCATIONAL APPARATUS.—As has already been stated, this collection was early in 1876 removed from the Museum buildings to the eastern portion of the galleries overlooking the Horticultural Gardens, where it is shown to great advantage, though the space assigned is less than is required.

"The Special Loan Collection of Scientific Apparatus, held in the Exhibition Galleries from May to December 1876, and on which a Report will appear elsewhere, comprised almost every description of Educational Apparatus which would otherwise have found an appropriate place in the permanent Educational Collections. Hence scarcely any addition of importance has been made to these collections during the past year. Since its close, however, numerous gifts, purchases, and loans have been received from the Science Collection, together with copies of several examples of apparatus of historical interest. These additions will call for notice in the next Annual Report.

Mr. MATCHWICK, Division Keeper, reports on the FOOD COLLECTION, the COLLECTION of ECONOMIC ENTOMOLOGY, and the ANIMAL PRODUCTS COLLECTION (all of which are now exhibited in the BRANCH MUSEUM, BETHNAL GREEN), as follows:—

THE FOOD COLLECTION.

Food Collection.

"The work of re-arranging this Collection, under the superintendence of Professor CHURCH, has made good progress during the year; and that portion of it which relates to and illustrates the Adulteration of Food has been, to a considerable extent, remodelled by Mr. JAMES BELL, Principal of the Laboratory attached to the Board of Inland Revenue. All that concerns the adulteration of food is of such great moment and importance that it is intended to keep this division of the Food Collection separate and distinct, to make it as complete as possible, and from time to time to add to and replenish it with suitable illustrations, especially of such as may be exemplified by chemical analysis and tests, and of those instances where known results have been ascertained by recent scientific research. Mr. BELL is preparing for the press a complete list of the known adulterating substances, with explanatory remarks on their application to alimentary substances, intended to serve as a guide or hand-book to the series now in course of re-arrangement. It is hoped that this work will be brought out in the course of the ensuing year.

"Professor CHURCH has followed the original basis on which the Food Collection was first formed, namely, the chemical composition and physiological functions of food; but has materially modified, re-arranged, and altered the various illustrations in connexion with it, bringing the Collection indeed up to the present day as regards scientific data and ascertained facts. To some extent Professor CHURCH has been influenced in the work of remodelling the Food Collection by the provisions contained in the Act of Parliament recently passed for regulating the sale of Food and Drugs, considering it important that recent

legislation on the subject should be represented in a National Collection illustrative of human food. Appendix D.

REPORT ON SOUTH KENSINGTON MUSEUM.

"With the important exception of such illustrations as have been specially prepared and arranged by Professor CHURCH, but few additions have been made to the Collection during the year. Those that may be mentioned are various samples of Maize, Coffee, Confectionery, Dried and Preserved Fruits, Distilled Spirits, and a valuable set of coloured drawings, 112 in number, of varieties of the Sugar Cane, contributed by Her Majesty's Commissioners of the Exhibition of 1851.

Hand-book.

"The Alphabetical Inventory of the Collection has been withdrawn, and a new Hand-book by Professor CHURCH, entitled "FOOD; SOME ACCOUNT OF ITS SOURCES, CONSTITUENTS, AND USES," substituted for it. It is selling extremely well, although the price (2*s*. and 1*s*.), is somewhat prohibitive for the labouring and poorer classes. A brief and cheap guide, to be sold as low as a penny, is in contemplation, and, if sanctioned, will probably be on sale before the close of the year.

Labels.

"A large number of printed labels has been added to the Collection during the year, notably of such as have been necessary to the re-arrangement of it. The total number of newly printed labels was 4,280, and of such as were done by hand 196, making in all 4,476, including those required for renewal and circulation. As the labelling of the Collection is constant and very important, it may be as well to name the titles of some of the more conspicuous labels which have been recently prepared by Professor CHURCH, and now framed and placed on the walls of the Collection and inside the glazed cases containing the displayed analysis or chemical composition of the food-material indicated by each. They are as follows:—

"Chemical and Physiological Classification of Food.—Class I., Nutrients. Class II., Food-Adjuncts. Food Classification of the Vegetable Kingdom—Tables I. to VIII. Food Classification of the Animal Kingdom—Tables I. to VIII.

"Descriptive labels of the analysis of the following substances displayed in the cases, namely:—"Apples, Asparagus, Bananas, Bacon, Beer, Beetroot, Biscuits, Butter, Cheese, Cocoa, Prepared Cocoa, Coffee, Cabbage, Coco-nut, Cucumbers, Celery, Carrots, Carob Beans, Dates, Dika-bread, Distilled Spirits, Edible Birds' Nests, Eggs, Figs, Filberts, Grapes, Gooseberries, Haricot Beans, Iceland Moss, Irish Moss, Jerusalem Artichokes, Lettuce, Lentils, Milk, Mushrooms, Mustard, Oranges, Peaches, Pistachio Nuts, Pepper, Potatoes, Sweet Potato, Pears, Parsnips, Peas, Rhubarb, Sea-kale, Turnips, Tomatoes, Tripe, Tea, Vanilla, Vegetable-marrow, Watercress, Walnuts, Wine, Yam.

"In addition to those just mentioned Professor CHURCH is preparing for exhibition the chemical analysis of many other substances used as food, with their corresponding descriptive labels.

Circulation Cases.

"The set of cases illustrative of the Chemical Analysis of Food, prepared for circulation in the provinces, has been sent out but once during the year, when it went for an evening only to the Birkbeck Schools at Kingsland. It is not intended to send these cases out again until the various illustrations contained in them have been revised and re-arranged by Professor CHURCH in harmony with those exhibited in the general collection.

"One other point only remains to be noticed, and that is the great want of cases of a different pattern to those now in use for the better display of the illustrations. In many instances the present form of show-case is very inconvenient and not well adapted for the purposes required.

Economic Fish Culture.

"In the Annual Report on the Food Collection it is usual to refer to that which is on hire from Mr. FRANK BUCKLAND, Her Majesty's

Appendix D.

REPORT ON SOUTH KENSINGTON MUSEUM.

Inspector of Salmon Fisheries, illustrative of Economic Fish Culture, and exhibited, as in former years, at South Kensington, in the Western Arcade of the Horticultural Gardens, under the usual regulations of the South Kensington Museum. Mr. BUCKLAND's Museum is still very attractive and popular to a large number of visitors. The various processes of artificially breeding different kinds of fish, principally salmon and varieties of trout, for the main purpose of stocking waters and increasing the supply of that valuable kind of food, have been in successful operation by MR. BUCKLAND and his assistants during the year, and many additional casts of fish and other illustrations have been placed in the Collection. Visitors sometimes ask for a guide or hand-book to this Fish Museum, and it would be a valuable adjunct to it if a concise and cheap catalogue or guide could be brought out by Mr. BUCKLAND, and sold in the Collection and on the catalogue stalls of the Museum.

ECONOMIC ENTOMOLOGY.

Economic Entomology.

"ENTOMOLOGY is assuming increased importance as a department of the Museum under the superintendence of ANDREW MURRAY, ESQ., F.L.S. It was known, generally, that the east of London contained many collectors of insects, who were of what is called the working classes, but the deposit of the *Doubleday Collection* of *Lepidoptera* (formed by the late Mr. HENRY DOUBLEDAY, of Epping, and lent to the Department by his trustees for five years from January 1876) has shown that the numbers who are interested in the subject are much greater than was supposed, and mainly consisting of artizans and their children. At first, after the Collection was placed in the Museum, it was not much visited. This was partly owing to ignorance of its existence there, but principally to the Collection being only open during the daytime, when most of those who desired to consult it were at work. On this being discovered it was opened also at night, first, on one night in the week, but latterly on all the three evenings on which the Museum is open; and the numbers who have come to consult it have been fully as many as the separate room in which the Collection is arranged can contain. The numbers who have visited it from March, when it was first opened for inspection, to December have been 302, of whom 214 were admitted in the last three months since it was open on the three evenings mentioned. The British Museum, which is the only other public collection for entomological reference in London, is practically closed to those living at Bethnal Green, consequently the privilege of having such a Collection for their use is a novelty which is very highly prized. Inquiries are from time to time made whether similar collections of the other orders of insects are not also to be added to the Museum.

"The Collection of Economic Entomology continues to improve and increase. Eighteen cases supplying some of the more important blanks in the Collection have been added during the last year. Eight cases (consisting of the illustration of Galls) were sent to the Exhibition at Philadelphia, where they were specially noticed, and a medal and diploma awarded to Mr. Murray. These formed part of the educational series which was presented by Her Majesty's Government to the Government of the United States, and they are to form part of the National Museum at Washington. Improvements in the illustrations of Silk-producing Moths are in progress. Catalogues of the contents of the Doubleday Collection have been made and printed for the use of the public. A list or index to the contents of the cases has been published, as well as the first volume of a hand-book by Mr. Andrew Murray explanatory of the Collection, and embracing the *Apterous* insects, &c. (price 4*s.* and 3*s.*, and in three separate parts at 1*s.* each). The second

volume, treating of the Scale Insects and Bugs, is in course of preparation.

Appendix D.

REPORT ON SOUTH KENSINGTON MUSEUM.

ANIMAL PRODUCTS COLLECTION.

Animal Products Collection.

"This Collection has received a considerable number of valuable additions during the past year, and those sections of it which have not hitherto been adequately represented by suitable examples are gradually becoming so. There are, however, a good many blanks yet to fill up, particularly in the divisions of Silk, Leather, Hair, Fish Skins, and of Animal Substances yielding Pigments and Dyes, and of such as are used in Pharmacy and Perfumery.

Loans and Donations.

"Among the additions which have been recently acquired, by loan or presentation, the following may be mentioned:—Examples of raw and manufactured Silk from Japan, Turkey, and Mauritius, lent by Her Majesty's Commissioner for the Exhibition of 1851; Native Leathers from Africa, given by P. L. Simmonds, Esq.; Sponges from Japan, presented by H. J. Klasen, Esq.; Skin of the Blue and Red Macaw, given by H. J. Nicholay, Esq., &c., &c.

Purchases.

"The purchases include a good representative series of the Furs of Commerce, in which the Collection had previously been most seriously deficient; also a considerable and carefully selected assortment of the skins (in the state in which they are imported) of various kinds of foreign Birds remarkable for the beauty of their plumage, and whose feathers are in demand for ornamental and other purposes; necklaces of rare shells from Tasmania; native leather work from Tartary and South Africa; a fine and perfectly preserved tusk of the extinct mammoth from Siberia; a carved tusk of the Narwhal; a carved walking stick of Narwhal ivory; sections of mammoth and other kinds of ivory; Chinese carved puzzle ball; native-made utensils of tortoise-shell from the Fiji Islands; a variety of personal ornaments composed of insects and the wings of insects; a good series of real pearls, with the shells producing them, as well as examples of manufactured or imitation pearls for comparison with those that are genuine; and a large glazed case containing stuffed and mounted specimens of birds used as food, prepared by Mr. LEADBEATER in continuation of a series ordered last year. As opportunities occur other purchases will continue to be made so as to render the Collection more complete than it has hitherto been.

Hand-book.

"The original catalogue of the Animal Products Collection has long been out of print, and such stock of copies as remained have been withdrawn in consequence of the changes in the Collection. Mr. P. L. SIMMONDS is preparing a hand-book of the Collection, entitled "ANIMAL "PRODUCTS; THEIR PREPARATION, COMMERCIAL USES, AND VALUE." which, although not strictly a catalogue, will be valuable as a consulting book and guide to the Collection. It is also intended to issue a much shorter and cheaper guide than the hand-book, so as to meet a want of that nature among a large class of visitors consulting the Collection. The hand-book (to be published by Messrs. Chapman and Hall) is now in the press, and will, in a short time, be on sale at the catalogue stalls of the Museum.

Labels.

"The re-labelling of the Collection with printed labels has made considerable progress during the year, the total number done having been 2,804, but in that number are included those duplicates necessary for renewal and distribution. Of other labels done by hand the total was 249, making upwards of 3,050 labels in all. Descriptive labels of large size have been framed and placed in appropriate and conspicuous positions in the Collection.

Collection of Waste Substances.

"As regards the special Collection formed for the Department by Mr. P. L. SIMMONDS, illustrative of the industrial application of

Appendix D.

REPORT ON SOUTH KENSINGTON MUSEUM.

Waste Matters, and exhibited in connexion with the Animal Products Collection, although by far the greater portion of the substances comprising it are of vegetable origin, and many of them mineral, there is nothing to note respecting it in the way of additions or alterations. It is arranged in the same position as last year, and a separate catalogue is to be obtained in the Museum, price threepence, which sells moderately well.

"The present stock of glazed show-cases in the Animal Products Collection is insufficient, additional ones being urgently needed, wherein to exhibit a considerable number of important illustrations."

COLLECTIONS IN THE EXHIBITION OF 1862 GALLERIES.

MR. SANDHAM, Assistant Keeper, in charge of the following Six collections of the Museum exhibited in the Galleries of the Exhibition of 1862, reports as follows :—

1. COLLECTION OF BUILDING MATERIALS AND MODELS OF CONSTRUCTION.

Building Materials. Models of Construction.

"This collection, which in 1875 was thoroughly arranged and classified under 16 different heads, relating to building and construction, was entirely upset in the spring of 1876, to make room for the Scientific Apparatus Exhibition.

"The best arrangement which circumstances permitted was carried out for this collection, and it has been available for reference and examination by the public since Midsummer last. Nevertheless, it is not practicable to add new objects or to increase the variety of the specimens, until suitable space can be found to do justice to the manufacturers' wares lent for exhibition, and to enable a re-arrangement of the whole to be made according to the classification of the catalogue, which was compiled and issued for sale to the public during the autumn.

Additions.

"The additions to the collection for the year amount to—

Four pieces of ornamental iron-work by Messrs. Barnards of Norwich, and purchased from them.

A collection of craftsmen's tools exhibited by Messrs. Gilpin, Senr., of Cannock, and a model in cork of Windsor Castle, lent by Mr. Lloyd Hoppin, of Philadelphia, U. S. A., were the most important withdrawals during the year.

"Some 150 labels were written or printed during the year for the collection, the whole of which has been in this way described sufficiently for general purposes."

2. COLLECTION OF SHIP MODELS AND MARINE ENGINEERING.

Additions.

"During the year 1876 the following additions were made to this collection :—

Two models of boats and a frame of 7 drawings of designs for rowing and sailing boats, canoes, &c.

Lent by Messrs. Searle and Sons, Lambeth.

Whole model of twin screw steamship "Faraday," built by Messrs. Mitchell & Co., Sunderland, specially for telegraph cable laying in the Atlantic.

Lent by Messrs. Siemens Brothers, the owners of the vessel.

Photogragh of a first-order apparatus for lighthouses.

Lent by Messrs. Chance Brothers, Birmingham.

Two ships' chronometers fitted complete, with examples of their balances.

Lent by Mr. V. Kullberg, Liverpool Road, Islington.

Three photographs of patent anchors.

Lent by Mr. Wastenays Smith, Newcastle.

A mat designed by Lieutenant Makaroff, of the Imperial Russian Navy, for stopping shot holes in armour-plated war vessels.

Lent by Messrs. Creswell & Co., agents, Leadenhall Street.

A coloured lithograph of the Admiralty House, Whitehall.

A figure head of native design and workmanship for a New Zealand canoe.

Presented by R. H. Rhodes, Esq.

"Nothing has been removed from this collection during the year, and the labelling of all objects has been carefully kept up as required.

"The catalogue of the collection sold well during the year. A revised edition will be published during the year 1877.

"Through the valuable co-operation of the Institution of Naval Architects an exceedingly interesting series of models and drawings, illustrating the progress of ship-building during the past 150 years, was collected, and exhibited with the display of Scientific Apparatus. The Museum collection of ship models supplied several gaps in the series, which could not be otherwise filled up."

3. Collection of Models of Machinery.

Machinery.

"This small collection has not been increased for want of space.

"The following were the only additions for the year 1876 :—

A model of an improved winding engine, designed by Messrs. Robey & Co. for mining purposes. The engine is of the type known as a semi-portable engine, and it is arranged for pumping as well as winding purposes.

Lent by Messrs. Robey and Co., Engineers, Lincoln.

A working machine for hand and foot use, for cutting tails and pins for dovetails in box and furniture work.

Lent by the inventor, Mr. Tyghe Hamilton, Dublin.

"The catalogue of this collection compiled and issued in 1875 is sold out. It will be revised and published again during 1877.

"The labelling and general care and arrangement of the objects and models lent to the Museum by manufacturers has been thoroughly attended to, and there is some prospect of the existing collection being increased."

4. Collection of Munitions of War.

Munitions of War.

"During the past year, 1876, nothing has been added to this collection.

"Most of the objects are out of date, but they form a valuable nucleus, to which may be added, as fit opportunity arises, examples of the more recent adoptions and improvements in war mu nitions approved in this country.

"Want of space has prevented any advance during the present year in this direction, but no difficulty in obtaining models of guns, carriages, shot and shell, cartridges, and such like objects of recent date would be found could suitable space be had in which to display them. In some instances it would be desirable to show full size objects in this collection.

"The general labelling of the collection has been kept up during the year, and the catalogue issued in 1875 is nearly sold out."

Appendix D.

REPORT ON SOUTH KENSINGTON MUSEUM.

Engraved National Portraits.

5. COLLECTION OF ENGRAVED NATIONAL PORTRAITS.

"This collection was again exhibited to a large extent during the year.

"The series, consisting of about 200 portraits of eminent learned and scientific men, was arranged in the early part of the year 1876 in the Exhibition Galleries.

"To each portrait was appended a descriptive label, and the display afforded much interest to the general public.

"Soon after Christmas these portraits were transferred to the Branch Museum at Bethnal Green for exhibition."

6. COLLECTION LENT BY THE PALESTINE EXPLORATION FUND SOCIETY.

"Nothing has been added during the year 1876 by the Society to their collection in custody of the Museum. It continues to be very attractive; many inquiries respecting it were made during the year.

"The labelling of the collection has been carefully kept up, and the valuable examples of ancient pottery, glass, and metal work contained in the collection have met with no injury.

PUBLICATIONS.

Publications.

From a return prepared by Mr. A. C. King, it appears that the following publications relating to the Museum have been issued under the authority of the Department during the year 1876:—

A descriptive catalogue of the bronzes of European origin in the South Kensington Museum, with an introductory historical notice, by Mr. C. Drury E. Fortnum, F.S.A. (issued by H.M. Stationery Office). This work is illustrated with twenty-five permanent photographs of the most important bronzes in the Museum, and by nine etchings selected from the works of students in the class at the South Kensington Art Schools under the direction of the late Richard J. Lane, A.R.A.

A descriptive catalogue of the water-colour drawings in the Museum, with an introductory historical notice, by the late Mr. Samuel Redgrave, illustrated with twelve chromo-lithographs and nine etchings, the latter the work of students in the Art Schools. The MS. of this work was in the printer's hands at the time of the death of the author on 20th March 1876. His brother Mr. Richard Redgrave, R.A., kindly undertook the revision of the proofs, and the volume has had the great advantage of his supervision. It is published by Messrs. Chapman and Hall.

A set of drawings of glass cases, &c. in the South Kensington Museum, with suggestions for the arrangement of specimens, printed by Vincent Brooks, Day, and Son. These have been prepared for the use of Schools of Art, Provincial and Foreign Museums, and supply a demand which is frequently made for working drawings and details, by the aid of which cases, fittings, &c. as used in the Museum can be constructed.

A catalogue of the Special Loan Collection of Scientific Apparatus (H.M. Stationery Office). Two editions of this catalogue have appeared, the first containing 662 and the second 1,006 pages. A third revised edition for distribution to contributors and to serve as a permanent record of this remarkable collection of Scientific Apparatus is in the press; also an edition in German, prepared at the special request of the German Commissioners.

A handbook to the Special Loan Collection of Scientific Apparatus (Messrs. Chapman and Hall). It consists of twenty-five treatises on the

various sub-divisions under which the collection was arranged, written by men of high standing in the scientific world. French and German translations of this handbook have also been issued, the former prepared by members of the Swiss Commission, the latter under the superintendence of Dr. Rudolf Biedermann of the German Commission.

Reports of the free evening lectures and of the conferences held in connexion with this exhibition are in the press.

Two more parts of the Universal Art Inventory have been issued by the Stationery Office, Part II. comprising goldsmiths' work, enamels and ivories, and Part III. bronze, copper, and iron work. A fourth part completing the work is in the press.

The following have also been issued by the Stationery Office:—

An inventory of the objects of Persian Art recently acquired.

A descriptive catalogue of the reproductions of Christian mosaics in the Museum, prepared by Dr. Appell.

A catalogue of the collection of Oriental Porcelain lent to the Bethnal Green Branch Museum by Mr. A. W. Franks, compiled by that gentleman.

A catalogue of the collection of objects of Japanese Art lent to the same Museum by Mr. W. J. Alt.

A brief companion to the pictures, &c. on loan in the Bethnal Green Branch Museum, prepared by Mr. F. G. Stephens.

Lists of the acquisitions by gift and purchase, and of loans, for the year 1875.

New editions of the catalogues of Electrotype reproductions, Fictile ivory casts, Townshend gems, National Gallery of British Art, and Examples of materials of building construction.

In continuation of the series of handbooks published for the Department by Messrs. Chapman and Hall, as announced in the 23rd Repor (p. 423), the following have since been issued by the same firm:—

A manual of design, compiled from the writings and addresses of Richard Redgrave, R.A., by Gilbert R. Redgrave.

The Industrial Arts, historical sketches in one vol.: also issued in 1[illegible] penny parts each treating of some one branch of the subject.

Persian Art, by Major Murdoch Smith, R.E., in illustration of the collections in the Museum.

Food, some account of its sources, constituents, and uses, forming a handbook to the Food Collection at the Bethnal Green Branch Museum, by A. H. Church, M.A.

Economic Entomology (Aptera). A handbook to the collection at Bethnal Green, by Andrew Murray, F.L.S.

Other works of this series are in progress.

(Signed) RICHARD A. THOMPSON,
Acting Director.

Appendix D.

REPORT ON SOUTH KENSINGTON MUSEUM.

APPENDIX TO DIRECTOR'S REPORT.

(*a.*) ART MUSEUM.

(1.) LIST of CONTRIBUTORS and LOANS to ART MUSEUM, 1876.

Alt, W. J., Esq. Collection of Japanese objects; 26 oil paintings.
Beresford-Hope, A. J. B., Esq., M.P. An oil painting by Van Eyck.
Bhopal, The Begum of. A carved stone bas-relief.
Borlase, W. C., Esq., F.S.A. A Japanese oil painting.
Brown, James, Esq. A plaster bas-relief and three plaster figures.
Cameron, Mrs. A bronze inkstand.
Cook, Francis, Esq. A large collection of maiolica, gems, ecclesiastical objects, &c.
Dulwich College, the Governors of. Two hundred and ninety-six oil paintings.
Exhibition of 1851, H.M. Commissioners of the. An oil painting; peasant jewellery, &c.
Falcke, Isaac, Esq. A vase, Wedgwood's black basalt ware.
Fuller-Maitland, W., Esq., M.P. Ninety oil paintings.
Fullerton, A. G., Esq. An earthenware dish.
Gent, Dr. A case for writing tablets.
Green, T. W., Esq. A biscuit porcelain group.
Hamilton, Lieut.-Gen. Sir F. A Cashmere painted table.
Hardinge, Hon. Mrs. A pair of Siberian jasper vases; 10 specimens of Indian jewellery.
Hooker, J. C., Esq. An oil painting.
Huntly, the Marchioness Dowager of. Eighteen pieces of Sèvres porcelain.
Jopling, J. M., Esq. A clock.
Lebègue, J. L. P., Esq. Two paintings on panel.
Little, Dr. J. A bracelet; jade official staff (Chinese); enamelled stoneware slab; pair of jade chopsticks.
Lover, Mrs. A marble bust of the late Samuel Lover.
Macdonald, Miss. Four embroidered silk panels.
Manners, Lady Adeliza. A Boule casket.
Marshall, Frank, Esq. Five pieces of porcelain.
Massey-Mainwaring, the Hon. W. F. B. Fifty-one specimens of English porcelain.
Milman, Colonel. An Indian silver service.
Moore-Brabazon, Lieut.-Colonel J. Twenty-two oil paintings.
Phillips, Bros., and Son, Messrs. A pair of Russian enamel altar candlesticks.
Redgrave, Miss. A collection of water-colour drawings, miniatures, earthenware, &c.
Russell, W., Esq. A fowling piece.
Sambon, Jules, Esq. An enamelled and jewelled monstrance.
Scheffers, Mons. Carl. Two wood boxes.
Seymour, H. Danby, Esq. A cabinet; terra-cotta group; four Limoges enamels.
Smart, R. T., Esq. An ivory diptych.
Smith, R. H. Soden, Esq. Five pieces of Chinese porcelain.
Smith, W., Esq. A steel hand mirror.
Spencer, Earl, K.G. One hundred and nineteen oil paintings and miniatures.
Stonyhurst College. Seven carved ivory diptychs, &c.
Taylor, T. T., Esq. An oil painting by Sir Joshua Reynolds, P.R.A.
Telfer, Commander J. B., R.N. A Persian enamelled earthenware tile.
Wertheimer, S., Esq. A Sèvres porcelain statuette.
Willett, Henry, Esq. An inlaid horn tray; three Chelsea porcelain vases.

Wills, Dr. Fourteen specimens of Persian engraved metal work.
Wills, Mrs. Eleven specimens of Persian enamelled jewellery.
Zouche, Lord. A collection of ecclesiastical plate, &c.

(2.) LIST of CONTRIBUTORS who WITHDREW their LOANS during the year 1876.

Barker, E. B. B., Esq.
Basilewsky, Mons.
Bing, Mons.
Blumenthal, J., Esq.
Borlase, W. C., Esq.
Bowyer, C., Esq.
Boyer, J., Esq.

Stirling, Major, R.A
Trego, Mrs. W. H. B.
Vernon, Lord.

(3.) DONATIONS and BEQUESTS to the ART MUSEUM during the year 1876.

J. F. AUSTEN, ESQ.
Fresco painting transferred to canvas. Italian. First half of 16th century. No. 362.–'76.

MONSIEUR S. BING.
Four wood panels. Japanese. Nos. 335 to 335c.–'76.

G. L. CRAIK, ESQ.
Medal, silver, struck to commemorate Thomas Carlyle's eightieth birthday. Given on behalf of the subscribers. English. 1875. No. 40.–'76.

MRS. CHARLES DOWNS.
Embroidery. English. Early 18th century. No. 39.–'76.

MRS. EARLE.
Two plaster models of statues by the late Thomas Earle. English. 19th century. Nos. 382, 383.–'76.

THE BARON DE FERRIÈRES.
Two oil paintings. Dutch. 19th century. Nos. 376, 377.–'76.

THE FISHMONGERS' COMPANY.
Carved oak cornice and pilasters. English. About 1626. Nos. 337 to 338*a*.–'76.

MRS. FORSTER.
A carved stone Chinese temple. (Registered with Forster Bequest.)

R. GODWIN-AUSTEN, ESQ.
An oak coffer. Old English. No. 381.–'76.

MESSRS. HOWELL, JAMES, & CO.
A piece of Point d'Alençon lace. French. Early 18th century. No. 364.–'76.

CHARLES INGRAM, ESQ.
Five earthenware tiles. Spanish. 15th or 16th century. Nos. 356 to 360.–'76.

MRS. MCGAREL.
Group, Capo-di-Monte porcelain. Italian. 18th century. No. 380.–'76.

Felix M. Miller, Esq.
Tinted plaster statuette. English. 1866. No. 304.–'76.

Samuel Redgrave, Esq. (the late).
Two water-colour paintings. English. 19th century. No. 259, 260.–'76.

H.I.H. The Archduke Renier.
Thirteen pieces of glazed earthenware. Austrian, 1876. Nos. 384 to 396.–'76.

R. H. Rhodes, Esq.
Figure-head of a canoe. New Zealand. No. 230.–'76.

Señora Riaño.
Earthenware and porcelain. Spanish. 18th and 19th century. Nos. 339 to 354.–'76.

Monsieur Richard.
Specimen of mineral. No. 1546.–'76.
Specimens of earthenware. Persian. 16th, 17th, and 18th century. Various numbers.

Il Cavaliere Emilio Santarelli.
A reproduction in plaster of the stucco panel, No. 251.–'76. No. '76.-38.

Monsieur Schefer.
Wood panel. Arab. A.D. 1382–1389. No. 361.–'76.

George Smith, Esq.
Plaster bust of the late William Smith, Esq. English. 19th century. No. 399.–'76.

Bequeathed by the late Wm. Smith, Esq.
A collection of one hundred and thirty-six water-colour drawings. Chiefly English. 19th century. Nos. 2926 to 3061.–'76.

Bequeathed by the late Mrs. Tugle.
Carved oak arm-chair. English. 19th century. No. 336.–'76.

Henry Willett, Esq.
Pair of clogs. English. 18th century. Nos. 53, 53*a*.–'76.

Sir M. D. Wyatt and Lady Wyatt.
A collection of one hundred and forty-eight fans, of various countries and dates. Nos. 2170 to 2317.–'76.

N.B.—Each collection of objects forming these Deposit Loans is packed in a glass case, and the outer case in which the glass case with its contents is packed for travelling, forms a base when in use in the schools. The objects are not intended as representative of the artistic and industrial contents of the Museum or for exhibition, but are selected simply as subjects suitable for grouping for the purposes of painting still life, &c. (Stage 15), or single examples (Stage 14).

Appendix D.

REPORT ON SOUTH KENSINGTON MUSEUM.

2. REPORT of the DIRECTOR for ART as to his Charge of the BRITISH and FOREIGN PICTURES and DRAWINGS in the FINE ART COLLECTIONS at SOUTH KENSINGTON.

I have to report that the paintings under my charge continue to be in a satisfactory condition, every care being taken to prevent any tendency to decay or accidental injury while open for study and inspection by the public.

The purchases that have been made this year were principally for the purpose of providing the schools at South Kensington and in the country with better examples for the students to copy; a few important specimens were, however, acquired as additions to the historical series of British oil and water-colour paintings, notably a fine landscape in oil by R. Wilson, R.A., and a large water-colour landscape by G. F. Robson. These are placed in the gallery of the Museum, but may be withdrawn from time to time for purposes of study.

A valuable fresco-painting by Perino del Vaga was presented by J. F. Austen, Esq., as an example of the Art for the use of the students in the Training School when required. The principal addition to the collection was by the bequest of the late Wm. Smith, Esq., who had already in his life-time presented many valuable water-colour drawings. A selection of 136 from among the drawings bequeathed was made by Mr. Redgrave, Mr. Thompson, and myself, according to the forms of the will, and will be known as the "Smith Bequest," and will complete the collection known as the "Smith Gift"; the drawings not selected by us being bequeathed to the Dublin Gallery.

The additions during the past year have been:—

By gift—		
Fresco-painting -	1	J. F. Austen, Esq.
Oil paintings - -	2	Baron de Ferrières.
Water-colours - -	2	The late Samuel Redgrave, Esq.
By bequest—		
Water-colours - -	136	The late Wm. Smith, Esq.
By purchase—		
Oil pictures - -	6	
Water-colours - -	23	

(Signed) EDWARD J. POYNTER,
Director for Art.

APPENDIX E.

(1.) Report of the Director-General of the Geological Survey of the United Kingdom, (2.) the Museum of Practical Geology, and (3.) the Mining Record Office.

Appendix E

Report by Prof. A. C. Ramsay.

Geological Survey Office,
Museum of Practical Geology,
28, Jermyn Street, London, S.W.,
16th February 1877.

Sir,

I have the honour to lay before you, for the information of the Lords of the Committee of Council on Education, my Annual Report of the Geological Survey of the United Kingdom, the Museum of Practical Geology, and the Mining Record Office.

1. Geological Survey of England and Wales.

Total area surveyed.

Mr. Bristow, Senior Director for England and Wales, states that the total area surveyed during the year 1876 amounts to 1,827 square miles, and the linear miles of boundary traced to 6,434.

This shows an increase of 90 square miles over the area returned for the previous year. About 450 square miles of this, however, consists of ground that had to be re-surveyed, for reasons explained by the Senior Director, which I shall quote hereafter.

North-western district.

In the north-western district, under the superintendence of Mr. Aveline, in the counties of Cumberland, Westmoreland, and Lancashire, 604½ square miles have been surveyed, with 1,966 linear miles of boundary. The formations mapped consist of Silurian with associated Volcanic rocks, Carboniferous rocks, including the measures of the Whitehaven coal field, Permian strata of the Vale of Eden, and the north coast of Cumberland, large areas of Boulder Clays and other drifts in Lancashire and North Cheshire.

Completion of districts.

The survey of the Vale of Eden, including the ground between Carlisle and the Solway Frith, has now so far advanced that there is some probability that the work, including the completion of the Whitehaven coal-field, will be carried up to the Scottish border during the present year.

In connexion with this subject, Mr. Aveline states that the survey of the Lake District is so nearly completed that only a few localities require examination.

North-eastern district.

In the north-eastern district, under the superintendence of Mr. Howell, the area surveyed amounts to 364 square miles, and the boundaries traced to 2,461½ linear miles.

This portion of the survey includes parts of Northumberland, Durham, Cumberland, and Yorkshire, and includes areas of the Carboniferous rocks (including Lead Mines) Magnesian Limestone, New Red strata, and rocks of various formations belonging to the Oolitic series, together with superficial deposits.

South-eastern district.

In the south-eastern district, comprising parts of Cambridgeshire, Norfolk, Suffolk, and Kent, 372 square miles have been surveyed, and 891 linear miles of boundary have been traced by Mr. Whitaker, and the officers under his superintendence. The formations consist of Oxford and Kimeridge Clays and Cretaceous rocks, and in the Tertiary strata, of Eocene beds and Crag, together with Boulder Clays and other drifts.

Norfolk and Suffolk.

Mr. Woodward and Mr. Reid have surveyed 117½ square miles with 368 linear miles of boundary in Norfolk, and in West Norfolk and

Appendix E. — Report of Director-General of the Geological Survey, &c.

Suffolk Mr. Skertchly has surveyed 74 square miles, involving the tracing of 131 linear miles of boundary of numerous drift deposits and Chalk.

Lincoln, Leicester, and Nottingham.

In Lincolnshire, Leicestershire, and Nottingham, Mr. Holloway has surveyed an area of 47 square miles, involving the tracing of 136 miles of boundary, including besides drift deposits, the Rhœtic beds, Lower, Middle and Upper Lias, Northampton Sand, and Inferior Oolite.

West Somerset and Devon.

In West Somerset and Devon, Mr. Ussher has surveyed an area of 81 square miles, and traced 328 linear miles of boundary, which embrace the following formations, namely, Gravels, Upper Greensands, various divisions of the New Red rocks, Culmn Measures, and Igneous rocks. He has also traced 46 additional miles of boundary lines of new subdivisions over an area previously mapped of 118 square miles of the most intricate parts of the district, and which had been already returned but not yet published.

With regard to this case, and that of Mr. Cameron combined, it appears when the individual Reports of the officers are examined, that 202 square miles are returned by them as surveyed which consist merely of additions to ground previously reported on.

Re-surveys.

On this subject, Mr. Bristow, the Senior Director, remarks, "that in "connexion with the progress of the work, and with the somewhat "large areas that it is found necessary in certain cases to revisit in "completing the geological survey of an extensive and complicated "area, on which many surveyors have been employed, some of whom "have left the service, and the new work of beginners, it is only to be "expected that some of the earlier work would have to be revised by "the experience gained as the mapping of the district progressed."

Maps.

During the year, one quarter-sheet (48 S.E.), has been published, and new editions of quarter-sheets, 1 N.W., N.E., S.W., S.E., showing superficial deposits, have also been published.

Three quarter-sheets (48 S.W., 51 S.W., 106 S.E.) have been dry-proofed and sent to the engravers.

All the above maps are on a scale of one inch to one mile, and on the same scale there are at present with the engravers at Southampton 23 quarter-sheets and one whole sheet.

Eleven sheets of county maps, on a scale of six inches to one mile, have been published, viz., Nos. 92, 104, 106, Northumberland; 35, Durham; and 134, 233, 234, 247, 276, 289, 294, Yorkshire.

Twenty-four sheets of county maps on the scale of six inches to one mile have been dry-proofed and sent to the engravers.

Four sheets (Nos. 14, 61, 76, 150) of the six-inch map of Yorkshire have been drawn and coloured geologically and deposited in the office for reference; these sheets are adjacent to published maps, but are not intended for publication.

Five sheets on a scale of six inches to one mile (War Department maps of Surrey and Kent Hills) have also been coloured geologically and deposited in the office.

Five sheets of horizontal sections (Nos. 96, 98, 99, 100, 102), illustrating the Geology of the Yorkshire coal-field; one sheet (No. 110) of the Northumberland coal-field have been published, and other sheets are in preparation.

Five sheets of vertical sections have been published. Two illustrating part of the Northumberland coal-field (Nos. 56, 60). One part of the Lancashire coal-field (No. 61), and two (Nos. 58 and 59), parts of Somersetshire.

Four sheets of horizontal sections illustrative of the Geology of the Lake District (Nos. 114, 115, 117, 118) are in the hands of the engraver.

Four memoirs have been published during the year, viz.:— Memoirs published.

(1.) "The Geology of the northern part of the English Lake District," by Mr. J. C. Ward, illustrating quarter-sheet 101 S.E. of the one-inch map of England and Wales, and the included six-inch county maps, viz.: sheets 63, 64, 69, 70, 71, 76, and and portions of sheets 54, 55, 56, 57, 62, 65, 68, 73, 74, 75, Cumberland, and sheets 12, 18, 19, Westmoreland.

This memoir is the first issued by the Geological Survey containing drawings (reproduced by chromo-lithography) showing the microscopic character of the Igneous rocks of the district; besides which Mr. Etheridge (Palæontologist) has contributed a description of some new fossils.

(2.) "The Geology of the East Somerset and Bristol Coal-fields," by Mr. H. B. Woodward, illustrating parts of sheets 18, 20, 21, 35, and the whole of sheet 19 of the one-inch map of England and Wales. This memoir is also illustrated by drawings (reproduced in chromo-lithography), showing the microscopic character of the eruptive rocks of the district, with descriptions of them by Mr. Frank Rutley, while Mr. Etheridge has described some new fossils and revised the general list in the Appendix.

(3.) "The Superficial Deposits of South-west Lancashire," by Mr. C. E. De Rance.

(4.) "Explanation of Quarter Sheet 48 S.E.," by Mr. William Whitaker, illustrating the country around Harwich and Walton-on-the-Naze, and contains the first notice of the Crag deposits yet published by the Survey.

The following memoirs are now nearly ready for publication, viz.:— Memoirs ready for publication.

(1.) "The Geology of the Fenland," and

(2.) "The Manufacture of Gun-Flints;" both by Mr. Skertchley.

(3.) "Monograph on the Reptilian Remains of Elginshire," by Professor Huxley, F.R.S.

The following memoirs are also far advanced, and will soon be ready for the printers, viz.:— Memoirs in hand.

(1.) "On the Igneous Rocks of Brent Tor and its neighbourhood," by Mr. Frank Rutley.

(2.) "Monograph on the Cretaceous Chimeroid Fishes," by Mr. E. T. Newton.

In connection with the field-work many fossils have been collected by the fossil collector Henry Allen. Fossils collected, &c.

The office work has been conducted to my entire satisfaction. Office work.

Mr. Pugh has rendered very efficient aid in the general work of the Department, and for a period of three months in the year, when Mr. Best was unavoidably absent, Mr. Pugh had entire charge of the office and correspondence, the duties of which he discharged to my complete satisfaction.

GEOLOGICAL SURVEY (SCOTLAND).

Professor Geikie, the Director for Scotland, reports that during the year 500 square miles have been surveyed. Total area surveyed.

For the more rapid completion of the remaining portion of the southern counties Professor Geikie placed two assistant geologists, in addition to the three already engaged there, and is now able to report the complete survey of the whole of the high and wild district of Galloway. The Canobie coal-field, together with the adjoining districts of Roxburghshire and Dumfriesshire have also been completed. There now remains in the south of Scotland the high ground at the head of the Borthwick and Teviot Waters, comprising about 180 square miles. Much of this

Galloway.

Canobie coal-field.

Ground remaining.

Appendix E.

REPORT OF DIRECTOR-GENERAL OF THE GEOLOGICAL SURVEY, &c.

ground is not easily accessible and presents considerable geological difficulties. During the present year Professor Geikie proposes to leave the remainder of the southern counties in the hands of Mr. B. N. Peach, who, by long experience, is most competent to deal with the difficulties still remaining.

Old Red Sandstones south of the Highlands.

The survey of the Old Red Sandstone on the south of the Highlands, and also on the north, is now being carried on, whilst that of the great Valley of Strathmore to the south of the Grampians will be continued by three members of the survey under the superintendence of Mr. James Geikie, the district surveyor. As the work in the southern counties draws to a close the officers engaged there will be successively transferred to the ground on the north of the Highlands. A chain of stations will thus be established on both sides of the great Grampian range.

Professor Geikie has made many traverses of the country north of the Grampians, for the purpose of making himself acquainted with the general characters and varieties of the Old Red Sandstone there, which is of a type very different from that on which the survey has hitherto been engaged.

Future Reports.

Professor Geikie expects that his Reports for some time to come will detail the progress of the work as it advances from either side towards the central mountains.

Maps with engravers.

The maps reported on last year as engraving are still in the hands of the engravers, and I am therefore sorry to say no sheet has been published.

In answer to a request for proofs, I was informed that such had been the press of work at the Ordnance Survey Office, Southampton, that only one of the maps referred to in my last Report had been begun, but that the whole would be taken up as early as possible.

Mr. Jack's resignation.

Mr. R. L. Jack, having accepted the appointment of geologist for Northern Queensland, it became necessary to provide for the completion of all his maps and notes in such form that they could be made available and published after his departure for the colony, and this required his removal to the office, and the consequent diminution of his area of field work. Mr. Jack's contemplated resignation will entail a great loss to the geological survey of Scotland, by the permanent deprivation of services, which after ten years of training have made him one of the best surveyors on the staff.

Loss of skilled surveyors.

The loss of such skilled surveyors is much to be regretted, as it seriously delays the progress of the work, and apparently could only be avoided by a higher scale of pay for men who are deserving of it.

Maps.

Twelve sheets of the six-inch maps, illustrative of the coal-fields of Clackmannan, Linlithgow, and Lanarkshire, reported last year as engraving are still in that condition.

Twelve sheets of the one-inch map have now been prepared for the engravers, some of which are being engraved. These embrace all the remaining maps of the south of Scotland, except one, and likewise the important sheets which include the country between Glasgow and Greenock, and between Callander, Dollar, and Culross.

One sheet of horizontal sections has been published, comprising 36 miles of Carboniferous, Old Red Sandstone, and Silurian rocks, from Beith to Garelockhead.

Fossils collected.

Four thousand two hundred and eighty-one fossils have been collected from the Silurian, Old Red Sandstones, Carboniferous and Post Tertiary formations; 726 of these have been examined and a named.

Besides the ordinary work of the Palæontological Department of the Scotch surveys, much time has been given to the important task of naming and labelling a large series of specimens collected by the Survey

to illustrate the geology and palæontology of the basin of the Forth, and now being arranged in the Museum of Science and Art in Edinburgh. This work has been carried on with much success by Mr. Robert Etheridge, junior, acting palæontologist, and by Dr. J. C. Purves, who has been employed for the purpose by the Director of the Museum, and co-operates with the officers of the Survey. Up to the end of the year, 1,377 fossils have been arranged and exhibited. It is believed that when this collection is completely exhibited, it will form one of the most important and instructive illustrations of Scottish Palæontology which has yet been exhibited to the public.

Fossils arranged in Museum.

Rock specimens to the number of 289, have been collected during the year, illustrating the geological structure of the counties of Kirkcudbright and Wigtown.

Rock specimens collected.

During the intervals of field-work considerable progress has been made in the preparation of horizontal sections, explanatory of the southern half of Scotland. Ninety miles, on a scale of six inches to one mile, have been drawn, of which the greater part is nearly ready for the engraver.

Sectional maps.

Vertical sections of portions of the coal-fields surveyed have been obtained from coal-masters and others, to the amount of 28,293 feet.

It is satisfactory to be able to report a large increase in the sale of the one-inch maps as compared with that of last year.

GEOLOGICAL SURVEY (IRELAND).

During the year, 746 square miles of fresh ground have been surveyed, embracing 1,370 linear miles of boundary, and 40 miles of coast examined. In addition to this, 291 square miles have been re-surveyed, with 380 linear miles of boundary; making in all, 1,037 square miles, with 1,790 miles of boundary lines and coast completed.

Total area surveyed.

Area re-surveyed.

The distribution of the areas surveyed and re-surveyed in reland is shown in the Tables 3 and 4 accompanying this Report.

Professor Hull states, that during the year five sheets on the scale of one inch to one mile have been published, viz., Nos. 53, 60, 67, 71, and 93, making, with those of previous years, a total of 151 sheets published up to the end of the year.

Maps.

A new edition of sheet 36, on a scale of one inch to one mile, has been engraved on a hill-shaded plate and published during the year. There are also seven sheets in preparation for publication, viz., sheets 34, 40, 41, 65, 68, 69, 94, on a scale of one inch to one mile.

In addition to the above, three sheets on a scale of six inches to one mile have been published during the year, viz., sheet No 2, Roscommon; sheet No. 35, Sligo; and sheet 20, Leitrim; also two sheets on the same scale are being engraved, viz., No. 21, Leitrim, and No. 46, Tyrone. All these sheets contain coal measures.

During the year two memoirs have been published, one referring to sheets 21, 28, 29, County Antrim, written by Professor Hull, and another on sheets 73, 74, 83, and 84, written by Messrs. Kinahan, Symes, Nolan, and Leonard.

Memoirs.

Other memoirs are in various stages of preparation.

Good progress has been made in re-labelling the specimens of fossils in the Palæontological Gallery of the Royal College of Science. On this work Mr. McHenry has been principally employed, under the supervision of Mr. W. H. Baily, the Acting Palæontologist.

Mr. Baily states that during the year about 1,000 fossils were collected, while about 3,500 were examined and named by him. Mr. Baily also visited several fossil localities, and prepared palæontological notes for several memoirs in course of publication.

Fossils collected.

Appendix E.

REPORT OF DIRECTOR-GENERAL OF THE GEOLOGICAL SURVEY, &c.

GEOLOGICAL SURVEY AND MUSEUM OF PRACTICAL GEOLOGY.

PALÆONTOLOGICAL DEPARTMENT.

Palæontological department.

Mr. Etheridge, the Palæontologist, reports, that during the year, 9,000 specimens have been carefully examined and named.

The following is the tabulated result of the species examined. It will be seen that 1,200 are foreign, 866 having been brought to this country by Dr. Hector from New Zealand, and 334 from the Arctic Regions, collected during the late expedition by Captain Fielden, R.A. :—

Silurian	143	
Devonian	20	
Carboniferous	2,128	
Rhœtic	40	
Lias	2,007	
Oolite	406	
Wealden	1,193	
Cretaceous	1,720	
Eocene	30	
Crag	10	
Pleistocene	28	
	7,725	British.
	1,200	New Zealand and Arctic.
Total	8,925	

Some 1,200 specimens were examined and named at Brighton, occurring in the cores brought up during the process of boring in the Weald.

Mr. Etheridge, during some parts of the year, was engaged in work connected with the Survey in North Wales, and also on the Yorkshire coast, aiding in the construction of sections and preparing lists of fossils both for the memoir and maps of that district. Mr. Etheridge, assisted by Mr. Sharman, has spent much time in preparing and naming the Tate collection of fossils, for the purpose of their being placed in the Museum. This collection, and all the species collected by the Survey, as also those received from all other sources during the year, have been registered in the catalogues of the Department by Mr. Sharman, with the assistance of Mr. Walters, the fossil collector.

Mr. Etheridge, in addition to the above work, has contributed descriptions of new fossils, and revised the lists of fossils for the memoirs issued by the Survey.

Three thousand one hundred and ten specimens have been handed over to the Museum Department, 1869 of which have been placed in the cases of the Museum.

NATURALIST'S DEPARTMENT.

Professor Huxley.

Professor Huxley reports to me that during the year the entire Cretaceous series has been re-arranged, and the vertebrate fossils of this series, to which a large number of new specimens have been added, have been carefully examined and a brief descriptive catalogue of them has been prepared and will be speedily printed.

A catalogue of Tertiary and Post Tertiary fossils is far advanced and will shortly be ready for publication.

A considerable proportion of the Palæozoic fossils in the Museum has been cleaned and re-labelled.

Several collections purchased at intervals, as the Lycett Collection, Carrington Collection, and Tait Collection, will be incorporated with fossils already in the Museum as soon as room can be provided for them by the removal of the Rock Collections to other cases.

Professor Huxley's Monograph on the Reptilian Remains of Elginshire has been revised by him, considerable additions having been made to it; and it is now passing through the press.

Mr. E. T. Newton has written an excellent memoir on the Cretaceous Chimeroid Fishes, which is now ready for the printers.

Donations.

A list of the Donations is appended, the most important of which are the Neocomian fossils presented by Professor Hughes, and the large series from the Forest Marble presented by W. Walton, Esq.

(2.) MUSEUM OF PRACTICAL GEOLOGY AND LIBRARY.

Number of visitors.

Mr. Trenham Reeks, the Curator and Librarian, reports to me that the number of visitors during the year corresponds very nearly with those for 1875, namely, 24,922 in the morning, and 14,891 in the evening; together, 39,813, as compared with 39,686 in the previous year.

Catalogues.

The third edition of the Catalogue of Specimens in the Museum, illustrative of the composition and manufacture of British Pottery and Porcelain, has been issued to the public.

The Catalogue of the Library is now completed and in the hands of the printers.

A new edition (the fourth) of the descriptive Guide to the Museum has during the past year been prepared by Mr. Rudler and is now in the hands of the public.

Resignation of Mr. Rudler.

It is with extreme regret that I have to record the resignation of Mr. F. W. Rudler, the Assistant Curator, who has for the last 15 years so ably and zealously discharged his duties. Steps have been taken to fill the vacancy by public competition.

Donations.

The donations to the Museum and Library are enumerated in separate lists appended to this Report.

(3.) MINING RECORD OFFICE.

Mining Record Office.

Mr. Robert Hunt, the Keeper of Mining Records, reports to me that beyond spending a few days in February in Cambridgeshire and Herefordshire, making inquiries relative to the Coprolite production, his time was devoted to the duties of the Mining Record Office in London, until April. He then left London and proceeded to the coal districts of the Midland counties to prosecute inquiries into the produce of the collieries and the Iron-works. From thence he went into Yorkshire, pursuing similar inquiries, and afterwards visited with the same object Durham and Northumberland. The Lead mines of those counties and the iron-ore mines of Cleveland were the subjects of investigation.

Having completed his labours over those extensive districts, he proceeded through Lancashire, Cumberland, and Westmoreland, to examine the red hematite iron mines of the Furness and Whitehaven districts, returning through Shropshire to South Staffordshire, in which counties he received great assistance from the coal trade associations, and from thence came to London.

Compilation of mineral statistics.

Having compiled the returns for the mineral statistics for 1875, and placed all the matter in the hands of the printers, Mr. Hunt proceeded in July into the west of England, visiting the iron mines near Bristol,

Appendix E. — Report of Director-General of the Geological Survey, &c.

and all the important copper, tin, and lead mines between Exeter and the Land's End. Thus within the year he examined every important mineral district in England and Wales, and completed the mineral statistics at the end of August. The publication of them, however, was most unfortunately delayed until November, by circumstances over which he had no control.

Mr. Hunt repeats his acknowledgments of the valuable services of his assistants Mr. Richard Meade and Mr. James B. Jordan, who have assiduously devoted themselves to carrying out the duties of the Mining Record Office in the most complete manner.

Mr. Hunt completes his Report with a list of the documents that have been deposited in the Mining Record Office during the year.

Tabular statements, &c. accompanying Report.

The following Tabular Statements and Lists which have been referred to above are hereunto annexed, namely :—

(1.) Table showing distribution of field-work in England and Wales.
(2.) Do. Do. in Scotland.
(3 and 4.) Do. Do. in Ireland.
(5.) A list of the donations of Fossils.
(6.) A list of the donations to the Museum.
(7.) Do. to the Library.
(8.) List of the documents (plans, &c.) deposited in the Mining Record Office.
(9.) A return of maps and other survey publications supplied to the Government agents for sale.

Index maps.

The accompanying index maps, A., B., C., show the state of the Surveys on the 31st of December last in England, Scotland, and Ireland.

I have the honour to be,
Sir,
Your obedient servant,
Andrew C. Ramsay,
Director-General.

The Secretary,
Science and Art Department,
South Kensington, S. W.

5. DONATIONS of FOSSILS, 1876.

BOSWORTH, J. A., Esq., F.G.S.—Some specimens of Spiroris carbonarius, from the Coal Measures of Child's Ercall, Shropshire; from a boring 1,140 feet deep.

BRISTOW, H. W., Esq., F.R.S.—Twelve Lamellibranchs from the upper part of the Chillesford Beds, Aldeby; and one foot-bone of pig from the Boulder Clay.

CHAMPERNOWNE, A., Esq., M.A.—Eleven Brachiopods and nine Lamellibranchs from the Upper Devonian, near Paignton, Devon.

COCKBURN, Lieut.-Colonel, R.A.—Five Echinoderms, one Coral, one Brachiopod, and one Gasteropod, from the Lower Chalk of Dover.

COMMITTEE OF SUB-WEALDEN BORING.—One Callianassa isochæla, from the Kimmeridge Clay of the Boring at Netherfield, near Battle.

COOPER, Dr. R. S.—Two Megalichthys jaws from the Coal Measures of Parkfield, Wolverhampton; one Plesiosaurus bone from the Kimmeridge Clay of Weymouth; and 24 teeth and bones from the Post Pliocene, or alluvial sands of Weymouth.

GOODWIN, R. Gill.—Two specimens of Meristella tumida, from the Wenlock Shale of Dawend, Walsall.

HUGHES, Prof. McKenny, M.A.—A large series of Mollusca and Echinoderms, &c., from the Lower Greensand of Brickhill.

JONES, Prof. Rupert, F.R.S.—A specimen of Annelid boring in Gault, from Westwell Leacon, Kent.

JORDAN, S., Esq.—Three hundred and fifty-nine specimens from the Carboniferous Limestone and Oolites, including Corals, Echinoderms, Mollusca, Fish, and some rock specimens.

JUKES-BROWNE, Esq., B.A.—The original figured specimen of Illænus Barriensis, from the Wenlock Limestone of Barr Beacon, Staffordshire; also a Carnivor tooth from the Post Pliocene Gravels of Barnwell.

MEUX'S BREWERY, Manager of ——.—A specimen of Ammonites varians from the Lower Chalk, obtained from a boring at a depth of 805 feet below the level of Oxford Street, London.

MILLER, Hugh, Esq., F.G.S.—A specimen of Cheirolepis, from Eddertown, Ross-shire.

MONEY, Walter, Esq.—A Pectunculus cast from the Basement Bed of the London Clay, of Clay Hill, Shaw, Newbury.

NEATE, Percy, Esq.—A series of small Nummulites, from the Barton Beds of Alum Bay.

ROTH, Walter, Esq.—One Sponge from the Upper Chalk of Gravesend.

SAVILE, C., Esq.—Twenty-four specimens from the Greensand of Haldon Hill, Devon, comprising Corals, Mollusca, and Annelids.

SHRUBSOLE, G. W., Esq., F.G.S.—Some Foraminifera from the London Clay of Sheppy.

STEPHENS, D., Esq., F.G.S.—Six specimens of Terebratula Stephensii, from the Inferior Oolite of Bradford Abbas.

WALKER, J. F., Esq., M.A.—One Ammonites rostratus, from the Coprolite Bed near Tring; one Terebratula Ferryi from the Inferior Oolite of Yeovil; six specimens of Rhynchonella Leedsii from the Cornbrash of Peterborough; two Ammonites communis from the Upper Lias of Bugbrook Canal; a series of Post Pliocene Mollusca from Bridlington; 10 specimens of Waldheimia numismalis from the Middle Lias of Fenny Compton; and one Terebratula Etheridgii from the Inferior Oolite.

WALTON, W., Esq.—A series of 466 specimens from the Forest Marble of various localities, comprising Lamellibranchs, Gasteropods, and Serpulæ.

WARNE, Mrs. Elizabeth.—A portion of a Fish (head, jaws, &c.) from the Gault of Folkestone.

(Signed) A. C. RAMSAY,
Director-General.

6. DONATIONS to the MUSEUM.

BOOT, J. T., Esq.—Vertical section of strata, at Scarle, near Lincoln.
BRAIN, W. B., Esq.—Specimens illustrative of the manufacture of his electric fuzes.
BRITTEN, B., Esq.—Glass prepared from blast-furnace slag.
BROWN, C. B., Esq.—Stone implement, from Tapagos river, branch of the Amazon.
CAMPBELL, M., Esq.—Specimens of magnetic iron sand, native sulphur, and volcanic rocks, from Nevis, W. T., and three stone implements from Turks' Island.
CAMPBELL-JOHNSTON, A. R., Esq.—Native gold, from South Africa.
CARPENTER, J. H.—Emery, from New York.
DAVIES, —, Esq.—Silicified wood, from California.
DIAMOND, Dr. H.—Two porcelain plates, with mottoes, &c.
DUNBAR, A. H., Esq.—Two Wedgwood wine-bin markers.
—— Earthenware figure, of Porto Bello manufacture.
DUNN AND COMPANY, Messrs.—Pumice from Lipari Islands.
FERGUSON, J., Esq.—Galena, from the Transvaal.
FRIAR, —, Esq.—Lievrite and hornblende, from Tuscany.
HALL, T. M.—Dendritic sandstone, from Pickmell Down, near Barnstaple.
HECTOR, Dr.—Model of New Zealand.
KLINGENDER, E., Esq.—Nickel ore from New Caledonia.
LOCKHART, Dr.—Chinese enamelled porcelain tablet.
—— Chinese chalcedony, and brecciated stone balls.
LOVELL, Miss.—Tyg and jug of early Ticknall pottery.
MAGGS, T. C., Esq.—Seventy-five specimens of polished agates, &c., made by the late E. Turberville, Esq., of Pitton, Barnstaple.
MANFRED, Dr.—Montezuma onyx marble, from Mexico.
PARKES, A.—Nickel ore from New Caledonia.
REPUBLIC IRON COMPANY.—Magnetic iron ore, from Lake Mariquetta, Michigan.
SMITH, W. J. B.—Mouth-piece of jet-pipe, from Scarborough.
TAYLOR AND SONS, Messrs.—Fine specimen of phosphorite, from the Lahn valley.
WARNE, Mrs. E.—Geode in granitic rock, from Rocky Mountains.
WESTON, W., Esq.—Stone implement from Wensleydale.
WILLETT, H., Esq.—Bishop's Waltham terra-cotta tobacco-jar.
—— Jar in Japanese cloisonné enamel.
—— Plate in Japanese enamel, gilt.

(Signed) A. C. RAMSAY,
Director-General.

7. DONATIONS to the LIBRARY.

ANDREW, T., Esq.—Geological and Archæological Papers. By the donor. 8vo. Northampton, 1875.
BARROIS, C., Esq.—Terrain Crétacé Supérieur de l'Angleterre, &c. By the donor. 4to. Lille, 1876.
BELGIUM, ROYAL ACADEMY OF SCIENCES.—Mémoires, Bulletins, Annuaire, &c. 152 vols., 4to. and 8vo. Bruxelles, 1838–75.
BELLINGHAM, W.—Reports on the Channel Tunnel. Folio and 8vo. 1875.
BRITISH MUSEUM TRUSTEES.—Catalogue of the Striges. By R. B. Sharpe. 8vo., cloth. London, 1875.
BROWN, C. B., Esq.—Canoe and Camp Life in British Guiana. By the donor. 8vo., cloth. London, 1876.
CIVIL ENGINEERS, Council of the.—Proceedings. 3 Vols. 8vo., cloth. London, 1875–76.
CLARKE, Rev. W. B.—Mines, &c., of New South Wales. 8vo. Sydney, 1875.

COMSTOCK, T. B. Esq.—Report upon North-western Wyoming, &c. By W. A. Jones. 8vo., cloth. Washington, 1875.
DELGADO, J. F. N.—Terreno Siluriano no Baixo Alemtejo. 4to. Lisboa, 1876.
DUNN, E. J.—Geological Map of South Africa. By the donor. London, 1876.
DUTTON, F., Esq.—South Australia. Edited by W. Harcus. 8vo. London, 1876.
HAYDEN, T. V.—Geological Survey of the Territories. 4 vols. 4to. and 8vo. cloth. Washington, 1875–76.
HECTOR, Dr. J.—Geological Map of New Zealand. Wellington, 1873.
—— Official Handbook of New Zealand. 8vo. London, 1875.
HUNGARIAN ACADEMY.—Icones Selecta, &c.
ITALIAN MINISTER OF AGRICULTURE.—Repertorio delle Miniere. Serie 2. 2 vols. 8vo. Roma, 1874–75.
KIMPTON, H.—Plattner's Manual of Qualitative and Quantitative Analysis. 8vo., cloth. London, 1875.
LIVERSIDGE, Prof.—Transactions of the Philosophical Society of New South Wales, &c. 8vo. Sydney, 1862–75.
MECHANICAL ENGINEERS, Council of the.—Proceedings of the Institution. 15 vols. 8vo. Birmingham, 1861–75.
NORTH OF ENGLAND INSTITUTE OF MINING ENGINEERS, Council of the.—Transactions, Vol. 25. 8vo., bound. Newcastle-on-Tyne, 1876.
PITTMAN, E., Esq.—Geological Map of Australia, &c.; by R. B. Smyth. 1873.
POOLE, H. S., Esq.—Report of Department of Mines, Nova Scotia. 8vo. Halifax, 1876.
RAMSAY, Prof.—L'Université de Liége; par Al. de Roy. 8vo. Liége, 1869.
—— Map of Coal Fields of New South Wales; by J. Mackenzie. 1873.
—— Report on the Geology and Gold Fields of Otago. By F. W. Hutton and G. H. Ulrich. 8vo., cloth. Dunedin, 1875.
RIBEIRO, Senhor C.—Carta geologica de Portugal. By the donor, &c. 1876.
SELWYN, A. R. C., Esq.—Geological Report on Canada. 1874–75.
TENNANT, Prof.—Opuscules de Physique. Par M. l'Abbé Spallanzani. 2 vols. 8vo. Genève, 1777.
TORELL, M. C.—Geological Survey of Sweden. Maps, &c., in continuation.
VICTORIA, Agent-General for.—Statistical Register of Victoria, and Australia Statistics. Parts, folio. 1874.
—— Victorian Year Book, by H. H. Hayter. 8vo. Melbourne, 1875.
VIENNA ACADEMY.—Sitzungsberichte. Parts, 8vo. Wien, 1875.
WARNE, Mrs. E.—Summering in Colorado. 8vo. Denver, 1874.
WILSON, J., Esq.—Photograph of Cruziana semiplicata.

8. LIST of DOCUMENTS added to the MINING RECORD OFFICE during the Year 1876, and of MINE PLANS and SECTIONS completed to this date.

1. Australia, Geological Map of, by Brough Smyth, Esq.
2. Balmynheer Mine, Wendron, Cornwall, plan of workings on North lode.
3. Do. Do. Do. South lode.
4. Do. Do. transverse sections on North and South lodes.
5. Blubberhouse Lead Mine, Wharfdale, Yorkshire, plan of Mine levels, 1873.
6. Botallack Mine, Saint Just, Cornwall, plan of mine workings.
7. Do. Do. plan of workings on Carnyorth.
8. Do. Do. longitudinal section on Crown's lode.

9. Botallack Mine, Saint Just, Cornwall, longitudinal section on Huel Cock lode.
10. Do. Do. longitudinal section on Huel Loor lode.
11. Brookwood Mine, Buckfastleigh, Devon, plan of workings, showing ground in dispute.
12. Burrow and Butson Mine, Saint Agnes, Cornwall, plan of workings to 62 fathoms level.
13. Crenver and Abraham, Crowan, Cornwall, plan of mine workings.
14. Do. Do. longitudinal section of mine workings.
15. Crushing and Pulverizing Machinery, illustrations of Green's Patent.
16. East Caradon Mine, Linkinhorne, Cornwall, plan of surface sett, and workings.
17. East Grenville, Camborne, Cornwall, plan of mine workings.
18. Do. Do. longitudinal section of mine workings.
19. East Phœnix Mine, Linkinhorne, Cornwall, plan of workings.
20. Gavel Lead Mine, near Buckden, Yorkshire, plan of underground workings.
21. Gavel Lead Mine, Map of Ordnance Survey, sheet No. 98, with the levels of Gavel Mine.
22. Gavel Mine, "MS." Notes descriptive of the mine.
23. Gonamena Mine, St. Cleer, Cornwall, plan of mine levels.
24. Grimwith Mines, Skipton, Yorkshire, plan of Game, Ing, and Hebden districts.
25. Grimwith Mines, Skipton, Yorkshire, general plan of the districts.
26. Do. Do. working plan, scale 8/ms.
27. Do. Do. longitudinal section line of Red Scar level.
28. Do. Do. longitudinal section line of Gate up Gill to Bycliffe.
29. Do. Do. section of the Red Scar engine shaft.
30. Hartley Colliery, Durham, section of the Hester Pit to the Low Main Coal Seam.
31. Hartley Colliery, Durham, plan of the workings, on the Low Main Coal Seam.
32. Huel Bassett, Cornwall, longitudinal section on North lode.
33. Do. Do. Do. the Carbona.
34. Huel Betsey, Mary Tavy, Devon, general sketch of surface, &c.
35. Do. Do. longitudinal section of workings.
36. Do. Do. plan of mine workings.
37. Huel Grenville, Cornwall, plan of mine workings.
38. Do. Do. longitudinal section on Main lode.
39. Do. Do. Do. Tin lode.
40. Huel Kitty, St. Agnes, Cornwall, plan of Mine workings.
41. Do. Do. longitudinal section on Pryor's lode.
42. Do. Do. Do. Huel Kitty lode.
43. Do. Do. transverse section.
44. Huel Seton, Cornwall, plan of underground workings.
45. Do. Do. longitudinal section on Middle lode.
46. Do. Do. Do. Tilly's shaft.
47. Huel Uny, Cornwall, plan of workings.
48. Do. Do. longitudinal section on Main lode.
49. Do. Do. Do. North lode.
50. Mellanear Mine, Cornwall, plan of mine workings.
51. Melyn Moor Mine, Cornwall, plan of mine workings.
52. Do. Do. longitudinal section of mine workings.
53. Do. Do. transverse section of mine workings.
54. New Huel, Trelawney, Cornwall, plan of surface and workings.

Appendix E.

REPORT BY PROF. A. C. RAMSAY.

55. New Rosewarne Mine, Cornwall, plan of workings showing new ground.
56. Do. Do. longitudinal section of mine workings.
57. New Zealand, Sketch Map Geological, by Dr. Hector.
58. Penhalls Mine, Cornwall, plan of mine workings.
59. Do. Do. section on engine shaft.
60. Do. Do. Do. flat rod shaft.
61. Penstruthal Mine, Cornwall, longitudinal section on Highburrow lode.
62. Polrose Mine, Cornwall, plan of mine workings.
63. Do. Do. section of mine workings.
64. Scalehurn Mine, Cumberland, plan of workings from east to west, with notes.
65. Seghill Colliery, Durham, plan of the workings on Low Main Coal Seam.
66. South Caradon, Cornwall, plan of Lower levels from 184 to 230 fms.
67. South Carn Brea, Cornwall, plan of mine workings.
68. Do. Do. longitudinal section of mine workings.
69. South Condurrow, Cornwall, plan of mine workings.
70. Do. Do. section on Huel Bassett lode.
71. Do. Do. section on Middle lode.
72. South Terras Mine, Cornwall, plan of mine workings and section.
73. South Wendron Mine, Cornwall, plan and section of mine workings.
74. The Lovell's Mine, Cornwall, plan of workings on North and South lodes.
75. Treleigh Wood Mine, Cornwall, plan of sett and workings.
76. West Huel Bassett, Cornwall, section of Peat lode.
77. Do. Do. longitudinal section of North lode.
78. West Caradon Mine, Cornwall, plan of mine workings.

(Signed) A. C. RAMSAY,
Director-General.

Particulars of Survey Publications issued.

TABLE 9, showing Number of MAPS and other PUBLICATIONS* supplied to the Government Agents by the Geological Survey of the United Kingdom during the year 1876.

	England.	Scotland.	Ireland.	Total.
Whole sheets, scale, 1 inch to 1 mile	406	157	184	747
Quarter sheets ,, ,,	1,325*	—	—	1,325
Index maps ,, 1 inch to 4 miles	9	—	—	9
County maps ,, 6 inches to 1 mile	824†	377	26	1,227
Horizontal sections, sheets - -	532	4	9	545
Vertical sections, sheets - -	466	62	—	528
Index of colours, sheets - -	14	—	—	14
Total in 1876 - -	3,576	600	219	4,395
Total in 1875 - -	4,105	519	121	4,745
Total increase - -	—	81	98	—
Total decrease - -	529	—	—	350

* All Memoirs are now issued by Her Majesty's Stationery Office.

† The issue of one-inch maps of England and Wales shows a decrease of 58·57 °/₀, as against 1875, but there is an increase of 45·87 per cent. in the six-inch county maps issued during the year.

Registrar.

METALLURGICAL LABORATORY.

This laboratory has again been filled almost to the full extent of the accommodation it affords. The following is a return of the attendance of the students for the sessions 1875 and 1876:—

	1875.	1876.
Spring term - - -	25	25
Summer „ - - -	25	24
Winter „ - - -	26	26
	76	75

CHEMICAL DEPARTMENT.—SCIENCE SCHOOLS.

SIR, South Kensington Museum, 31st May 1877.

HEREWITH I transmit to you schedules showing the numbers and classes of students who have received practical instruction in the laboratories of these schools during the year 1876.

Shortly summarised these schedules show the following numbers:—

—	Students of the School of Mines.	Special Students.	Science Teachers and Royal Exhibitioners.	Total.
Spring Session -	30	52	19	101
Summer „ -	27	46	17	90
Winter „ -	27	45	20	92
	84	143	56	283

The following table compares these numbers with those of the previous three years:—

—	1873.	1874.	1875.	1876.
Students of the School of Mines -	101	113	99	84
Special Students - - -	103	125	131	143
Science Teachers and Royal Exhibitioners.	41	56	57	56
	245	294	287	283

The progress and conduct of the laboratory students has been very satisfactory. With few exceptions they had acquired a competent knowledge of both qualitative and quantitative analysis when the usual course of instruction was completed.

In the research department of these laboratories the investigations by Mr. Norman Lockyer on conical and terrestrial spectroscopy have been successfully prosecuted throughout the year. The results have been communicated to the Royal Society.

At the request of Her Majesty's Secretary of State for the Colonies an investigation of Cave Earth sent by the Governor of the Bahamas has been made. It was found to consist chiefly of excrementitious matters, and to be a valuable manure.

Appendix F.

REPORT BY DR. FRANKLAND.

Several samples of rocks from Gibraltar sent to me by the Director-General of the Geological Survey of Great Britain and Ireland have been analytically examined and reported upon.

The illuminating power of the gas delivered to consumers in London has frequently received the attention of Parliament, and in consideration of the large profits made by the gas companies successive Acts have received the Royal assent, whereby a higher standard of illumination has been insisted upon. Before the year 1860 the standard of illuminating power was 12 candles for a flame consuming 5 cubic feet of gas per hour; it was then raised to 14 candles, and lastly, in or about the year 1866, to 16 candles for the same rate of consumption. It has been often remarked by gas consumers, that although the illuminating power was ostensibly augmented to the extent of no less than 33 per cent., the light which they actually obtained was not perceptibly brighter. This popular impression of the constancy of the illuminating power of the gas has been remarkably confirmed by the investigations of my pupil, Mr. Humpidge, carried on here during the past year, and published in the Journal of the Chemical Society. In the year 1851 I made a series of careful analytical examinations of the London coal gas, and found that it contained a per-centage of illuminating constituents, the average light giving value of which was expressed by the number 7·01. Mr. Humpidge's determinations made by the same methods and instruments, showed that the London coal gas delivered to consumers in 1876 had an average light giving value equal to 7·02, which is substantially identical with the light giving value in 1851. Notwithstanding therefore the efforts of Parliament to obtain for consumers gas of a higher quality, the illuminating power of London coal gas has remained stationary during the past quarter of a century. The illuminating power, as announced from the official testing stations, has it is true always shown that the companies were complying with the Acts of Parliament which prescribed an increase of illuminating power equal, eventually, to 33 per cent., but Mr. Humpidge has proved that this result has been achieved *solely* by the alteration of the testing burner, for he found that the testing burner employed from 1860 to 1866 (when the 14-candle standard was required) gave, when compared with the burner in use previous to 1860, an additional light equal to two candles, whilst, when burnt side by side with the testing burner used from 1866 to the present time (when the 16-candle standard obtained) it gave less light by two candles with the same rate of consumption of gas. Mr. Humpidge has also further shown that a more recently invented burner gives with the same gas, and at the same rate of consumption, a light again two candles in excess of that yielded by the testing burner at present in use. It is therefore obvious that any legislation requiring gas of higher quality will be nugatory unless either the testing burner be specified, and a copy of it deposited in the Weights and Measures Department of the Board of Trade, or the illuminating power be determined by chemical analysis instead of photometric measurement.

I have continued to analyse a report upon the numerous samples of water sent here from the Local Government Board. The analysis of the different waters supplied to London from the rivers Thames and Lea, and from deep wells in the chalk, have also been continued monthly. They demonstrate the great superiority of the deep well water for dietetic purposes.

My researches on the organic compounds of boron have been continued, and I have also made a series of experiments on the suspension of disease germs in the gases of sewers. These experiments show that so long as sewage is, by flushing or otherwise, discharged from the outfall in a fresh condition, there is little or no risk of the propagation

of epidemic disease through the medium of sewer gas; but if the foul liquid be retained in the sewers until putrefaction sets in, the suspension of zymotic germs in the air spaces of the sewers is almost certain to occur, and then the escape of such gases into dwelling houses becomes exceedingly dangerous. The results of both these investigations have been communicated to and published by the Royal Society.

The usual courses of lectures on mineral and organic chemistry, which I delivered in the chemical theatre (viz.—40 lectures on mineral and 30 on organic chemistry) during the year 1876, were listened to by an attentive and industrious class of students. The number of entries to the courses, and the regularity of attendance are attested by the official lists which are in the possession of the registrar.

At the annual examinations held in June 56 students presented themselves. Of these, 19 passed in the 1st class, 18 in the 2nd, and 17 in the 3rd, whilst two failed. The examinations include both theoretical and practical chemistry, and for a pass, even in the 3rd class, the candidate must obtain at least one-half of the total number of marks.

In addition to the academical course of morning lectures delivered in this theatre, I have also given an evening course of six lectures on "The Chemistry of Coal" to a crowded and very attentive audience of working men in the theatre of this department.

I have continued to conduct, for the Science and Art Department, the May examinations in organic and inorganic chemistry, and the examination in chemistry of the students of the Royal College of Science, Dublin, and of the Inland Revenue Laboratory, Somerset House.

The superintendence of so numerous a class of laboratory students from 10 a.m. to 5 p.m. daily, requires much tact, skill and endurance. I am aided in this work by no less than seven private assistants to whom my best thanks are due for the efficient help which they have afforded me throughout the year.

Mr. W. Valentin has exercised a general supervision over the analytical laboratories; Mr. Purdie and Mr. Evershed have given special instruction in mineral and water analysis respectively; M. A. J. Greenaway, and Mr. H. Chapman Jones have taught in the beginners' laboratory; Mr. J. H. Starling has prepared the reagents and distributed the chemicals in the store room, whilst Mr. J. M. Cameron has afforded me valuable aid in the research laboratory.

The direction of these laboratories entails a correspondence which is continually increasing, as the number of chemists trained here and afterwards distributed throughout the country and the colonies augments from year to year. To such dimensions had the work thus thrown upon me grown, that I found it necessary in October last, to avail myself of the assistance of a secretary possessing the necessary acquaintance with chemical science. I have appointed to this office Mr. H. S. Billing, who had been a student and assistant in these laboratories for several years, and had therefore acquired the scientific knowledge without which a secretary would be of but little service to me. By this appointment I have regained a considerable amount of the time which I had been previously compelled to take from my professorial duties.

The experimental illustrations for the courses of lectures have been well prepared by Mr. G. S. Newth who holds the office of lecture assistant from the Lords of the Committee of Council on Education.

I remain, Sir,

Your obedient Servant,

E. FRANKLAND.

The Secretary,
Science and Art Department.

Appendix G.

APPENDIX G.

REPORT BY PROF. ARCHER.

REPORT of the DIRECTOR of the EDINBURGH MUSEUM of SCIENCE and ART for 1876.

Museum of Science and Art,
Edinburgh, February, 1877.

SIR,

I HAVE the pleasure of informing you that during the past year the progress of the Museum has gone on unchecked, except so far as the attendance of the public is concerned; that, however, has decreased from causes quite apart from anything connected with our work. The great depression in trade which has affected the attendance at similar institutions in this part of the kingdom is no doubt largely the cause. There has been an increase on the annual average of the previous five years, showing, I think, that the local interest in the Museum is undiminished. The following table will show the exact numbers of visitors:—

Attendance.

Month.	Free.		Pay Days.	Total.	Amount of Admission Fees.		
	Days.	Evenings.			£	s.	d.
January - -	29,681	21,598	745	52,024	18	12	6
February - -	8,546	13,294	590	22,430	14	15	0
March - - -	10,997	14,892	657	26,546	16	8	6
April - - -	8,461	14,410	1,286	24,157	32	3	0
May - - -	9,063	7,103	1,769	17,935	44	4	6
June - - -	12,922	6,623	3,192	22,737	79	16	0
July - - -	24,253	10,359	3,157	37,769	78	18	6
August - - -	19,635	10,504	3,699	33,838	92	9	6
September - -	12,255	18,020	1,815	32,090	45	7	6
October - -	10,265	16,517	960	27,742	24	0	0
November - -	9,842	14,859	723	25,424	18	1	6
December - -	10,954	16,700	310	27,964	7	15	0
Total - -	166,874	164,879	18,903	350,656	472	11	6

Average annual attendance for last five years - 358,972.

Average daily attendance in 1876 - - { pay days 128·6. free days 2,035·3.

Absence of Director at Philadelphia.

During somewhat more than half of the year I was absent at the Centennial Exhibition in Philadelphia, to which I was, as you are aware, appointed by the Lord President one of the Executive British Commissioners. My duties were undertaken, and efficiently performed during my absence by Mr. Galletly, Assistant Director, and I had every reason to be satisfied on my return with the steady progress made in the routine work of the Museum. My absence was not unprofitable to the collections, for my position in America brought me into contact with most of the distinguished men working in the public institutions and museums, and thus gave me the opportunity of opening up relations with them which are already producing valuable results. Many objects of great interest have been presented by them to this Museum, which are already beginning to arrive.

Appendix G.

REPORT BY PROF. ARCHER.

A much larger increase in the number of specimens shown to the public could be made from our stores were our votes sufficiently large to enable us to obtain more case accommodation than we are enabled to do, but each year adds considerably to the extent, and as great care is taken to have the work thoroughly done, it may be considered permanent, and will rarely require any further expenditure of time or money.

Library.

It was hoped that ere this the library, which is now of considerable extent, could be made available to the public, but the stoppage of the new buildings has prevented this. This is the more to be regretted because H.M. Patent Commissioners have brought up the part of our library containing their publications to the most perfect condition, so that in fact were the room intended for it built the people of Scotland would have the same facilities as those of London for the consultation of the Specifications and other publications in that department, and there is unquestionably a growing want for such accommodation.

During the past year we have prepared from duplicate specimens illustrating industrial processes small series for loan to local institutions, one of which was lent to the Thurso Exhibition.

Catalogues.

The work of re-arranging in the new buildings has rendered it undesirable to publish full catalogues until it is nearer completion. We have, however, had a useful penny guide book, of which 784 copies have been sold. Since my return I have edited a new edition of the Mineral Catalogue, which is now in the press, and will be ready for issue in a week or two.

The report of the Keeper of the Natural History Collections is annexed, and will I trust be found satisfactory in all its details, each section of the department under him having been kept up as far as possible, and the whole collection greatly increased in interest and importance.

At the commencement of 1876 the strength of our small staff was much diminished by the resignation of our senior Assistant Keeper, Mr. James Paton, who left us to take the Curatorship of the Glasgow Industrial Museum. The staff is still below its normal strength, but I am greatly indebted to the other officers, who one and all have done their best to prevent this loss from being injurious, by the falling back of necessary work.

The following is a statement of the routine work performed by the officers of the Industrial Art Department during the past year:—

Specimens registered	1,008
Do. labelled	4,205
Ordinary labels written	2,176
Do. do. printed	1,893
Do. do. drafted for printing	1,893
Labels, hand printed	41
Inventory lists prepared	38
Catalogue lists prepared	26
Specimens prepared	310

Donations.

LIST OF DONATIONS to the EDINBURGH MUSEUM of SCIENCE and ART from 1st January to 31st December 1876.

Models of 2 screw propellers.
Model of a donkey engine.
Presented by Mr. D. Macgill, 9, Carmichael Street, Govan.
Model of a pipe moulding machine.
Presented by Messrs. D. Y. Stewart & Co., Glasgow.

Appendix G.

REPORT BY PROF. ARCHER.

Model of a cliff ruin (ancient cliff dwelling), on the Rio Mangos, Colorado.
Model of a cave ruin (ancient cave dwelling), on the Rio de Chelly, Arizona Territory.
Presented by the United States Government Survey, through Professor F. V. Haydon, Washington.

The action movement in separate parts of one note of a cottage piano.
Presented by Mr. James Porter, 27, Morrison Street, Edinburgh.

3 radiometers.
Presented by Mr. W. Crookes, F.R.S., London.

6 Yale locks of different kinds.
Presented by the Yale Lock M.F.G. Co., Stamford, Conn. U.S.

5 specimens showing the effects of dynamite as an explosive on iron objects and also the mode of using it.
Presented by the British Dynamite Co., Stevenston, Ayrshire.

Perthite, an aventurine felspar, Burgess, Canada.
Presented by Dr. James Wilson, late of Perth, Canada.

Railway wheel tire of crucible steel crushed into the form of the figure 8 without fracture.

Piece of armour plate 22 inches thick with a polished face.
Presented by the manufacturers, Messrs. Cammel and Co., Sheffield, through Mr. George Wilson, Managing Director.

Small specimens of crystallised native gold, Vörös-Patak, Transylvania.
Presented by Mr. D. Egger, Vienna.

2 specimens of ruin or landscape marble.

Model of a Chinese junk in carved ivory.
Presented by Mrs. Ross, Rockville, Edinburgh.

38 specimens of tested malleable iron and steel, 3 sections of gun-coil iron, 3 sections of gun barrels showing rifling, 6 copper alloys, and 1 specimen of slag wool.
Presented by Mr. Wm. Page, Newcastle-on-Tyne.

Group of crystals of red prussiate of potash (potassic ferricyanide); 3 groups of yellow prussiate of potash (potassic ferrocyanide), 4 specimens of alum and alum shale.
Presented by the Hurlet and Campsie Alum Co., Glasgow.

Pair of apothecary's jars, enamelled earthenware; Spanish (Talavera) 1520–56.

Section of a trunk of an elder tree, *Sambucus nigra*, grown on the Ochill Hills, 1,000 feet over sea level.
Presented by Sir Robert Christison, Bart., Edinburgh.

13 specimens illustrating the manufacture of Scotch bonnets.
Presented by Mr. J. Allan Dow, The Albion, Edinburgh.

Table napkin of linen damask, richly figured, Scotch, woven in 1822.
Presented by Lady Jane Dundas, Charlotte Square, Edinburgh.

Pair of Shetland mits, knitted with an ornamental pattern from very fine wool.
Presented by Mrs. John Thomson, Balta Sound, Unst, through Mrs. Edmonston, Unst.

Bleached damask table napkin of New Zealand flax, showing the progress made in bleaching the substance.
Presented by Mr. N. T. Lockhart, Edinburgh.

9 specimens of Japanese manufactures, and 11 specimens of Japanese woods.
Presented by Mr. Thos. Wallace, Office of Northern Lights, Edinburgh.

12 specimens of Indian teas.
Presented by Dr. F. Douglas, Edinburgh.

59 specimens of wines of various countries for food collection.
Presented by Messrs. Innes & Grieve, Edinburgh.

Specimens added by purchase to the Industrial Section of the Edinburgh Museum of Science and Art, from the 1st January to the 31st December 1876.

Metal Work including Arms and Armour.

	£	s.	d.
Ranseur, English, 15 cent., and an engraved halberd of 16th cent.	5	0	0
4 halberds; two engraved, the others with pierced ornament. 16th and 17th cent.	11	13	0
Partizan	1	7	0
Glaive, engraved with crest, &c. German	7	0	0
Steel battle-axe and mace	6	10	0
Cross-bow or prodd. 16th cent.	3	2	0
Pistol and stiletto combined; stock inlaid with ivory. German. 17th cent.	5	0	0
Revolver snaphaunce gun with 8 chambers	5	0	0
Steel shield with engraved figures. Italian	7	10	0
Steel flail, iron manacle and screw, &c.	3	10	0
2 pairs of engraved steel gauntlets. Italian	12	10	0
Steel morion and helmet with engraved figures	14	0	0
Demi-suit of steel armour consisting of morion, breastplate, backplate, and pair of pauldrons. Elizabethan	24	3	0
5 pairs of spurs. English, 17th cent.	5	10	0
17 stirrups, chiefly English. 16th and 17th cent.	6	0	0
2 cuirassier's swords	0	18	0
"Brown Bess" musket	0	18	0
Blunderbus with flint lock and brass barrel	1	2	0
Wrought-iron lock with perforated scroll ornament. German, 18th cent.	1	0	0
Oval brass dish; repoussé classic scenes. Old Dutch	2	15	0
Oval brass dish; repoussé decoration; royal progress of Clovis. Old Dutch	3	5	0
Pair of brass ewers; richly ornamented with figures, &c. Modern French	26	5	0
Silver tankard with cover, parcel gilt; figures in medallions. German, 16th cent.	52	10	0
5 allegorical figures in silver. German, 16th cent.	7	10	0
Pair of candlesticks, pen tray, and pair of earrings of steel inlaid with gold (Koftgari work). Indian	8	3	0
Oblong silver casket with strapwork in relief	3	18	0
Verge watch; back of case with painted flowers	0	15	0
Pair of Japanese bronze bowls	2	0	0
3 samples of native gold from Scotch localities	4	0	0
Native gold in crystals traversing a rocky matrix, Transylvania	5	0	0

Reproductions in Metal.

Vase and cover with panels of scriptural subjects in low relief; the original, Augsburg work. 16th cent.	70	0	0
Vase or cup with subjects in relief emblematic of gold and silver ages; original designed by Flaxman	12	0	0
Ewer; antique classical design; original, English work, date 1782	45	0	0
"Outram Shield;" subject, the voluntary cession by Sir J. Outram to General Havelock of the troops destined to relieve Lucknow. Modern English	55	0	0
Statue of the Venus de Medicis in bronzed zinc	15	0	0
Statue of Diana de Gabies in bronzed zinc	25	0	0
Statuette, in bronze, of Silenus carrying Bacchus; from an ancient Roman original	10	0	0

Appendix G. — Report by Prof. Archer.

	£	s.	d.
Statuette, in bronze, of Hercules holding an apple, from an ancient Roman original	10	0	0
Statue of Cupid and Lyre, in bronzed zinc; from the original by Thorwaldsen	10	0	0
Statuette, in bronze, of Jason; after Thorwaldsen	10	0	0
2 statues in bronze; the Borghese children; from ancient Roman originals	25	0	0
Figure of a gazelle, in bronze; from an ancient Roman original	20	0	0
Warwick vase, in bronze, from the ancient Roman original	50	0	0

Pottery and Porcelain.

	£	s.	d.
2 statuettes, clergyman and nun; Bow porcelain	10	0	0
Octagonal plate; early Worcester porcelain	1	0	0
Plate; Worcester ("Flight, Barr & Barr") porcelain	1	0	0
Oblong dish; Swansea porcelain, painted flowers	5	0	0
Globular bowl or vase with cover; flowers in relief and painted; Old Dresden porcelain	18	18	0
2 vases, with scroll ornament on celadon and grey ground; Chinese porcelain	2	15	0
4 old Dutch tiles	1	0	0
7 pieces of old English pottery and porcelain,	2	19	0
Majolica plate; centre with coat of arms and border with arabasques, circa 1550	15	0	0
Majolica plate, with portrait; circa 1520	12	1	6
Majolica dish (wanting border); view of Tartarus; dated 1547	21	0	0
Statuette in terra-cotta, "Girl with Butterfly," by W. G. Stevenson, sculptor, Edinburgh	20	0	0
3 oblong panels in terra-cottta, designed for reredos; figures in relief representing the "Betrayal," "Descent from the Cross," and "Scenes at the foot of the Cross"; Doulton & Co.	200	0	0
Fragments of Roman pottery from Water-Newton near Wansford	1	10	0
Earthenware sepulchral urn; ancient Peruvian	5	0	0
12 pieces of Peruvian pottery	8	0	0

Enamels.

	£	s.	d.
Limoges enamel triptych; subject, Events in the Life of John the Baptist	14	3	6
Chinese painted tea kettle and stand	4	0	0
7 stages of manufacture of a Cloisonné enamel tray; Elkington & Co.	17	10	0

Ornamental Stonework.

	£	s.	d.
Stand formed of a polished slab of variolite mounted in ormolu	8	0	0
2 oval agate bowls	3	5	0
2 large sheets of mica	0	7	0

Miscellaneous.

	£	s.	d.
1640 casts of engraved gems in the Tassie collection, National Gallery, Edinburgh	41	0	0
Model of a cocoa plantation, Surinam	5	0	0
24 pieces of old lace	26	0	0
Carved powder horn and pair of tortoiseshell spill boxes	1	15	0
Clock and bracket in Boule work. French, 18th cent.	42	0	0
Carved oak chair. Old Flemish	1	2	0
Oblong inkstand in Boule work	22	1	0
Model of a Venetian galley	1	10	0
Needle case, Vernis Martin work	0	10	0

	£	s.	d.
Water hammer	0	2	6
Octant for measuring angular distances of objects by reflection	1	1	0
2 circular breast ornaments. Admiralty Islands	0	5	0
52 photographs, chiefly of savage tribes	2	13	4

Appendix G. — Report by Prof. Archer.

Models made in Museum Workshop during the year 1876.

Model of blowing engines at the Wigan Coal and Iron Company's Work, Kirkless Hall. Scale 1 in. = 1 foot.

Model of patent Corliss engine, horizontal and non-condensing. Scale 2 in. = 1 foot.

Loans received by the Edinburgh Museum of Science and Art during 1876. Loans.

From the Science and Art Department:
87 electrotypes, armour, &c.
From Mrs. Summers, Leith:
Model of a ship.
From J. Wilkins, Esq., Helensburgh:
Piece of Roman tesselated pavement.
From J. Hay Anderson, Esq.:
Japanese porcelain vase.

Thomas C. Archer,
Director.

Report of the Keeper of the Natural History Collections for the year 1876.

During the past year steady progress has been made in the work of re-arranging and adding to the collections embraced in the Natural History Department of the Museum. Natural History collection.

The general collections of insects, crustacea, and echinodermata previously exhibited in the desk cases of the upper gallery of Hall No. 1, have been removed to those of the gallery below, and the space thus gained upstairs has been employed for the extension of the collections of corals and sponges. The re-arrangement of the mammalia in the ground floor of the same hall has been completed for the present, its future extension into the adjoining hall No. 2, awaiting the erection of suitable cases. But the most important work now in progress is the arrangement of the collections illustrative of British zoology in the ground floor of Hall No. 3, which will be specially devoted to that purpose. Along the north side of this hall the valuable collection of fossil footprints, &c., from the Permian sandstones of Dumfriesshire collected by the late Sir William Jardine, has been set up; though palæontological in their nature the great size and weight of these specimens has rendered their location in this part of the building necessary. Of the remaining three sides of this hall which have been fitted with commodious wall cases, the east and south are now occupied with the collection of British birds, more than doubled during the past nge- and with the reptiles and amphibia, while on the west side the arra ment of the fishes is now in progress. Ten table cases have been placed on the floor, in two of which the collection of British birds eggs has been arranged, the others being devoted to the dried invertebrata, now also in process of revision and re-arrangement. The remaining space afforded by this floor will be occupied by the British mammalia, and by invertebrata in spirit, as soon as suitable cases are procured.

The additions made to the Natural History collections by purchase have been of great importance. The collection of British birds made by the late Sir William Jardine, numbering 432 specimens has been acquired, and other important additions to this special department have been made by the purchase of a number of bird skins selected from the collection of the late Dr. Saxby, as well as of other stuffed specimens from a local dealer. The skeleton of a large grampus (*Orca gladiator*) caught last spring in the Firth of Forth has been secured for the Museum, and is now in process of preparation. Other purchases of importance are, a complete skeleton of the Manatee, a pair of Rocky Mountain Sheep, a skeleton of the Wart Hog from South Africa, the stuffed skin and skeleton of a Capybara of great size, and a set of British Fallow Deer (male, female, and young). The palæontological department has been enriched by the purchase of a large collection of fossils, chiefly from the Oolitic strata of the west of England, which belonged to the late Sir William Jardine, and of a very select series of Upper Silurian fossils from the Pentland Hills, which contains several type specimens of considerable importance.

Among the donations, the most important is that of a set of the duplicates of the specimens of Natural History recently brought to this country by the officers in charge of the Transit of Venus Expedition, and for which the Museum is indebted to the Royal Society of London. This collection comprises 397 specimens chiefly invertebrata, but also includes a very fine set of the bones of the solitaire or extinct bird of the island of Rodriguez. The others with the names of their respective donors will be found in the appended list of additions to the Museum, and which is followed by a summary of the routine work done during the year in the department of Natural History, as extracted from the monthly progress reports.

RAMSAY H. TRAQUAIR,
Keeper.

NATURAL HISTORY DEPARTMENT.

DONATIONS during the year 1876.

6 Snakes and a Toad, preserved in spirits.
Presented by Dr. James Dunsmure, Edinburgh.
Stuffed specimens of Water Hen and Lapwing.
Presented by Mr. Wm. Patterson, Edinburgh.
7 Fossil Fishes, &c., from Wardie Shales.
Presented by Mr. James Gaul, Edinburgh.
Collection of Birds' Eggs and Nests from Barra (74 specimens).
Presented by Messrs. W. & M. McGillivray, Barra.
An Impeyan Pheasant (*Lophophorus Impeyanus*).
Presented by Mr. A. Gibson, Edinburgh.
397 Specimens chiefly of Invertebrata collected by the "Transit of Venus" Expedition during 1874.
Presented by the Royal Society of London.
44 specimens of Corals, Fossil Fishes, &c.
Presented by Mrs. D. Ross, Rockville, Edinburgh.
Cast of *Helodus* from a specimen in the Bristol Museum.
Presented by the Earl of Enniskillen.
Pecten from the Lias of Yorkshire.
Presented by Mr. Wm. Charleton, Cleveland.
A Cuttlefish pen, and *Eurynotus* from Loanhead.
Presented by Mr. D. Knight, Edinburgh.
Fossil vertebra of Mammal from the Lowestoft coast.
Presented by Rev. Francis Duke, Leith.

2 Finches (in flesh).
Presented by Mrs. A. Fraser, Edinburgh.
4 specimens of the Lancelet (*Amphioxus lanceolatus*).
Presented by Dr. McIntosh, Murthly.
6 Fossils from the neighbourhood of Edinburgh.
Presented by Mr. J. Henderson, Edinburgh.
7 specimens of Annelids, &c.
Presented by Professor Grube, Breslau.
A Greenland Bull head (*Cottus grænlandicus*) caught at Leven.
Presented by Dr. J. Balfour, Leven.
A Slowworm, *Anguis* sp.
Presented by Mr. James Bonar, Edinburgh.
2 Fossil Fishes from the bituminous shale, New Brunswick.
Presented by Dr. Honeyman.
A specimen of Coorongite from Coorong, South Australia.
Presented by Samuel Davenport, Esq., S. Australia.
5 minerals from California.
Presented by the Hon. Thomas Donaldson, Idatio.
A specimen of Millerite.
Presented by Joseph Wharton, Esq., Philadelphia.
A specimen of Maldonite from Victoria.
Presented by Sir Redmond Barry, Victoria.
3 Fossil shells.
Presented by Mr. G. Wild, Bardsley Colliery near Oldham.
A Fossil Fish from Wardie.
Presented by Mr. D. Grieve, Eskbank.
Skull of African Elephant (*Elephas Africanus*).
Presented by Captain D. Monro, Liverpool.
An *Actinoceras* from Ayrshire.
Presented by Mr. J. Neilson, junr., Glasgow.

SPECIMENS obtained by exchange during 1876.

14 specimens of Fossil Fishes from the Trias, &c., of Germany.
Obtained in exchange from Prof. von Seebach, Göttingen.

PURCHASES during the year 1876.

	£	s.	d.
100 British Birds (stuffed)	32	13	0
57 Skins of British Birds collected by the late Dr. Saxby chiefly in Shetland	4	2	6
40 Skins of Foreign Birds, chiefly South American	17	19	0
77 British Birds' Eggs	8	0	10
11 Sternums of British Birds	0	5	6
Collection of British Birds (stuffed) formed by the late Sir Wm. Jardine, Bart. (432 specimens)	200	0	0
21 British and Foreign Mammals	17	0	6
The Capybara, *Hydrochærus capybara*, stuffed and skeleton	17	0	0
The Spotted Hyæna, *Hyæna maculata*, stuffed	9	0	0
The Grampas, *Orca Gladiator*, caught in the Firth of Forth near Granton	9	0	0
2 Skins of the Rocky Mountain Sheep, *Ovis montana*	12	0	0
Skeleton of the Manatee, *Manatus Australis*	22	0	0
Skeleton of the River Hog, *Potamochærus Africanus*	12	0	0
2 Saiga Antelopes, *Saiga Tartarica* (winter fur)	14	0	0
The Fallow Deer, *Cervus dama* (male, female, and young)	9	0	0
Stuffed specimen of *Antilope bezoarctica*	8	0	0
22 Recent Shells from the Indian Ocean, &c.	7	16	0
Collection of Corals, Echinoderms and Sponges (35 specimens)	8	1	6

Appendix G.

REPORT BY PROF. ARCHER.

	£	s.	d.
Several Bones of Great Auk, *Alca impennis* - - -	1	5	0
6 Fossils from Lyme Regis - - - - -	19	0	6
66 Fossil Shells, &c., chiefly from the Wenlock Limestone, Dudley	6	1	9
76 Fossils (Fish Remains) from Gilmerton, Loanhead and Burdiehouse - - - - - - - - -	9	2	6
British Fossils collected by the late Sir William Jardine, numbering over 1,000 specimens - - - - - - -	12	19	0
Collection of Silurian fossils from the Pentland Hills (536 specimens) - - - - - - - - -	5	0	0
21 Fossil Fishes from the Permian of Durham - - -	9	18	0

Specimens registered - - - -	1,567
Do. labelled - - - -	2,654

Specimens remounted and arranged - -	766
Do. arranged - - - -	430

THOS. C. ARCHER,
Director.

To the Secretary of the
Science and Art Department.

APPENDIX H.

Appendix H.

REPORT BY PROF. J. P. O'REILLY.

1. REPORT of the COUNCIL of the ROYAL COLLEGE OF SCIENCE FOR IRELAND for the year 1876.

SIR,

I HAVE the honour to submit to my Lords the following report of the Council of this College relative to the educational work of the past session, 1875–76.

The programme of studies as fixed by the Council for the session was fully carried out, and the usual examinations were held at the close of the session in the several subjects of instruction. The prizes, as well as the diplomas and certificates accorded in consequence, will be found fully detailed in the statistical portion of the Secretary's report.

I have the honour to submit copies of the examination papers for the session closed, as also the programme of the educational arrangements for the current session.

The new edition of the library catalogue, rendered necessary by the continuous and important additions made to our works of reference, has been completed, and will shortly be printed and available for reference. The classified catalogue corresponding to this new edition has been commenced, and will in all probability be finished and printed in the course of the present session. Catalogues.

In the physical laboratory the class attendances and the educational results of the session have very satisfactorily proved that the scientific and practical advantages which this course affords are fully recognised, and largely taken advantage of. Laboratories.

The chemical laboratory of the College continues to maintain its acquired reputation for efficiency and completeness, as manifested by the attendances and by the honourable and lucrative positions which have been attained by its students.

The Council feel gratified in stating that the engineering and drawing classes of the College are yearly becoming more markedly appreciated by students, and they have much pleasure in submitting, as a very distinct proof of the thorough nature of the teaching therein, the marked success of Mr. Joyce (who took his diploma of engineer in the session 1874–75) at the competitive examination lately held in Dublin for four vacant posts of county surveyors in Ireland. Mr. Joyce secured the second post, the number of competitors having been large, and their qualifications high.

A certain number of our associate students have, during the past year, competed for and obtained honours at the London University examinations.

These distinctions, as well as the professional positions which the greater number of the associates of the College have acquired, furnish the most direct and the most practical testimony to the efficiency of the teaching in the College; the position of which, the Council deem themselves fully justified in considering as satisfactory, particularly when account is taken of the many adverse circumstances of the present period.

Signed on behalf of the Council,

J. P. O'REILLY,

17th January 1877. Dean of Faculty.

Appendix H. — REPORT OF ROYAL COLLEGE OF SCIENCE FOR IRELAND.

2. REPORT of the SECRETARY of the ROYAL COLLEGE of SCIENCE, STEPHEN'S GREEN, Dublin, for the year 1876.

SESSION 1875–76.

Courses of Lectures.

During the session ending in June 1876, the following courses of lectures were given:—

					Students.
55	Lectures in	Pure Mathematics, by Prof. Hennessy, attended by (1st year's class.)			14
68	„	Do. (2nd year's class)	„	„	6
64	„	Applied Mathematics (1st year's class.)	„	„	13
77	„	Do. (2nd year's class)	„	„	6
65	„	Mechanism and Heat (3rd year.)	„	„	6
65	„	Do. Applied Mechanics and Hydrodynamics -	„	„	4
164	„	Descriptive Geometry and Drawing (1st year)	Prof. Pigot	„	13
84	„	Mechanical Drawing (2nd year.)	„	„	8
132	„	Building Construction and Engineering (3rd year).	„	„	5
37	„	Surveying (3rd year)	„	„	6
85	„	Experimental Physics,	Prof. Barrett	„	25
55	„	Botany - -	„ McNab	„	12
55	„	Zoology - -	„ Leith Adams	„	5
79	„	Chemistry (theoretical)	„ Galloway	„	9
150	„	Chemistry (practical), by Prof. Galloway, (2nd year.)		„	13
41	„	Practical Physics	„ Barrett	„	16
27	„	Applied Chemistry	„ Galloway	„	4
24	„	Metallurgy -	„ „	„	3
160	„	Practical Chemistry. Faculty of Manufactures.	„ „	„	7
150	„	Do. Faculty of Mining	„ „	„	1
50	„	Geology - -	„ Hull	„	7
16	„	Demonstrations in Palæontology.	Mr. Baily	„	7
47	„	Mineralogy -	Prof. O'Reilly	„	6
37	„	Mining -	„ „	„	6
43	„	Agriculture -	„ Davy	„	1

The total number of individuals who attended these lectures was 58, of whom 22 were Associate students, prosecuting the full three years' course, with a view of obtaining the diploma of Associate; the corresponding numbers last year were 61 and 26 respectively.

The number of candidates attending the Sessional Examinations in June 1876, was as follows:—

	Number Attending.		
Pure Mathematics (1st year) -	1		
Ditto (2nd year) - - -	5	1st Prize	McAlpine, A.
Applied Mathematics (1st year) -	9	1st „	Hatfield, Henry.
Ditto (2nd year) - - -	5	2nd „	Claridge, George.
Ditto (3rd year) - - Mechanism and Heat -	6	2nd „	Arnall, Thomas.

	Number Attending.		
Applied Mathematics (3rd year) Applied Mechanics and Hydrodynamics -	4	1st Prize	Arnall, Thomas.
Descriptive Geometry and Drawing (1st year)	8	1st ,,	Hatfield, Henry.
Ditto (2nd year) - - -	5	1st ,,	Claridge, George.
Ditto (3rd year) - - Building Construction and Engineering.	4	1st ,,	Arnall, Thomas.
Ditto (3rd year) - - Surveying - - -	5	1st ,,	Arnall, Thomas.
Electricity and Magnetism - -	14	1st ,,	Whittaker, Thomas.
		2nd ,,	Hatfield, Henry.
Heat, Light, and Sound - -	14	1st ,,	Hatfield, Henry.
		2nd ,,	Stewart, J. H.
Chemistry (theoretical) - -	5	1st ,,	Bayley, Thomas.
Chemistry (practical) - - -	5	1st ,,	McAlpine, A.
Physics (practical) - - -	6	1st ,,	Hull, E. G.
Botany - - - - -	10	1st ,,	Whittaker, Thomas.
Geology and Palæontology - -	6	1st ,,	Arnall, Thomas.
Zoology - - - -	5	1st ,,	McAlpine, A.
Mineralogy - - - -	1		
Mining - - - - -	2	2nd ,,	Daltry, Thomas L.
Applied Chemistry - - -	1		
Metallurgy - - - -	1	1st ,,	Daltry, Thomas L.
Practical Chemistry:			
Faculty of Manufactures - -	2	1st ,,	Ferguson, H. L.
Faculty of Mining - - -	1	1st ,,	Daltry, Thomas L.
Drawings executed during Session (1st year) - -	8	ex æquo	Hatfield, Henry. Starkey, Frank.
Do. (3rd year) - - - -	4		Arnall, Thomas.

The Royal scholarships were awarded to G. W. Slatter and Frank Starkey.

The silver medal for best answering on the whole of the first two years' course was awarded to Thomas Bayley.

The diploma of Associate was awarded to,—

Daltry, Thomas L., in the Faculty of Mining.

Arnall, Thomas	,,	Engineering.
Montfort, Richard		
Cooper, Charles H.		
Rankin, Edward		
Ferguson, H. L.	,,	Manufactures.

In the month of May the Annual Science examinations of the Department were held in the College. There were 370 entries (last year 228) in 22 subjects, the number of individuals being 113 (last year 69).

Short courses of afternoon lectures, at a small admission fee, were voluntarily given by some of the Professors, viz.,

1. Professor Barrett, 6 lectures on Sound, attended by an average of 171 persons.
2. Professor Davy, 6 lectures on Food, attended by an average of 90 persons.
3. Professor Hull, 4 lectures on the Physical Geography of the Sea, attended by an average of 117 persons.
4. Professor Adams, 4 lectures on Types of the Lower Animals, attended by an average of 39 persons.

Appendix H.

REPORT OF ROYAL COLLEGE OF SCIENCE FOR IRELAND.

5. Professor McNab, 4 lectures on Elementary Botany, attended by an average of 93 persons.

SESSION 1876–77.

The number of students registered up to 31st December 1876 for the present session, is as follows:—

FIRST YEAR'S CLASSES.

Pure Mathematics	9
Applied ditto	9
Descriptive Geometry and Drawing	10
Experimental Physics	20
Botany	9

SECOND YEAR'S CLASSES.

Pure Mathematics	7
Applied ditto	7
Mechanical Drawing	8
Chemistry (theoretical)	9
Chemistry (practical)	12
Physics (practical)	14
Zoology	7

THIRD YEAR'S CLASSES.

Applied Mathematics	7
Engineering and Drawing	8
Surveying	5
Chemistry (practical)	5
Chemistry (applied)	3
Agriculture	1
Geology	7
Mineralogy	5
Mining	2
Metallurgy	3

The total number of individuals is 48, of whom 21 are associate students. At the corresponding period last year, the total number of registered students was 50, of whom 22 were associate students.

The opening meeting of the Civil Service Literary Society for the present session was held in the theatre under the presidency of the Chief Secretary for Ireland, and was attended by about 700 persons.

The number of visitors to the Museum was 3,513.

The number of volumes added to the library was 352, besides periodicals.

The following donations were made to the library of the College during the year:—

Series of maps and sections of the Geological Survey of Ireland. Presented by order of the Treasury.

Records of the Geological Survey of India. Vol. viii., Part 1, 4. Vol. ix., Part 1.

Memoirs of the Geological Survey of India. Vol. x., Part 2. Vol. xi., Part 1, 2.

Palæontologia Indica, continuation of the series, viii.–x.
Presented by the Director-General of the Geological Survey of India.

Report of the Secretary of War of the United States of America, and documents communicated to Houses of Congress. 2 Vols., 1875.
Presented by Professor O'Reilly.

Catalogue of the Special Loan Collection of Scientific Apparatus.
Presented by the Science and Art Department.

Transactions of the Royal Irish Academy. Vols. 23, 24, 25.

Proceedings of the Royal Irish Academy. Vols. iv.–x. 2nd Series, Vols. i., ii.
Presented by the Academy.

Proceedings of the Institution of Civil Engineers, Great George Street, Westminster. Vols. 43 to 46.
Presented by the Institution.

Daily Weather Charts for the year.
Presented by R. H. Scott.

Mines and Mineral Statistics of New South Wales.
Presented by the Hon. John Lucas, M.P., Minister for Mines.

Science made easy, by Thomas Twining.
Presented by the author.

Pamphlets presented by the authors, viz. :—
On preventing Scurvy, by Prof. Galloway.
On the Analysis of Milk, by Ernest H. Cook.
On the Vinegar met with in Dublin, by H. L. Ferguson.

FREDK. J. SIDNEY, LL.D.,
Secretary.

15th January 1876.

Appendix I.

REPORT OF ROYAL DUBLIN SOCIETY.

APPENDIX I.

REPORT of the ROYAL DUBLIN SOCIETY for the Year 1876.

Constitution of Society.

DURING the year 1876, 52 members were admitted into the Society, which on the 31st December was thus constituted:—

Corporate Members, Life - - -	785
" " Annual - -	443
	1,228
Honorary Members - -	50
Corresponding Members - -	22
Agricultural Associates - - -	15

The Council believe that the decrease in the number of gentlemen seeking admission into the Society, and the unusually large number of resignations, are to be attributed to the uncertainty which prevails regarding the position which the Society will occupy in the future, should the views of the Government, as embodied in Lord Sandon's letter of the 9th February 1876 be carried into effect. The consequent diminution in the Society's private funds (which amounted in the year to upwards of 169*l.*) all expended upon objects of public utility, such as the encouragement of agriculture, the support of the scientific work of the Society, the partial support of the School of Art and others, is therefore very serions, as the Society will be compelled, though with great reluctance, to lessen the amounts heretofore expended on those objects.

EXAMINATION FOR CERTIFICATES OF MERIT.

Examinations.

The twentieth annual examination for certificates of merit was held on the evenings of the week commencing Monday, June 5th, 1876.

Eighty-seven persons applied to be examined, of whom 57 presented themselves for examination; 31 obtained general certificates, and two commercial certificates. Prizes were also awarded to the most distinguished answerers.

It is to be here observed that these examinations are conducted by a board of examiners, acting gratuitously, appointed by the Council, and the expense is defrayed out of the private income of the Society.

EVENING MEETINGS AND DISCUSSIONS.

Meetings.

Seven meetings for the reading and discussion of papers on subjects connected with Science and Art, and for the delivery of discourses on Scientific Subjects, were held during the year, at which the expenses incurred in conducting the meetings were defrayed out of the Society's private income.

The attendance on these occasions amounted to 811, averaging 116 at each meeting.

NATURAL HISTORY MUSEUM.

Natural History Museum.

During the past year the usual progress has been made in arranging and naming the specimens, and in putting in their proper places those

newly acquired. The more remarkable additions will be found under the respective classes as follows :—

Mammals.—A perfect skeleton and skin of the herbiverous cetacean, the manatee, *Manatus Americanus;* the proboscis monkey of Borneo, *Semnopithecus nasicus.*

Birds.—Chrysolophus Amherstiæ; Phasianus Reevesii; Paradisea Atra; P. Wilsoni; Sericulus aureus; Didunculus strigirostris; Meleagris ocellata; a specimen of the Squacco heron, *Ardea comata,* shot at Killarney, has been deposited on loan. Birds eggs, amongst them those of the rare bird *Chionis minor,* have been received from the island of Rodriguez.

Reptiles.—The collection has been largely increased.

Fishes.—A specimen of the fox shark, *Alopecias vulpes,* captured off Portrush, county Antrim, has been secured for the Society through the kindness of Mr. J. D. Ogilby who has also sent a small portion of the rare Dolphin, *Delphinus acutus,* sufficient for the identification of the specimen, the first appearance of which on the Irish coast is thus recorded. The greater part of the animal was destroyed before being seen by Mr. Ogilby.

Molluscs.—Several rare shells have been added, including the genus *Bartlettia; Trichotropus bicarinata, Eutychia metablata, Spondylus Victoriæ,* fine specimens of *Vitrina,* &c. The interesting and attractive collection of glass models of the nudibranchiate mollusca, radiata, &c. has been considerably increased.

Geology.—The Society has received through the British Museum a collection of specimens made by the officers attached to the expedition sent to the island of Rodriguez and Kerguelans-land to observe the transit of Venus; a fine series of the fossil bones of the extinct bird the solitaire, *Pezophaps solitarius,* also some bones of the *Testudo rodricensis.*

The collection of pleistocene bones collected by Professor A. Leith Adams in the cave at Shandon, county Waterford, has been presented to the Society by the Council of the Royal Irish Academy.

The *Ethnological* collection has been increased during the year by about the usual number of additional specimens from the Polynesian islands and other localities, including specimens presented by Dr. W. H. Goode, R.N., Major P. D. Vigors, and Dr. J. Mullen, R.N.

Minerals.—Numerous specimens acquired both by purchase and presentation have been added to this collection. Those purchased consist almost exclusively of species and varieties not previously represented in the Museum; amongst them are *Alexandrite, Arkansite,* crystallized *Dyscrasite, Nadorite, Patrinite, Phenakite, Parisite, Phosgenite, Pyrosmalite,* crystallized *Vivianite* and *Woerthite.* The entire collection is being at present furnished with printed labels, a task of great labour, but which when completed will add greatly to its scientific value.

The following is the return of the number of persons who visited the Museum during the past year :—

	1876.	1875.
Day time - - - -	29,137	12,905
Evening - - - -	67,590	53,150
	96,727	66,055

The large increase in the number of visitors, at least in the day time, is no doubt to be attributed to the opening of the entrance to the Museum at Merrion Square in addition to that which previously existed at

Appendix I.

REPORT OF ROYAL DUBLIN SOCIETY.

Library.

Kildare Street. The evening attendance also shows a considerable increase.

LIBRARY.

During the year 1876 the library was open on 290 days and 291 evenings, being closed for cleaning purposes from 29th August to the 11th September both inclusive. During that period the number of readers was as follows:—

		Daily average.
Male readers, day time	12,341	42·5
,, evening	6,226	41·0
Ladies, day time	3,732	13·0
Total	22,299	

This shows an increase over the number of readers of the previous year of 3,995. It is almost certain that the actual number of readers in this library is considerably greater than that shown in the returns, as many persons neglect to enter their names daily in the attendance book although much care is taken to see that all do so.

The indexing and press marking of the books are still in progress.

BOTANIC GARDENS.

Botanic Gardens.

The plant houses and conservatories have been maintained in substantial repair by the Board of Public Works. The residences of the Director and of the foreman have been painted and several substantial improvements effected in the house of the latter.

The hydraulic ram by which water is raised from the river has been kept in good working order, but it is to be wished that a permanent supply may soon be provided from the city mains which will afford an ample service of this important element during the driest summer.

The collection of hardy plants arranged according to the natural system is in good condition, and having been furnished with new labels the value of the collection for educational purposes will be much enhanced.

Exchanges of plants and seeds have been as numerous as in former years. A considerable number of both has been acquired during two journeys made by the Director during the past year, the one to various parts of England, Holland, and Belgium in the month of May, the other to Scotland, in September. Purchases of plants, &c. were made at the various plant establishments visited.

The total number of species and varieties of plants received during the past year amounted to 528; 644 were given in exchange; of seeds, 1,128 packages were received, and 418 packages given in exchange.

Among the principal donations those from the Royal Gardens at Kew, from Walter Bourke, Esq., of Calcutta, and from the Director of the Botanic Gardens, Saharunpore, deserve special notice. A large number of miscellaneous specimens has been received for the Botanical Museum, but it is greatly to be regretted that a proper building for the collection should not have been erected long since. The valuable objects which now constitute this Museum are at present placed in an iron structure which is hardly weather proof and is in all respects unsuitable.

Plants and specimens for the illustration of the course of lectures on Botany at the Royal College of Science, and at Queen's College, Galway, and for the use of the students in the School of Art, have been as usual regularly supplied.

The number of visitors during the year is as follows :—

On Sundays - - - -	133,720
On other days - - -	52,661
	186,381

Showing an increase in the attendance of 2,386 compared with that of the previous year.

AGRICULTURAL DEPARTMENT.

Spring Cattle Show 1876.

Agricultural Department

This important national exhibition was held on Tuesday 18th April, and three following days.

The following table exhibits the principal features of the show :—

Description.	Entries.	Money Prizes.	Medals.
		£ s. d.	
Bulls - - - - - -	223	157 0 0	1
Cows and heifers - - - -	53	82 0 0	—
Fat stock - - - - - -	63	15 0 0	22
Swine - - - - - -	38	36 0 0	9
Tweeds - - - - - -	2	—	2
Implements and machines - - -	1,430	—	—
	1,809	290 0 0	34

The "Chaloner" plate was awarded for the first time to Richard Chaloner, Esq., Kingsfort Moynalty, for his short horned roan bull, "Anchor."

The number of visitors to the show amounted to 12,608 persons.

Winter Show of Fat Cattle, Poultry, Farm and Dairy Produce, &c.

This show was held on Tuesday 5th December and three following days.

The following table exhibits the principal features of the show :—

Description.	Entries.	Money Prizes.	Medals.	Certificates.
		£ s. d.		
Fat stock - -	56	117 0 0	—	—
Sheep (lots) - -	15	28 0 0	—	—
Swine (lots) - -	6	12 0 0	—	—
Poultry - - -	359	125 0 0	—	—
Butter, cheese, &c. -	11	10 0 0	—	—
Wool, frieze, and tweeds -	2	—	1 Bronze	—
Vegetable produce, tubers, &c.	84	22 15 0	5 Bronze	—
General collections -	2	7 10 0	—	—
Collections of Public Institutions.	5	—	—	2
Manures, &c. - -	72	—	—	—
	612	322 5 0	6	2

The number of persons who visited the show amounted to 1,547.

Appendix I.

REPORT OF ROYAL DUBLIN SOCIETY.

Agricultural Museum.

The museum was visited during the year by 14,035 persons.

Show of Horses and Rams.

This important show was held on Tuesday, 29th August, and three following days.

The following table exhibits the number of entries in each class and the prizes awarded:—

Description.	Entries.	Money Prizes.		
		£	s.	d.
Thoroughbred and other sires - -	21	137	10	0
Hunters - - - - -	333	308	0	0
Ladies' horses and park horses - -	20	12	0	0
Weight carrying cobs and roadsters -	26	61	0	0
Harness horses and mares - - -	8	10	0	0
Ponies - - - - -	35	20	0	0
Brood mares - - - -	19	85	0	0
Agricultural horses, including sires -	27	113	0	0
	489	746	0	0

The number of horses entered for the previous exhibition was 621, thus showing a decrease of 132 in the number entered in 1876. According to the testimony of the judges, however, the general quality of the animals exhibited was much higher than at any previous show.

The challenge cup presented by the Royal Agricultural Society of Ireland for the best agricultural sire was awarded the first time to Messrs. Arres, Mather, and Arres.

The show of rams which was held at the same time comprised 21 entries, the "Jury Challenge Cup" for the best Roscommon ram was adjudged the first time to B. Hannan, Esq., for ram No. 28.

His Grace the Lord Lieutenant visited the show, which was attended by 15,776 of the general public.

SCHOOL OF ART.

School of Art.

The number of students who received instruction in the School of Art during the session which ended on the 31st July 1876 is as follows:—

Day classes,—		
Males - -	51	
Females - -	225	
		276
Morning and evening artizan classes,—		
Males - -	195	
Females - -	50	
		248
		554

At the annual examination of the students in freehand and model drawing, geometry and perspective for prizes of the second grade, 209 students presented themselves for examination, of whom 87 were successful, 27 second grade prizes were awarded, and 14 full certificates.

At the annual competition in London of the works executed by the students of all the Schools of Art in the United Kingdom, one gold medal, two silver medals, three bronze national medals were awarded, as well as one Queen's prize, and 39 third grade prizes.

The usual exhibition of the students works was held during the Christmas vacation which was visited by 4,122 persons.

The meeting for the distribution of the prizes awarded to the successful students in 1875 was held on 24th February; his Grace the Duke of Abercorn, Lord Lieutenant of Ireland, distributed the prizes to the students on the occasion, when 862 persons were present.

The following is a SUMMARY of the attendance of the public at the several departments of the Society during the year 1876:—

	Number.	Total.
Natural History Museum:—		
Day time	29,137	
Evenings	67,590	
		96,727
Library readers:—		
Day time, including 3,732 ladies	16,073	
Evenings	6,226	
		22,299
Botanic Garden:—		
Sundays	133,720	
Other days	52,661	
		186,381
School of Art:—		
Students for session ending 31st July		524
Distribution of Art prizes		846
Exhibition of students' works		8,000
Evening scientific meetings and discourses		811
Examinations for certificates of merit		57
Agricultural museum		14,035
Spring cattle show		12,469
Winter agricultural show		1,547
Horse and ram show, autumn		17,312
Total		361,002

Adopted by the Council,

W. EDW. STEELE, M.D.,
Registrar.

January 25, 1877.

Appendix K.

REPORT OF ROYAL ZOOLOGICAL SOCIETY OF IRELAND.

APPENDIX K.

ROYAL ZOOLOGICAL SOCIETY of IRELAND.

THE forty-fifth Annual Meeting of the Royal Zoological Society of Ireland was held in the College of Physicians on Tuesday, 9th January 1877.

Mr. J. W. Murland, President, in the Chair.

REPORT OF COUNCIL.

Visitors.

During the year 1876 the numbers of visitors to the gardens and the receipts at the entrance gate were as follows :—

		£	s.	d.
1. Members - -	6,470			
2. Public Institutions -	3,554			
3. Visitors on tickets -	326			
4. Visitors at 1*s.* - -	14,095	704	15	0
5. Visitors at 6*d.* - -	4,648	116	4	0
6. Visitors at 3*d.* - -	884	11	1	0
7. Visitors at 2*d.* - -	56,599	471	13	2
8. Visitors at 1*d.* - -	11,945	49	15	5
Total admissions -	98,491	£1,353	8	7

During the preceding year (1875) the corresponding numbers and receipts were as follows :—

		£	s.	d.
1. Members - -	6,118			
2. Public Institutions -	3,351			
3. Visitors on tickets -	296			
4. Visitors at 1*s.* - -	16,854	842	14	0
5. Visitors at 6*d.* - -	3,688	92	4	0
6. Schools at 3*d.* - -	303	3	15	9
7. Visitors at 2*d.* - -	60,466	503	17	8
8. Visitors at 1*d.* - -	13,839	57	13	3
Total admissions -	104,945	£1,500	4	8

The total numbers of visitors and receipts at gate during the past 10 years were as follows :—

Year.	Visitors.	Receipts.		
		£	s.	d.
1867	125,010	1,006	19	1
1868	127,900	938	18	6
1869	136,052	1,046	8	4
1870	151,785	1,359	16	6
1871	167,692	1,352	0	5
1872	147,184	1,502	9	10
1873	147,762	1,450	4	3
1874	109,923	1,442	14	4
1875	104,945	1,500	4	8
1876	98,491	1,353	8	7

During the corresponding years the total receipts from entrance fees and subscriptions were as follows:—

Year.	Entrance Fees and Subscriptions.	Year.	Entrance Fees and Subscriptions.
	£		£
1867	291	1872	496
1868	343	1873	404
1869	369	1874	610
1870	378	1875	429
1871	435	1876	448

The stock of animals in the gardens during the past eight years was as follows:—

Years.	Mammals.	Birds.	Reptiles.
1869	143	219	25
1870	182	222	22
1871	173	245	30
1872	174	220	9
1873	153	216	12
1874	152	240	4
1875	136	237	9
1876	116	220	9

The sums expended in the purchase of animals during the past 10 years were as follows:—

	£	s.	d.		£	s.	d.
1867	404	7	6	1872	416	6	1
1868	145	16	3	1873	143	0	0
1869	294	19	0	1874	234	18	0
1870	435	6	0	1875	107	6	0
1871	351	13	0	1876	185	4	5

The promenades of May, June, and July were continued in 1876.

The numbers of members and visitors on the promenade days of each year were as follows:—

Year.	Members.	Visitors.	Total.	Receipts.		
				£	s.	d.
1869	902	2,946	3,848	73	13	10
1870	986	3,633	4,619	88	3	6
1871	2,030	4,193	6,223	104	16	6
1872	1,488	2,710	4,198	135	10	0
1873	1,738	2,075	3,813	99	5	0
1874	1,814	1,741	3,555	86	2	6
1875	1,390	1,572	2,962	78	12	0
1876	1,729	2,050	3,779	92	0	6

Appendix K.

REPORT OF ROYAL ZOOLOGICAL SOCIETY OF IRELAND.

The receipts from Sunday admissions, during the past ten years, have been :—

	£	s.	d.		£	s.	d.
1867 - -	396	8	1	1872 - -	471	14	7
1868 - -	417	5	6	1873 - -	477	1	3
1869 - -	431	15	4	1874 - -	497	8	4
1870 - -	472	6	6	1875 - -	561	10	11
1871 - -	515	1	5	1876 - -	521	8	7

During the last few years the Council have expended large sums of money in the purchase of new and interesting animals, and in improving the houses and paddocks intended for their shelter and exercise. Among the new animals and improvements may be mentioned the following :—

1. The flock of llamas (and their paddock)—a collection unrivalled in any Zoological Garden in the world, and which is rapidly increasing.

2. The collection of bears now in the gardens includes six species, among which are two beautiful Polar bears, "Olink" and "Polynia," recently imported, the former of which is named after the Eskimo chief who originally captured him and brought him to Dundee; and the latter is named "Polynia" from the vessel in which she came home.

3. The bathing pond and paddock for the elephant, which cost a large sum of money, the expenditure of which had become necessary for the health of the animal, and the safety of the public.

The Council are now anxiously contemplating the revival of the breed of lions which made the Dublin Gardens famous, and intend to naturalise (if possible) the Burtchael zebra in Dublin. To carry out these objects it will be necessary to purchase new lionesses and a female zebra.

The Council have further in view the building of a new and comfortable herbivore house, which will accommodate a large class of interesting animals that now suffer much from the cold and wet of our winter climate.

Many friends of the Dublin Gardens have come forward to aid the Council in their laudable exertions, amongst whom the following may be gratefully mentioned :—

Miss Nesbitt has offered 300*l.* to provide an aviary for the smaller tropical and sub-tropical birds, so as to avoid the necessity of housing them with the monkeys.

The President of the Society, Mr. James William Murland, has deposited 50*l.* for the lioness fund; Mr. William Findlater has given 50*l.* to purchase one of the Polar bears; and a drinking fountain is being erected for the benefit of those frequenting the gardens, at an expense of 25*l.*, by a member of the Council.

A sum of 600*l.* would secure nearly all the objects the Council have in view; and it is believed that the Dublin public will not hesitate to support the Council in their efforts. The best form of aid would be either donations given for specific objects, or new members joining the Society as life members, at 10*l.* each.

The most remarkable additions to the gardens during the year were the following :—A tigress, leopardess, and sloth bear, presented by H.R.H. the Prince of Wales; male and female Polar bears, one of which was presented by Mr. W. Findlater; a young mandrill, born in the gardens (this is the first record of the birth of a mandrill in Europe); three leopards and two ocelots, born in the gardens.

The following animals were presented, living or dead, for the use of the gardens :—125 cows, 19 horses, and 26 sheep.

SAML. HAUGHTON,
Secretary.

17th January 1877.

APPENDIX L.

Appendix L

REPORT OF ROYAL HIBERNIAN ACADEMY

ROYAL HIBERNIAN ACADEMY of ARTS.

REPORT of the COUNCIL for the YEAR 1875–6.

IN furnishing the report of the year 1875–6 the Council of the Royal Hibernian Academy is happy to state that the financial results of the Institution are most satisfactory.

The annual exhibition opened on Monday the 14th of February, and closed on Saturday the 27th of May, being open 15 weeks, and for seven weeks it was open in the evenings at a reduced charge of one penny. Annual exhibition.

There were 451 works exhibited, being an increase of 69 works over the total exhibited in the previous year. The purchases amounted to 1,930*l.* 9*s.* 6*d.*, including the sum expended by the Art Union of Ireland, which amounted to 310*l.*

The following is an analysis of the attendance and receipts :—

	£	s.	d.
311 Season Tickets, at 3*s.* each - -	46	13	0
4,196 Day Admissions, at 1*s.* each -	208	7	0
19,020 Evening Admissions, at 1*d.* each -	79	5	0
1,845 Catalogues, at 6*d.* each - -	46	2	6
2,256 Evening Catalogues, at 3*d.* each -	28	4	0
	408	11	6
Commission on sales - - -	107	0	0
	£515	11	6

During the exhibition the students of the following Educational Institutions were invited to visit the exhibition gratuitously :—

Blue Coat School (King's Hospital).
Masonic Male and Female Schools.
Deaf and Dumb Mutes, St. Mary's, Cabra.
Clergy Daughters School.
Pleasants Asylum.
The Orphans of the Presentation Convent, George's Hill.
The Royal Hibernian Military School.
The Drummond Institute for the Orphans of Soldiers.
The Marine School.
St. Peter's Orphanage.
St. Vincent de Paul Male Orphanage.
St. Mary's Industrial School.

Since the 18th of October 1875 there were four general meetings of the Academy, and 10 meetings of Council.

The schools for the living model and for the study of the antique opened for the winter session on the 4th of October 1875, and closed on the 14th of January 1876, being open 14 weeks; and re-opened on the 28th of February for the spring and summer session, and closed on the 26th of May, being open 13 weeks. Schools.

The average attendance, weekly, was - -	40
Painting school, average attendance - -	18
Antique school, average attendance - -	20

The annual visit of the Inspector from the Department of Science and Art (F. B. Barwell, Esq.) took place on the 14th of July, and in Prizes

Appendix L. — REPORT OF ROYAL HIBERNIAN ACADEMY.

conjunction with the Keeper, P. Vincent Duffy, Esq., he made the following awards:—

To George A. Brenan, first prize, a silver medal, for drawing from the living model (in competition).

To J. G. O'Neill, second prize, bronze medal.

For the best work from the antique (in competition):—

Bronze medal, E. Henn.

For the greatest number of meritorious works from the nude living model:

1st prize, 5*l.*, George A. Brenan.

2nd prize, 3*l.*, W. T. Parkes.

For the best collection of works from the antique:

Prize, 5*l.*, George A. Brenan.

Lectures.

The Professor of Anatomy, Wm. Thornley Stoker, Esq., M.D., delivered a course of lectures in the Academy on the anatomy of expression.

The Professor of Painting, H. Macmanus, Esq., R.H.A., also delivered a course of lectures on painting; and Professor C. A. Cameron, Esq., F.R.C.S.I., &c., delivered a course of lectures on the chemistry of colours, which were open to Art students and the public.

During the year just passed the Academy has to regret the death of one of its oldest and most respected members, Terence Farrell, Esq., and also one of its Associates, Samuel Ferris Lynn, Esq.

Mr. James Gray was elected a constituent member of the Academy, and Mr. James Brenan and Mr. Stephen C. Smith were elected associate.

Annexed is the account of income and expenditure as furnished by the treasurer, Thomas Farrell, Esq., R.H.A.
